

## **EXECUTIVE MAYOR’S FOREWORD FOR MUNICIPAL IDP 2012 TO 2017**

It is with great pleasure as the newly elected Executive Mayor of Alfred Nzo District Municipality after 2011 Local Government Election to present to the Council, Communities and various stakeholders of the municipality the Draft 5Year Municipal Integrated Development Plan 2012 to 2017 as guided by Chapter 5 Section 25 of the Municipal Systems Act, 2000 as amended. As mandated by the said legislation through Section 27 of the same Act, the municipality in consultation with all Local Municipalities drafted and adopted IDP Framework Plan that has guided the process of developing IDPs.

In the process the municipality appreciated the commitment showed by local communities where they reflected their interest in terms of key focus areas that the Council should consider which has in turn informed the Vision the municipality should lead. The municipality has taken into consideration the approach by the government of the Republic of South Africa in terms of National Strategic Priority focus areas being creation of decent work and sustainable livelihoods, Education, Health, Rural development, food security and land reform, and Fight against crime and corruption. The municipality further noted Provincial Government Strategic Priorities hence the municipal ultimate goals (four) of the five year plan are to focus on economic growth through rural development by expanding and enhancing infrastructure through provision of water and sanitation and electricity. For the municipality to achieve its Vision there should be a common purpose within all stakeholders to ensure good governance within the municipality through effective partnerships. Through this approach of common purpose, the municipality aims to ensure Community resilience and self-reliance by encouraging the utilization of available resources through social development and effective maintenance of available resources and empowerment of local people. The municipality considers the fourth goal being Service excellence and sustainability critical, the sustainability of services rendered by the municipality will ensure unlocking of

economic potential that will contribute to the growth of district economy and reverse the impacts of challenges (unemployment and poverty) facing the municipality.

The Council has therefore adopted a new vision being **“A self-sustainable municipality that guarantees effective and efficient rural development”**. For the municipality to lead its vision the municipal Strategic Plan (IDP) reflects that in the next five years over R2 billion will be invested towards infrastructure development and over R600 million will be invested towards maintenance of existing infrastructure in particular water and sanitation where the major focus is on rural infrastructure development. This approach by the municipality will further contribute towards government focus area on infrastructure development as reflected by the Hon President of the Country in his State of the Nation Address, 2012. The municipality has noted the plans by Department of Human Settlements to sustain the livelihoods through provision of rural housing programme where over R700 million will be invested in the next five years which will further contribute towards job creation within the district.

The municipality further commits to invest almost R100 million towards socio-economic infrastructure development in the next five years which will assist in job creation and district economic growth to encourage further investments in the district and minimise the impact of district economic leakage. This approach will see the municipality further investing on revival of all existing Local Economic Development projects for sustainable development. The municipality will further invest towards job creation through implementation of Expanded Public Works Programme which will reduce the levels of unemployment and poverty within the district.

The municipality derived its values from the Batho Pele principles where it will promote Humanity, Professionalism, Responsiveness, Respect, Transparency, Courtesy, Accountability, Trustworthiness, and Teamwork and this will be achieved through effectiveness of the recently established Customer Care Centre. The municipality further

aims to promote healthy and sustainable communities through implementation of social strategic approaches which include Municipal health Services and disaster and rescue management.

Lastly the municipality aims to achieve clean audit by 2014 in line with National Operation Clean Audit 2014 and this could be achieved through good governance which would be achieved through proper monitoring and oversight by the Council. This will see the municipality investing towards improving systems and capacity within the municipality through filling of critical posts, retaining the skills and further embark on skills development within the district both internal and external.

**EXECUTIVE MAYOR**

**CLLR E. DIKO**

## SECTION A: EXECUTIVE SUMMARY

Alfred Nzo District Municipality is located on the north-eastern side of the Province of the Eastern Cape and stretches from the Drakensberg Mountains, borders Lesotho in the North, Sisonke District Municipality in the East and O.R. Tambo District Municipality in the South. In preparation for the 2011 Local Government Elections, the Demarcation Board in terms of the Demarcation Act of 2008 as amended declared the changes in some municipalities (inter-boundaries) where some local municipalities were to be moved from the other district municipalities to the other and also the amendment of municipal wards boundaries. Through that Alfred Nzo District Municipality is one of the affected district municipalities where it was declared that two Local Municipalities from O.R. Tambo District Municipality being Mbizana and Ntabankulu will be incorporated under Alfred Nzo District Municipality in the process. Circular No. 54 of the Municipal Finance Management Act No. 56 of 2003, gives guidance in terms of preparations and adoption periods of Municipal IDPs and Budgets for 2011/12 considering the changes that will take place due to the Local Government Elections. In terms of the National Treasury, the affected municipalities by the Demarcation process when doing their planning in terms of Integrated Development Plans and Budget for 2011/12 should take into consideration the proposed changes as a result of the demarcation process. Circular 54 of the Municipal Finance Management Act of 2003 further gives options in terms of the time period for the municipalities to adopt their IDPs in preparation for the changes as a result of elections. The district municipality together with its local municipalities resolved to adopt Option 1 where both IDP and Budget will be adopted by the current Council and the new Council will have to endorse the adopted IDP and Budget by its predecessor.

The District surface area has increased due to incorporation of Mbizana and Ntabankulu Local Municipalities from 6858 to 11119 square kilometers and is now sub-divided into four local municipalities: Matatiele covering 4352 km<sup>2</sup> (39% coverage of district area), Umzimvubu 2506 km<sup>2</sup> (23% coverage of district area), Mbizana 2806 km<sup>2</sup> (25% coverage of district area) and Ntabankulu occupying 1455 km<sup>2</sup> (13% coverage of district area). The process also entailed the amendment of all four municipalities' wards where the wards for Umzimvubu LM increased from 24 to 27 due to some wards from Ntabankulu Municipality being incorporated under Umzimvubu

Local Municipality; Matatiele 24 to 26; Mbizana from 25 to 31 and Ntabankulu from 15 to 18 wards. The changes resulted in Alfred Nzo District Municipality being formed by a total of 102 wards.

## **CONSIDERATION OF LEGISLATIVE MANDATE**

There is a multitude of policy and legislation that Municipalities must comply with and take cognisance of, the most important of which are the following;

### **I. REPUBLIC OF SOUTH AFRICA CONSTITUTION ACT 1996**

The Republic of South Africa Constitution Act (1996); Chapter 7 (Sec 153) sets out the objectives of Local Government and provides that Municipalities have a developmental duty which entails structuring and managing their budget, administration and planning processes in a manner that prioritizes the basic needs of their communities whilst promoting social and economic development within their communities. Chapter 3 deals with co-operative governance which is essential to the fulfillment of the objectives given that these objectives encompass a wider spectrum than the functional areas of Municipalities. Section 152 further mandates the municipalities to strive to achieve the following objectives:

- a) To provide democratic and accountable government for local communities;
- b) To ensure the provision of services to communities in a sustainable manner;
- c) To promote a safe and healthy environment and;
- d) To encourage the involvement of communities and community organizations in the matters of local government.

### **II. MUNICIPAL SYSTEMS ACT 32 OF 2000**

The Municipal Systems Act (2000); read together with the Municipal Planning and Performance Regulations (2001) provides the legislative framework for integrated development planning. Municipalities must undertake developmentally oriented planning

and are legally required to adopt an IDP, give effect to their IDP, conduct their affairs in a manner consistent with their IDP and review their IDP on an annual basis.

### **III. NATIONAL SPATIAL DEVELOPMENT PERSPECTIVE**

The National Planning Commission (NPC) has been established and tasked *inter alia* with the formulation of a long term strategic plan for the South Africa. The plan will articulate a long term vision and a plan for its implementation. It will shape government's service delivery and development programmes, and guide spatial transformation.

In the interim, the national government has adopted various sector based policy frameworks. The majority of these have serious implications for spatial planning at a local level. In view of the rural nature and underdevelopment that characterises the ANDM, only the following are considered:

- The New Growth Path.
- Comprehensive Rural Development Strategy and the associated programme.
- The Comprehensive Plan for the Development of Sustainable Human Settlements.

### **IV. COMPREHENSIVE RURAL DEVELOPMENT PROGRAMME**

The Comprehensive Rural Development Programme (CRDP) seeks to maximize the use and management of natural resources to create vibrant, equitable and sustainable rural communities. This includes:

- contributing to the redistribution of 30% of the country's agricultural land;
- improving food security of the rural poor; and
- creation of business opportunities, de-congesting and rehabilitation of over-crowded former homeland areas.

In line with the CRDP, ANDM SDF will, in the short to medium term, prioritise the revitalization of rural towns, stimulation of agricultural production with a view to contributing to food security, and aggressive implementation of land and agrarian reform policies. In the long-term, it will provide for the transformation of rural settlements into

efficient, generative and sustainable settlements. This includes the protection of natural resources and identification of areas with potential for investment and job creation.

## **V. COMPREHENSIVE PLAN FOR THE DEVELOPMENT OF SUSTAINABLE HUMAN SETTLEMENTS**

The Comprehensive Plan for the Development of Sustainable Human Settlements (August 2004) promotes the achievement of a non-racial, integrated society through the development of sustainable human settlements and quality housing. This program seeks to use housing delivery as a means for the development of sustainable human settlements in support of spatial restructuring. It moves beyond the provision of basic shelter towards achieving the broader vision of integrated, sustainable and economically generative human settlement systems at both local and regional scales. The following are fundamental tenets and underlying principles of this new approach:

- progressive informal settlement eradication;
- promoting densification and integration in urban centres;
- enhancing spatial planning in both urban and rural contexts;
- enhancing the quality and location of new housing projects;
- supporting urban renewal programmes; and
- developing social and economic infrastructure.

## **VI. PROVINCIAL SPATIAL DEVELOPMENT PLAN**

Provincial Spatial Development Plan embraces the national spatial planning principles, and advocates, *inter alia*, for the following:

- Optimum conservation of environmentally sensitive areas and indigenous forestry;
- Development of the five major tourism/recreational areas in the province including the Maluti Route;
- Development of nodal points including towns such as Mt Frere, Mt Ayliff, Bizana, etc;

- Adoption of a hierarchy of settlements linked to the three investment levels namely regional, district and smaller towns (villages and settlements);
- Developing an efficient and accessible transportation networks;
- Spatial Development initiatives; and
- Fostering small-scale agriculture as the cornerstone of a rural development programme.

## **VII. PROVINCIAL GROWTH AND DEVELOPMENT PLAN**

The Eastern Cape Provincial Growth and Development Plan 2004 -2014 provides a strategic framework, sectoral strategies and programmes aimed at rapid improvement in the quality of life for the poorest people of the province. It sets out a vision with sequenced and quantified targets in areas of poverty eradication, agrarian transformation, economic growth (diversification manufacturing and tourism potential), infrastructure development, human resource development and public sector institutional transformation. It is thus critically important for the ANDM to pursue spatial transformation and development within the context of the PDGP, and to advance the aims and objectives of this overarching strategy and provincial development vision

- ⇒ The Local Government Municipal Finance Management Act, (2003) requires municipalities to coordinate the process of preparing the annual budget and revising the IDP to ensure that there is integration between the two. It makes provision for Service Delivery Budget Implementation Plans (SDBIP) to ensure effective implementation of service delivery in accordance with the annual budget.
- ⇒ Other pertinent legislative frameworks include the Municipal Structures Act, (1998) and the Inter-Governmental Relations Framework, (2005).
- ⇒ Relevant policy frameworks include the RDP (1994), GEAR (1996), White Paper on Local Government (1998), PGDP (2004 -2015), Provincial Spatial

Development Plan (2003) and the ECDLGTA Framework Guide for Credible IDP's.

## **POWERS AND FUNCTIONS OF THE MUNICIPALITY**

The Alfred Nzo District Municipality executes amongst others the following functions and powers:

- Integrated Development Planning for the district as whole including the Framework Plan for IDPs for local municipalities within its area of jurisdiction.
- The district is a Water Service Authority (WSA) and therefore provides Bulk and Portable water supply as well as both rural and urban sanitation
- Municipal Health Services serving the district as a whole.
- Fire and Rescue Services as well as Disaster Risk Management within the whole district.
- The implementation of Expanded Public Works Programme.
- Environmental Management within the whole district.
- Financial Management and revenue collection through services it renders to communities, business and government departments and distribution of grants to local municipalities.
- Promotion of Local Tourism for the district as a whole.
- Promotion of Local Economic Development in the district as a whole.

## **FUNCTIONS NOT YET PROVIDED BY THE DISTRICT**

- Municipal Abattoirs
- Municipal Public Transport
- Municipal airport services

## OVERVIEW OF THE IDP PROCESS PLAN FOR 2012/13

The Alfred Nzo District Municipality prepared and adopted its IDP Process Plan 2012/13 by the 29<sup>th</sup> of August 2011. The Alfred Nzo District Municipality Process Plan for IDP 2012/13 outlines roles and responsibilities as summarized below:

**Table 1: Process Plan 2012/13**

Structure(s)/Person(s)	Roles & Responsibilities
<b>Council</b>	<ul style="list-style-type: none"><li>-Adopts and approve the IDP Framework and Process Plans.</li><li>-Responsible for the overall management, coordination and monitoring of the IDP development processes.</li><li>-Approves the municipal budget and other IDP Sector Plans and Policies in line with the IDP.</li></ul>
<b>Executive Mayor</b>	<ul style="list-style-type: none"><li>-Gives direction on Process Plan for IDP development</li><li>-Provides political guidance and leadership for both IDP and the budget processes.</li></ul>
<b>Members of Mayoral Committee</b>	<ul style="list-style-type: none"><li>-Responsible for providing the overall management, coordination and monitoring of the process of the IDP development.</li><li>-Recommends the approval of the IDP to Council</li></ul>
<b>Municipal Manager</b>	<ul style="list-style-type: none"><li>-Manages and coordinates the whole process.</li><li>-Ensures that all departments fit in the organizational vision.</li><li>-Ensures that resources are allocated accordingly and well</li></ul>

	<p>managed.</p> <ul style="list-style-type: none"> <li>-Chairs the IDP management committee.</li> <li>-Ensures that performance management and evaluations are done on a quarterly basis.</li> </ul>
<b>IDP Manager/officer</b>	<ul style="list-style-type: none"> <li>-Works closely with the Municipal Manager in ensuring that the Council vision is met.</li> <li>- Undertakes the overall management and co-ordination of the planning process,</li> <li>-Ensures alignment and compliance with the legislative framework, IDP guidelines and Sector Departments.</li> <li>-Offers strategic guidance and management to the IDP development process.</li> <li>- Ensures that the planning process is participatory, strategic and implementation oriented and is aligned with and satisfies sector-planning requirements</li> <li>-Ensures that implementation takes place within the available resources.</li> <li>-Ensures that all relevant stakeholders are appropriately involved.</li> <li>- Responds to comments on the draft IDP from public, horizontal alignment and other spheres of government to the satisfaction of the Municipal Council.</li> </ul>
<b>IDP Management Committee</b>	<ul style="list-style-type: none"> <li>-Monitors, evaluates progress and provide feedback to all structures</li> <li>-Provides technical guidance through whole process in all municipalities</li> <li>-Ensure and maintain integration and alignment of all plans and programmes</li> <li>-Standardize the planning processes</li> <li>- Considers inputs from other committees or stakeholders and recommend corrective measures.</li> </ul>

	-Considers and responds to comments by MEC for Department of Local Government and Traditional Affairs.
<b>Budget Management Committee</b>	<ul style="list-style-type: none"> <li>-Ensures alignment of proposed budget with IDP;</li> <li>-Ensures that sufficient funding is provided on the budget for projects as per IDP;</li> <li>-Records realistic revenue and expenditure projections for current and future years;</li> <li>-Take cognisance of national, provincial budgets, DORA and national fiscal and macro-economic policy.</li> </ul>
<b>IDP Representative Forum</b>	<ul style="list-style-type: none"> <li>-Represents the interests of the constituencies in the IDP Planning and Review Processes.</li> <li>-Ensures communication and participation from all stakeholders in municipal planning and decision making.</li> <li>- To contribute by providing relevant information on provincial sector department plans, programmes, budgets, objectives, strategies and projects.</li> <li>-Assists in projects and budgeting linkages or alignments.</li> </ul>
<b>Communities</b>	<ul style="list-style-type: none"> <li>-Participate in the IDP Rep Forum</li> <li>-Identify and priorities their needs through guidance by municipalities.</li> <li>-Discuss and comment on the draft IDP and Budget documents</li> </ul>
<b>Private Sector</b>	<ul style="list-style-type: none"> <li>-Participate and ensures inclusion of their projects and programmes in the IDP of the municipality</li> <li>-Provide information on the opportunities that the communities may have in the private sector.</li> </ul>
<b>Traditional Leaders</b>	<ul style="list-style-type: none"> <li>-Traditional Leaders should work closely with ward councilors to identify priority developmental issues within their communities</li> <li>-Facilitate community consultation in collaboration with ward councilors</li> </ul>

Other Community Organisations (FBOs, CBOs, Interested Groups etc)	-Participate in the process to ensure that interests of structures they represent are considered within the municipal planning process (IDP and Budget).
---	--

The Alfred Nzo District Municipality further presented its Process Plan with Framework Plan to its local municipalities, stakeholders including government sector departments and the said plan outlines the roles and responsibilities as well as plan of action on activities to be performed and time frames.

## CONSIDERATION OF MEC (DLGTA) COMMENTS FOR IDP REVIEW 2011/12

As required in terms of Section 32 (a) of the Municipal Systems Act of 2000, Alfred Nzo District Municipality submitted its adopted Integrated Development Plan as reviewed for 2011/12 to the MEC for the Department of Local Government and Traditional Affairs. The district municipality further participated in the IDP Assessment process which was facilitated by the Office of the MEC and subsequently comments were obtained from the MEC. In summary the municipal IDP 2011/12 was declared to be credible as it was rated high in accordance with the Department's ratings. The overall assessment scorings are summarized below:

**TABLE 2: MEC Comments**

KPA	RATING 2009/10	RATING 2010/11	RATING 2011/12
Spatial Development Framework	Medium	High	High
Service Delivery	Medium	Medium	High
Financial Viability	Medium	High	Medium
Local Economic Development	Medium	High	High

Good Governance & Public Participation	High	High	High
Institutional Arrangements	Low	Medium	Medium
<b>OVERALL RATING</b>	<b>MEDIUM</b>	<b>HIGH</b>	<b>HIGH</b>

In summary the MEC's Comments reflected the following:

- IDP Manager to report directly to the Municipal Manager in case there is no Strategic Manager.
- Municipal responses to public petitions have not been very encouraging.
- The Audit opinions that the municipality has been obtaining should be reflected in the IDP and the actions to turn around the situation to be reflected.
- Importance of adherence to IDP legislated timeframes regarding commencement and completion of IDP processes.
- The status of their infrastructure licensing issues with DWA should be included within their IDP

In terms of the current set-up the Manager responsible for the IDP reports directly to the Municipal Manager though the position for the Strategic Manager is in the organogram but remains vacant. In improving its accountability to public petitions the municipality has established a Customer Care Unit and has enforced it with Human personnel including the Manager. The municipality during the development of the IDP has strived to adhered to all legislated timesframes as they are contained within the IDP Framework and Process Plans.

## **OTHER NEW APPROACHES BY GOVERNEMENT**

### **A. OUCOME BASED APPROACH**

The Alfred Nzo District Municipality in the process considered other new approaches by the government in terms of improving the service delivery mandate. The Cabinet Lekgotla held from 20 to 22 January 2010 adopted 12 Outcomes approach that strategically addresses the main strategic priorities for the government. Each outcome has a number of outputs, sub-outputs and clear targets.

These strategic outcomes and outputs will be the strategic focus of the government between now and 2014. The Alfred Nzo DM considered very crucial that during the planning process for 2011/12 and beyond that outcomes that have some bearing or impact on the local government functioning are seriously considered by the municipalities. Furthermore the municipality anticipates playing a major role in the achievements of the outcomes as they are to be implemented by government sector departments but implementation will be happening at municipal levels. Municipalities will be in a position to measure the impact of the outcomes at local community levels and can further advise the departments or custodians of such outcomes. The 12 Government outcomes are summarized below:

**TABLE 3: 12 OUTCOMES APPROACH**

**OUTCOME 1: Improve the quality of basic education**

Outputs	Key spending programmes (National)	Role of Local Government
<ol style="list-style-type: none"> <li>1. Improve quality of teaching and learning</li> <li>2. Regular assessment to track progress</li> <li>3. Improve early childhood development</li> <li>4. A credible outcomes-focused accountability system</li> </ol>	<ul style="list-style-type: none"> <li>• Increase the number of Funza Lushaka bursary recipients from 9300 to 18 100 over the 2011 MTEF</li> <li>• Assess every child in grade 3, 6 and 9 every year</li> <li>• Improve learning and teaching materials to be distributed to primary schools in 2014</li> </ul>	<ul style="list-style-type: none"> <li>• Facilitate the building of new schools by:               <ul style="list-style-type: none"> <li>- Participating in needs assessments</li> <li>- Identifying appropriate land</li> <li>- Facilitating zoning and planning processes</li> </ul> </li> <li>• Facilitating the eradication of municipal service backlogs in schools by extending appropriate bulk</li> </ul>

	<ul style="list-style-type: none"> <li>• Improve Maths and Science teaching</li> </ul>	infrastructure and installing connections
--	--	---

**OUTCOME 2: Improve health and life expectancy**

Outputs	Key spending programmes (National)	Role of Local Government
<ol style="list-style-type: none"> <li>1. Increase life expectancy to 58 for males and 60 for females</li> <li>2. Reduce maternal and child mortality rate to 30-40 per 1 000 births</li> <li>3. Combat HIV/AIDS and TB</li> <li>4. Strengthen health services effectiveness</li> </ol>	<ul style="list-style-type: none"> <li>• Revitalize primary health care</li> <li>• Increase early antenatal visits to 50%</li> <li>• Increase vaccine coverage</li> <li>• Improve hospital and clinic infrastructure</li> <li>• Accredite health facilities</li> <li>• Extend coverage of new child vaccines</li> <li>• Expand HIV prevention and treatment</li> <li>• Increase prevention of mother-to-child transmission</li> <li>• School health promotion increase school visits by nurses from 5% to 20%</li> <li>• Enhance TB treatment</li> </ul>	<ul style="list-style-type: none"> <li>• Many municipalities perform health functions on behalf of provinces</li> <li>• Strengthen effectiveness of health services by specifically enhancing TB treatments and expanding HIV and AIDS prevention and treatments</li> <li>• Municipalities must continue to improve community Health Service infrastructure by providing clean water, sanitation and waste removal services</li> </ul>

**OUTCOME 3: All people in South Africa protected and feel safe**

Outputs	Key spending programmes (National)	Role of Local Government
<ol style="list-style-type: none"> <li>1. Reduce overall level of crime</li> <li>2. An effective and integrated criminal justice system</li> <li>3. Improve perceptions of crime among the population</li> <li>4. Improve investor</li> </ol>	<ul style="list-style-type: none"> <li>• Increase police personnel</li> <li>• Establish tactical response teams in provinces</li> <li>• Upgrade IT infrastructure in correctional facilities</li> <li>• ICT renewal in justice</li> </ul>	<ul style="list-style-type: none"> <li>• Facilitate the development of safer communities through better planning and enforcement of municipal by-laws</li> <li>• Direct the traffic control function towards policing high risk violations –</li> </ul>

<ul style="list-style-type: none"> <li>perceptions and trust</li> <li>5. Effective and integrated border management</li> <li>6. Integrity of identity of citizens and residents secured</li> <li>7. Cyber-crime combated</li> </ul>	<ul style="list-style-type: none"> <li>cluster</li> <li>• Occupation-specific dispensation for legal professionals</li> <li>• Deploy SANDF soldiers to South Africa's borders</li> </ul>	<ul style="list-style-type: none"> <li>rather than revenue collection</li> <li>• Metro police services should contribute by: <ul style="list-style-type: none"> <li>- Increasing police personnel</li> <li>- Improving collaboration with SAPS</li> <li>- Ensuring rapid response to reported crimes</li> </ul> </li> </ul>
---	--	---

**OUTCOME 4: Decent employment through inclusive economic growth**

Outputs	Key spending programmes (National)	Role of Local Government
<ul style="list-style-type: none"> <li>1. Faster and sustainable inclusive growth</li> <li>2. More labour-absorbing growth</li> <li>3. Strategy to reduce youth unemployment</li> <li>4. Increase competitiveness to raise net exports and grow trade</li> <li>5. Improve support to small business and cooperatives</li> <li>6. Implement expanded public works programmes</li> </ul>	<ul style="list-style-type: none"> <li>• Invest in industrial development zones</li> <li>• Industrial sector strategies-automotive industry; clothing and textiles</li> <li>• Youth employment incentive</li> <li>• Develop training and systems to improve procurement</li> <li>• Skills development and training</li> <li>• Reserve accumulation</li> <li>• Enterprise financing support</li> <li>• New phase of public works programme</li> </ul>	<ul style="list-style-type: none"> <li>• Create an enabling environment for investment by streamlining planning application processes</li> <li>• Ensure proper maintenance and rehabilitation of essential services infrastructure</li> <li>• Ensure proper implementation of the EPWP at municipal level</li> <li>• Improve procurement systems to eliminate corruption and ensure value for money</li> <li>• Utilize community structures to provide services</li> </ul>

**OUTCOME 5: A skilled and capable workforce to support inclusive growth**

Outputs	Key spending programmes (National)	Role of Local Government
<ul style="list-style-type: none"> <li>1. A credible skills planning institutional mechanism</li> <li>2. Increase access to intermediate and high-level learning programmes</li> <li>3. Increase access to occupation-specific programmes (especially artisan skills training)</li> <li>4. Research, development and innovation in human capital</li> </ul>	<ul style="list-style-type: none"> <li>• Increase enrolment in FET colleges and training of lecturers</li> <li>• Invest in infrastructure and equipment in colleges and technical schools</li> <li>• Expand skills development learnerships funded through sector training authorities and National Skills Fund</li> <li>• Industry partnership</li> </ul>	<ul style="list-style-type: none"> <li>• Develop and extend intern and work experience programmes in municipalities</li> <li>• Link municipal procurement to skills development initiatives</li> </ul>

	projects for skills and technology development <ul style="list-style-type: none"> <li>• National Research Foundation centres excellence, and bursaries and research funding</li> </ul>	
--	--	--

**OUTCOME 6: An efficient, competitive and responsive economic infrastructure network**

Outputs	Key spending programmes (National)	Role of Local Government
<ol style="list-style-type: none"> <li>1. Improve competition and regulation</li> <li>2. Reliable generation, distribution and transmission of energy</li> <li>3. Maintain and expand road and rail network, and efficiency, capacity and competitiveness of sea ports</li> <li>4. Maintain bulk water infrastructure and ensure water supply</li> <li>5. Information and communication technology</li> <li>6. Benchmarks of each sector</li> </ol>	<ul style="list-style-type: none"> <li>• An integrated energy plan and successful independent power producers</li> <li>• Passenger Rail Agency acquisition of rail rolling stock, and refurbishment and upgrade of motor coaches and trailers</li> <li>• Increase infrastructure funding for provinces for the maintenance of provincial roads</li> <li>• Complete Gauteng Freeway Improvement Programme</li> <li>• Complete De Hoop Dam and bulk distribution</li> <li>• Nandoni pipeline</li> <li>• Invest in broadband network infrastructure</li> </ul>	<ul style="list-style-type: none"> <li>• Ring-fence water, electricity and sanitation functions so as to facilitate cost-reflecting pricing of these services</li> <li>• Ensure urban spatial plans provide for commuter rail corridors, as well as other modes of public transport</li> <li>• Maintain and expand water purification works and waste water treatment works in line with growing demand</li> <li>• Cities to prepare to receive the devolved public transport function</li> <li>• Improve maintenance of municipal road networks</li> </ul>

**OUTCOME 7: Vibrant, equitable and sustainable rural communities and food security**

Output	Key spending programmes (National)	Role of Local Government
<ol style="list-style-type: none"> <li>1. Sustainable agrarian reform and improved access to markets for small farmers</li> <li>2. Improve access to affordable and diverse food</li> <li>3. Improve rural services and access to information</li> <li>4. Improve rural employment opportunities</li> <li>5. Enable institutional environment for sustainable and inclusive growth</li> </ol>	<ul style="list-style-type: none"> <li>• Settle 7 000 land restitution claims.</li> <li>• Redistribute 283 592 ha of land by 2014</li> <li>• Support emerging farmers</li> <li>• Soil conservation measures and sustainable land use management</li> <li>• Nutrition education programmes</li> <li>• Improve rural access to services by 2014:               <ul style="list-style-type: none"> <li>- Water – 74% to 90%</li> <li>- Sanitation- 45%-65%</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>• Facilitate the development of local markets for agricultural produce</li> <li>• Improve transport links with urban centres so as to ensure better economic integration</li> <li>• Promote home production to enhance food security</li> <li>• Ensure effective spending of grants for funding extension of access to basic services</li> </ul>

**OUTCOME 8: Sustainable human settlements and improved quality of household life**

Outputs	Key spending programmes (National)	Role of Government
<ol style="list-style-type: none"><li>1. Accelerate housing delivery</li><li>2. Accelerate housing delivery</li><li>3. Improve property market</li><li>4. While Alfred Nzo District Municipality considers all the National Outcomes very important, it is important that more focus is paid towards outcomes 4, 5, 6, 7, 9, 10, 11 and 12 as they have a direct involvement or role to be played mainly by the Local Government. Alfred Nzo District Municipality will strive to achieve objectives and delivery outputs of Outcome 9 as it is considered the most critical outcome that has more direct role of local government.

## **B. NEW GROWTH PATH**

The new growth path of 2010 is a statement of government's commitment to forging a developmental consensus. It is meant to lead the way by:

- Identifying areas where employment creation is possible on a large scale as a result of substantial changes in conditions in South Africa and globally.
- Developing a policy package to facilitate employment creation in these areas, above all through:
  - A comprehensive drive to enhance both social equity and competitiveness;
  - Systemic changes to mobilise domestic investment around activities that can create sustainable employment; and
  - Strong social dialogue to focus all stakeholders on encouraging growth in employment-creating activities.

It contains policies that speak to industry, rural development, competition, education and skills development, enterprise development, BBBEE, labour and technology

These are to be expressed through job drivers in the form of spatial development, social capital, new economies and the main economic sectors.

The success of the new growth path is hinged on interventions in key sectors. These are infrastructure, agricultural value chains, mining, the green economy, manufacturing sectors, which are included in the second Industrial Policy Action Plan (IPAP2), tourism and certain high-level services.

### **C. EASTERN CAPE RURAL DEVELOPMENT STRATEGY**

The Eastern Cape Rural Development Strategy is a sustained and long-term programmatic intervention in response to endemic poverty in the province. It is premised on the belief that through self organisation of communities, government, the private sector and other actors in the developmental arena, inroads can be made in the fight against chronic poverty in the province.

The rationale for a rural development strategy that caters to the specific needs of the province can be found in the status of:

- Structural factors that lead to marginalisation of societies and inequality of opportunities
- The historical political economy, whose legacy in rural hinterlands is experienced through low levels of economic integration
- Land and agrarian relations, which give rise to a skewed distribution of natural resources
- Settlement and migration patterns that lead to a divide between rural and urban areas
- A marked need for improved food security, based on agrarian transformation linked to indigenous ways of life
- Past initiatives, that have had mixed fortunes in their ability to deliver a lasting impact on rural development

In order to achieve the dual goals of transformed rural areas that are socially and economically developed, and a conducive institutional environment for rural development, the following pillars will give effective articulation to the rural development strategy:

- Land Reform
- Agrarian Transformation
- Non-farm rural economy
- Infrastructure development
- Social and human development
- Enabling Environment

(RDS, 2010)

## SECTION B: SITUATIONAL ANALYSIS

### INTRODUCTION AND BACKGROUND

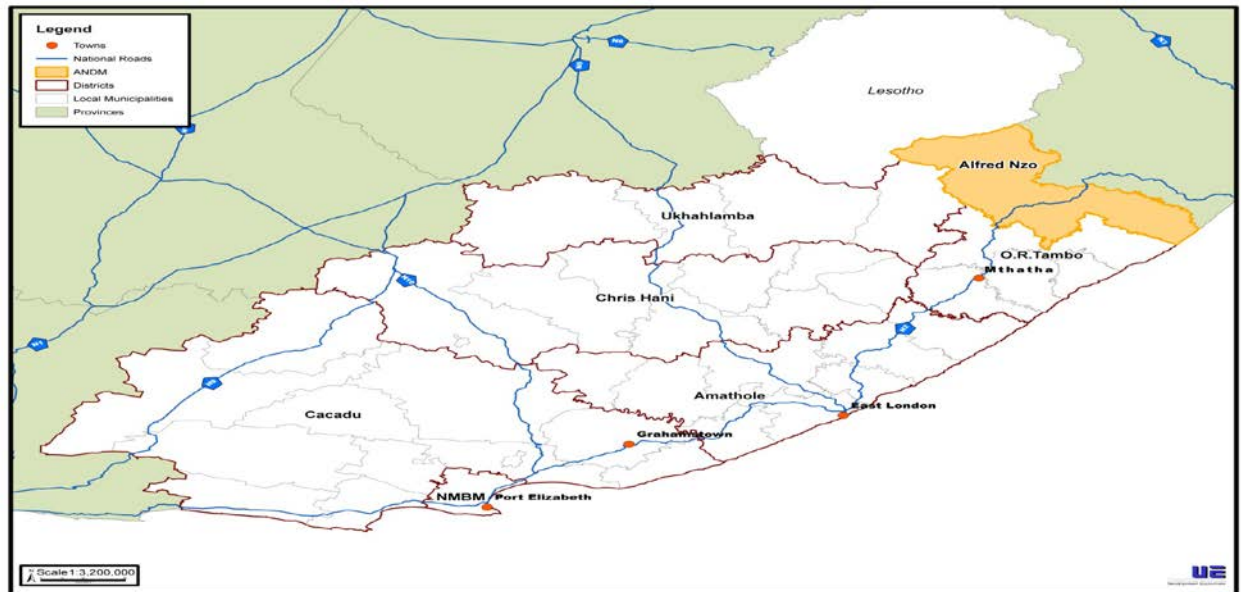

The analysis phase aims to assess the existing level of development within the Municipality through analysis of the prevailing environment and the impact of the prevailing environment on the inhabitants of the municipality. It also facilitates the identification and analysis of the environmental challenges facing the Municipality and allows the Municipality to accurately come up with strategies and means to address these challenges. The municipality needs to take into consideration of various sector plans that will give directions when the municipality develops its strategic approaches.

The analysis also allows the municipality to determine its existing capacity and capability in terms of human resources available and areas requiring enforcement in terms of capacity building in order for the municipality to discharge its mandate. The analysis therefore allows the municipality to craft smart objectives and targets that are achievable and appropriate strategies or strategic approaches that will enable the municipality to turn around the situation. The overall situation will therefore allow the municipality to priorities projects (short term) that will immediately make meaningful impact on lives of immediate residents and long-term projects change the overall situation within the municipality and immediate adjacent district municipalities.

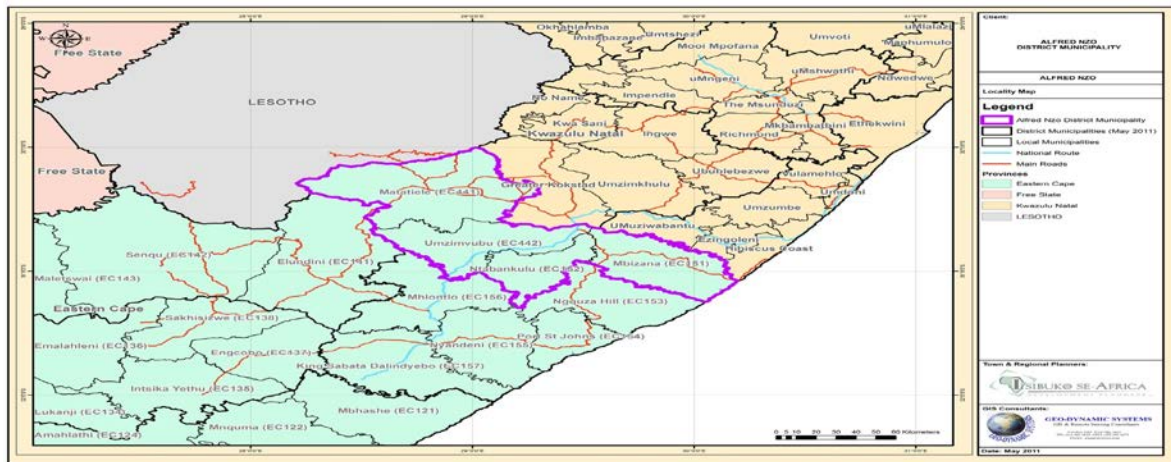

## DISTRICT OVERVIEW

MAP 1: PROVINCIAL MAP

Alfred Nzo District Municipality is situated in the North Eastern corner of the Eastern Cape Province. It stretches from the Drakensberg Mountains, borders Lesotho in the West, Sisonke District Municipality to the North and O.R. Tambo District Municipality in the East and South.

**Map 2: Locality Map sourced from ANDM SDF 2011/12**

The Municipality as a result of Demarcation processes now shares a jurisdiction with the Matatiele, Umzimvubu, Ntabankulu and Mbizana Local Municipalities. The Alfred Nzo District comprises 11119 km<sup>2</sup> and sizes of four local municipalities are summarized below:

**Table 3: Geographic composition of Alfred Nzo District**

Municipality	Area Km <sup>2</sup>	Percentage/ % of the District Area
Matatiele Local Municipality	4352	39
Umzimvubu Local Municipality	2506	23
Ntabankulu Local Municipality	1455	13
Mbizana Local Municipality	2806	25
<b>Alfred Nzo District Municipality</b>	<b>11119</b>	<b>100</b>

Population growth within Alfred Nzo has substantially increased over the years. This has been purely influenced by the changes on the administrative boundaries of the district in 2006 and recently in 2011. During the early 2000s, the district population comprised of Umzimvubu and Umzimkhulu Municipal Population. After the 2006 elections, Alfred Nzo District increased in geographical space to include Matatiele Local Municipality

which increased the area's population to 479 591 people. Umzimkhulu was moved to Sisonke District in KwaZulu-Natal. The recent demarcation following 2011 local government elections has resulted in Alfred Nzo District obtaining two additional local municipalities (i.e. Ntabankulu and Mbizana). This has further increased the area's population to approximately 900 491 people. The geographical area has also increased from 6858 km<sup>2</sup> to 11 119 km<sup>2</sup>.

Table 4: Local Municipalities and Key Towns in the District

Local Municipality	Towns
Umzimvubu Local Municipality	Mount Ayliff
	Mount Frere
Matatiele Local Municipality	Matatiele
	Maluti
	Cedarville
Ntabankulu Local Municipality	Ntabankulu
Mbizana Local Municipality	Bizana
<b>TOTAL</b>	<b>07 Towns</b>

The District falls within the Umzimvubu River Basin. The terrain is largely mountainous and extends to more than to 1000m above sea level and rises to the Drakensberg on the border of Lesotho. On average the altitude ranges between 700-800m above sea level. It has steep river valleys. The northern areas below the escarpment have extensive wetlands which are not fed by flowing water or rivers<sup>1</sup>. Rainfall is relatively high at 900-

1500 mm annually and increasing near the escarpment) with excellent agricultural soils near the rivers. The Alfred Nzo District Municipality is predominantly mountainous in the eastern and central areas with large tracts of grasslands in the north-western section.

The municipal area is predominantly rural with large number of villages scattered across the district. The N2 highway between Kokstad, located in Sisonke District Municipal area and Mthatha transects the most central part of the district. This route serves as the main linkage road from Kokstad through the central section of OR Tambo District Municipality to East London. Kokstad is some 37km from Mount Ayliff and 80km from Matatiele, and serves as an important commercial linkage town which is located outside of the Alfred Nzo District Municipality.

The district economy is characterized by limited formal economic activity and high dependency on the public sector for employment and social grants. Its proximity to the more developed towns of KwaZulu Natal such as Kokstad results in consumer spending leakage of funds out of the district into Sisonke District Municipal area and the Ugu District municipal area. This scenario has resulted in the district municipality embarking on a project of undertaking District Economic Leakage Analysis which shall inform the municipal strategic approach to turn around the situation in terms of getting its economy base increased through circulation within.

The population of Alfred Nzo is unevenly distributed amongst the four local municipalities. Mbizana has the highest population such that approximately 31% of the people within the district reside within it. This is followed by Matatiele which accommodate approximately 28% of the population. A substantial amount of the population also resides within Umzimvubu as well such that approximately 25% of the district population accounts for Umzimvubu population. Ntabankulu accounts for 16% of the population which implies that it is the area with least population within Alfred Nzo.

# 1. ENVIRONMENTAL ANALYSIS (INTERNAL AND EXTERNAL)

## 1.1. DEMOGRAPHIC ANALYSIS

### 1.1.1 Population and population density

According to the 2007 Community Survey conducted by Statistics South Africa the total population of the Eastern Cape Province is 6, 527 746 people. The following table provides a breakdown of the population per district.

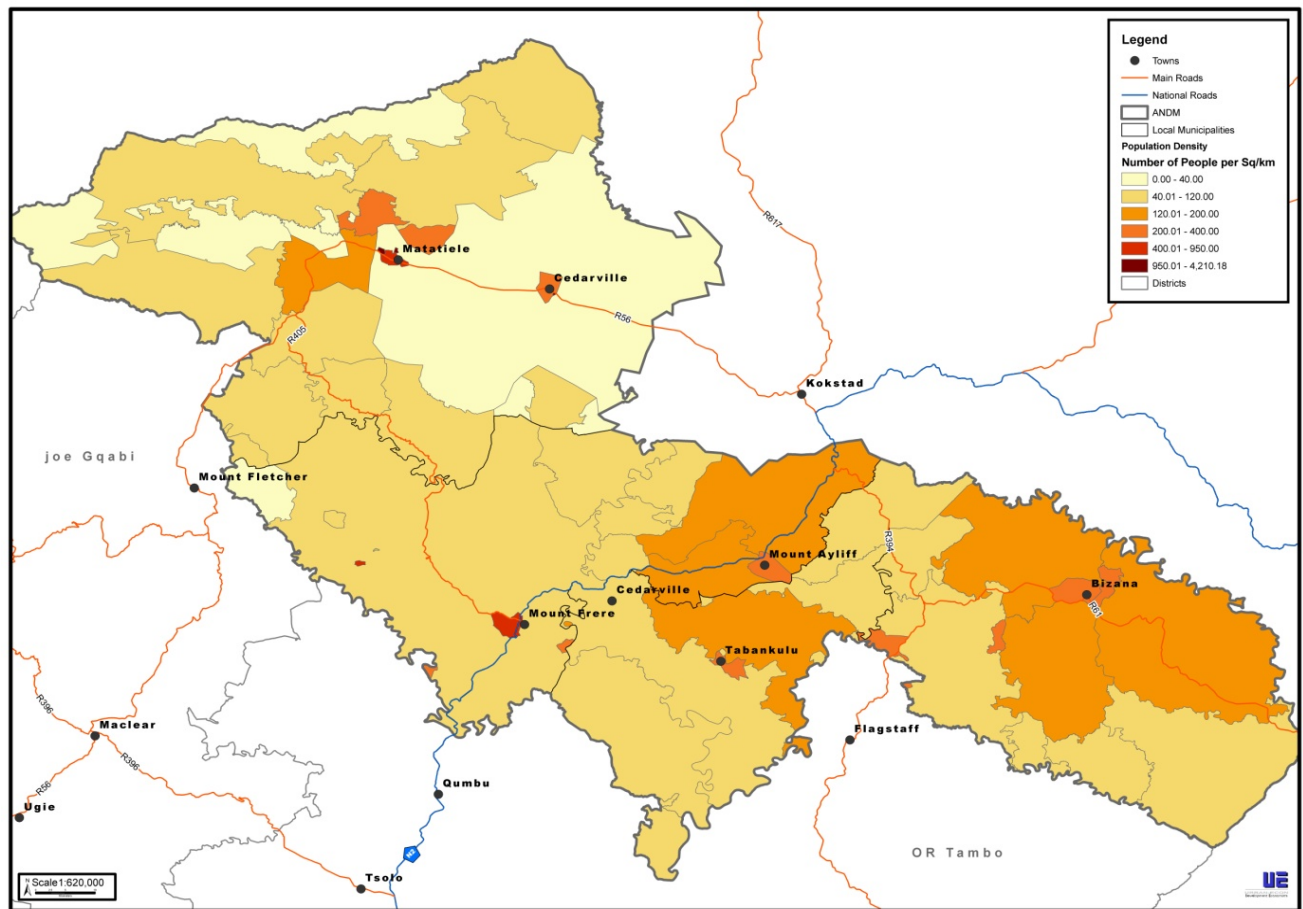

**Table 5: Population per district**

District Municipality	District population	Overall Percentage
Cacadu	363 493	5.7
Amathole	1 664 749	25.5
Chris Hani	798 600	12.1
Ukhahlamba	308 364	4.7
O.R. Tambo	1 441 123	22
<b>Alfred Nzo</b>	<b>900 491</b>	<b>14</b>
Nelson Mandela Metro	1 050 927	16

<b>Total</b>	<b>6 527 745</b>	<b>100</b>
--------------	------------------	------------

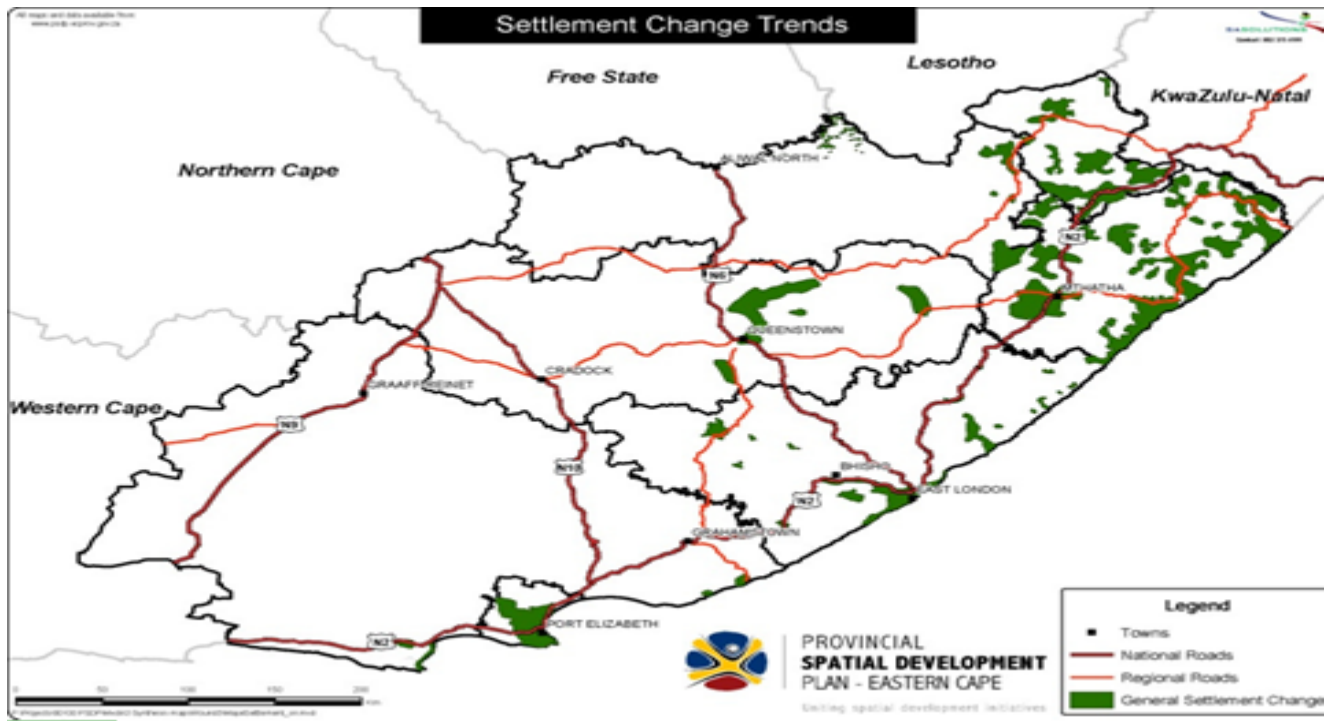

Source; Statistics South Africa Community survey 2007

The Alfred Nzo District now has a total population of 900 491 (as a result of changes) which accounts for 14% of the Provincial population, however other data sources indicate that the population of the district is above 910 000 people. Matatiele Local Municipality has a total population of 258 758 which constitutes 29% of the total district population; Umzimvubu Local Municipality has a total population of 220 636 which constitutes 24% of the total district population, Mbizana Local Municipality has a total of 279 739 which constitutes 31% of the total district population and Ntabankulu Local Municipality has a total population of 141 358 which constitutes 16% of the total district population. Statistically the situation indicates an average of 5 persons per households. Statistically, the population density of the district is low which implies that there is a lot of land not occupied by residential or any other physical development. The average population density for the district is approximately 81 people per square kilometre. The population density of Matatiele Local Municipality is 59 people per square kilometer; the population density of Umzimvubu Local Municipality is 88 people per square kilometer; the population density of Mbizana Local Municipality is approximately 100 people per square kilometer and the population density of Ntabankulu Local Municipality is approximately 97 people per square kilometre. Matatiele Local Municipality therefore has a significantly larger area than all other three local municipalities.

**Map 3: District Population Density-sourced from Economic Leakages Analysis Study 2011/12**

The recently reviewed Provincial Spatial Development Plan (2010/11) indicates that the population of the Eastern Cape is expected to grow with approximately 450 000 in the next 15 years. While the indication is based on the provincial estimated growth, it is further highlighted that the growth will be possible influenced by migration of people within the province combined with increasing birth rate to some extent. The current migratory trends appear to indicate the majority of these people will be living in the coastal belt and central to the eastern region of the Province where Alfred Nzo DM is located. This scenario requires proper long-term planning especially in terms of infrastructure development and spatial planning to cater for such future growth.

Map 4: Settlement Change Trends Source: EC PSDP, 2010

### 1.1.2 Gender distribution

The Alfred Nzo population is predominantly female. Females constitute 54. % of the population while males constitute 45% and this is a replica of the previous situation before the incorporation of Mbizana and Ntabankulu Local Municipalities. Municipal planning must take cognisance of this gender balance and the Municipality acknowledges this through inclusion of the needs of women and gender issues in its programmes for special groups. This approach by the district municipality is in line with Global approach on meeting Millennium Development Goals by 2014.

Figure 1: Gender Distribution

Source: Statistics South Africa: Community Survey 2007

### 1.1.3 Age distribution

At Provincial level 69% of the population are under the age of 35 years and considered to be youth. Community Survey 2007 indicates that the population of Alfred Nzo District Municipality is youthful as more than 75% of the total population falls below the age of 35 years. Approximately 47% of the total population falls between 0-16 years of age which indicates that more youth is still dependent and possibly still attending schools. The situation can be attributed to possible population high growth rate and a low proportion of older people where people older than 65 years of age only constitute 13% of the total population. This scenario of possible high population growth rate and youthful population requires that more efforts are directed towards education and job creation which has topped the priorities list both National and Provincial Priority Programmes.

The potentially economically active population (16 - 65 years) constitutes 40% of the population. Municipal planning must take cognisance of the predominantly youthful population and the Municipality acknowledges this through inclusion of the needs of children and youth issues in its programme for special groups. This approach by the municipality is in line with one of Millennium Development Goals.

**Figure 2: Age Distribution**

Source: Statistics South Africa: Community Survey 2007

The high proportion of dependent youth in the district implies a higher burden on the economically active population. Given that a high percentage of the economically active population is not economically active this burden shifts to organs of state and places a higher burden on municipalities and government departments such as Social Development, Health etc.

#### 1.1.4 Racial distribution

The population of Alfred Nzo is predominantly African. African people constitute 99.4% of the total population while the remaining population groups constitute only 0.6% of the total population.

**Figure 3: Racial Distribution**

Source: Statistics South Africa: Community Survey 2007

### 1.1.5 Disability profile

Within the Alfred Nzo District, there are people with different types of disabilities. Approximately 4% of the district population suffers from some form of disability. An analysis of the most predominant types of disability revealed that the majority of people with disabilities have physical disabilities which is 38%; 17% emotional disable; 16% having hearing challenges; 10% are intellectual affected; 9% having sight problems. Only 3% of people with disabilities have multiple disabilities. Municipal planning must take cognisance of the needs of people with disabilities and acknowledges this through inclusion of people with disabilities in its programme for special groups.

**Figure 4: Disability Breakdown**

Source: Statistics South Africa: Community Survey 2007

## 1.2 SOCIO ECONOMIC PROFILES

The Alfred Nzo District is characterised by some poor socio economic conditions and low levels of development which is not an uncommon trend in the region.

### 1.2.1 Indicators of economic performance

The table below shows the total Gross Value Adding (GVA) of the district relative to that of other districts in the province. Alfred Nzo is the least significant contributor to the provincial GVA, contributing less than 1% of the province's GVA.

**Figure 5: Sector Contributions to the District Economy**

Source, Community Survey 2007)

The district local economy is heavily reliant on the Community Services sector which contributes 28% of the Gross Value Adding (GVA) in the District. This includes salaries and wages for government employees such as office workers, nurses, teachers and doctors.

The second highest contributor to the District's economy is Wholesale / Trade (15% of GVA). This sector is underpinned by the public sector based expenditure through government employment and social grants.

The third highest contributor to the District's economy is Agriculture (12% of GVA) and Manufacturing being the fourth highest contributing 10% to the district economy.

The contribution of the other sectors is very limited with construction contributing only 6%; transport contributing 4% and transport sector contributing 6.4%. This is a reflection of a relatively large number of informal taxi operators in the area.

### 1.2.2 Income levels

Income levels within the District area are very low. Only 6.6% of the economically active population has an income of more than R1601.00 per month. The majority of the people within the district are having income that is less than R800 per month. Municipal planning needs to focus strongly on local economic development initiatives that will enable the community to generate an income.

**Figure 6: Income levels**

Source: Statistics South Africa: Community Survey 2007

The absence of a higher income earning class limits the growth potential of the District in that it is this category that usually offers the necessary intellectual and financial capital to support growth.

### 1.2.3 Poverty levels

Increasing levels of absolute poverty have been recorded in the Eastern Cape and 74% of the people of the Eastern Cape live below the poverty line of R800 or less a month). Poverty levels vary according to district but in Alfred Nzo 40.4% of the population live below the poverty line. High poverty levels imply a high dependency on social assistance in the form of grants. Municipal planning needs to focus strongly on poverty alleviation mechanisms.

### 1.2.4 Employment levels and trends

The Alfred Nzo District is characterised by low levels of employment and a high percentage of people who are not economically active. This in turn accounts for the high poverty levels and low income levels. High unemployment rates impact negatively on municipalities as low affordability levels result in a poor payment rate for services.

For the purposes of this section, people's employment status may be categorised as employed, unemployed and not economically active. These statuses may be defined as:

- **Employed** being people who have within the last thirty days performed work for pay.
- **Unemployed** are those people within the economically active population who: are not working; want to work and are available to start work immediately; and have taken active steps to look for work or to start some form of self-employment.
- **Not economically active** i.e. a person who is not working, not seeking work and not available for work

The labour force participation rate is also very low with only 30.2% of the population of working age (aged 15 to 64) either employed or seeking employment. This is nearly half the national average and 50% of the provincial average.

This points to the fact that a very large portion of the potentially economic active people in the district do not seek employment because they hold no hope for being employed or they view themselves as unemployable due to low levels of skills. The following figure provides an overview of employment levels at district level.

**Figure 7: Employment levels Alfred Nzo District**

Source: Statistics South Africa: Community Survey 2007

This trend is broadly reflected at local level with Mbizana Local Municipality having a higher percentage of employment at 34% followed by Matatiele Local Municipality having 25% employed population and Mbizana and Umzimvubu Local Municipalities both having 22% of employment. Both Ntabankulu and Umzimvubu are having a slight higher percentage 18% of unemployment compared to the other two local municipalities. All four local municipalities are having above 56% of population categorized as uneconomical active which is the same reflection at a district level. The following figures provide an overview of employment levels at local level.

**Figure 8 : Employment levels Umzimvubu Local Municipality**

Source: Statistics South Africa: Community Survey 2007

**Figure 9: Employment levels Matatiele Local Municipality**

Source: Statistics South Africa: Community Survey 2007

**Figure 10: Employment levels Ntabankulu Local Municipality**

Source: Statistics South Africa: Community Survey 2007

**Figure 11: Employment levels Mbizana Local Municipality**

Source: Statistics South Africa: Community Survey 2007

A defining trait of the Alfred Nzo district is the large percentage of the population classified as not economically active. All of the municipalities registered average 60% of their working-age populations as not being economically active.

This is indicative of perceptions of limited opportunities for gainful and permanent employment in the district leading to worker discouragement. These perceptions may be formed by factors including:

- Skills mismatch (given the educational profile of the district)
- Large percentage of the population that is classified as new entrants into the labour market (given the youthful demographic profile of the district)
- Barriers to entry into the job market (technical, geographic and financial)
- Low wages in the district in comparison to wages commanded in other districts and provinces.

The Eastern Cape Province derives income from basically three sectors:

- ⇒ The primary sector made up by agriculture, forestry and fishing industry
- ⇒ The secondary sector dominated by transport, construction, food industry, and wholesale industry.
- ⇒ The tertiary sector dominated by community and public sector services.

On Provincial level employment is dominated by the tertiary sector. This is reflected in the Alfred Nzo District where the public sector or community services accounts for the majority of specified jobs (27%). This sector is an unlikely base for employment expansion.

**Figure 12: Employment by Sector**

Source: Community Survey 2007

As can be expected, the Community Services sector is the largest employer in the District (27%). This is followed by employment in the Wholesale sector which is 15%. The third highest employer in the District is the Agricultural sector at 12% of total employment. This underscores the importance of agriculture as a job creator despite the fact that this sector's contribution to the District economy is very limited.

### 1.2.5 Dependency on social grants

The Alfred Nzo District to some level is dependent on government grants to support the welfare of its population. A total of 314 489 people or 36 % of the population in the district are dependent on social grants:

**Table 4: Number of grants per municipality**

Municipality	Grants	Population	Percent
Umzimvubu	79 789	220 631	36.16%
Matatiele	80 493	258 758	31.11%
Mbizana	100 585	279 739	35.95%
Ntabankulu	53 622	141 358	37.93%
Alfred Nzo DM	314, 489	900 486	35.92%

Source: Statistics South Africa: Community Survey 2007

**Table 5: Breakdown of grants in each local municipality**

Municipality	Old age pension	Disability grant	Child support grant	Care dependency grant	Foster care grant	Grant in aid	Social relief	Multiple social grants	Total
Umzimvubu	20.87%	7.43%	68.65%	1.26%	0.15%	1.38%	0.00%	0.26%	100.00%
Matatiele	22.59%	5.64%	69.02%	1.37%	0.06%	0.86%	0.31%	0.16%	100.00%
Mbizana	17.38%	4.76%	75.87%	1.13%	0%	0.50%	0.21%	0.12%	100.00%
Ntabankulu	19.37%	4.98%	71.78%	1.20%	0.23%	1.90%	0%	0.50%	100.00%
Alfred Nzo DM	26%	8%	63%	2%	0%	1%	0%	0%	100 %

Source: Statistics South Africa: Community Survey 2007

Most grants are child support grants (63%) followed by people receiving old age pensions (26%). The number of people receiving disability grants is low at 10,466 considering that approximately 8/% of the population, approximately 32 585 has at least one form of disability<sup>2</sup>.

The table above points to the fact that there is little regional variation in the pattern of support grants between local municipalities in the District. According to South African Social Security Agency beneficiary report (Oct 2011) indicates that beneficiaries of grants within the district stood at 247 970 and at estimated monthly cost of R157, 409, 659.00 which varies month to month which mostly increasing.

### 1.2.6 Education

Alfred Nzo is characterised by low education and literacy levels. 8 % of the population has no education while 53% have only some form of primary school education. Only 14.2% of the population have completed grade 12. Only 4% of the population has attained any higher qualification. The following figure represents the highest levels of education attained by the population over 20 years of age as at 2007

**Figure 13: Education levels (persons over 20 years)**

Source: Statistics South Africa: Community Survey 2007

A comparison of education levels within the same age group reveals similar trends with some variation between districts. The number of persons with no schooling in Umzimvubu Local Municipality is significantly higher than persons with no schooling in other three Local Municipalities. The number of people completing Grade 12 is lower in Ntabankulu Local Municipality than any other three Local Municipalities. The numbers of persons completing post matric qualifications is however higher in Umzimvubu Local Municipality than in other three Local Municipalities.

The Department of Education is responsible for Education services and is actively endeavoring to improve education facilities. Its priority areas include;

- ⇒ Eradication of mud structures
- ⇒ Schools that need fencing
- ⇒ Schools that need toilets
- ⇒ Schools that need major renovations
- ⇒ Schools that need water

- ⇒ Schools that need electricity
- ⇒ Schools that need extension
- ⇒ Early Childhood Development Centres

There are 833 schools within Alfred Nzo District. These include the primary, secondary and combined schools which are spread amongst different settlements within the local municipalities. An application of planning standards for education facilities suggests that 1 primary school should be provided per 600 households and 1 secondary school for every 1200 households. The application of these planning standards can be illustrated on the table below:

Table 6: State of educational Facilities

<b>LOCAL MUNICIPALITY</b>	<b>Primary School</b>	<b>Combined School</b>	<b>Secondary School</b>	<b>Total existing</b>	<b>Total required based on standards</b>
<b>Mbizana</b>	87	122	21	230	121
<b>Ntabankulu</b>	54	76	12	142	70
<b>Umzimvubu</b>	60	179	29	268	120
<b>Matatiele</b>	73	105	15	193	135
<b>Alfred Nzo DM</b>	<b>274</b>	<b>482</b>	<b>77</b>	<b>833</b>	<b>446</b>

Issue of school provision within the district and province at large remains a challenge in terms of number of schools available to cater for the available population. The provincial trend shows that there is a high number of children entering school at Grade 1 level however only a few that reaches Grade 12 and tertiary institution. This is a major concern and it shall not be solely a responsibility for Department of Education it is a societal issue that requires all society structures to play a role in addressing this problem.

### **1.2.7 Health**

The Eastern Cape Department of Health is responsible for the provision of Health Services in the Municipal area. Health Services incorporate awareness, prevention, curative and rehabilitative services.

There are 7 hospitals, 1 Community Health Centre and 65 clinics that exist within Alfred Nzo District. The Department of Health also provide health services within the district through mobile clinics to ensure that all residents have access to health services as enshrined within the Constitution of the Republic. Existing Health Facilities within the district are summarised as follow: of these planning standards can be illustrated as follows:

Table 7: State of Health Facilities

<b>LOCAL MUNICIPALITY</b>	<b>CLINICS</b>	<b>HOSPITALS</b>
Mbizana Local Municipality	18	2
Ntabankulu Local Municipality	8	1
Umzimvubu Local Municipality	20	2
Matatiele Local Municipality	19	3
<b>Alfred Nzo DM</b>	<b>65</b>	<b>8</b>

The table above indicates that the area of Alfred Nzo is encountering a substantial amount of backlogs with regards to the provision of health facilities. Based on the planning standards there are 29 additional clinics that are needed in order to meet the requirements. There are eleven additional hospitals which should be built in order to meet the standards.

There remain significant challenges in the provision of health services including;

- ⇒ The provision of facilities falls short of the Departments desired norms of providing all inhabitants of the municipality with access to at least a primary health care facility within a radius of 5Km that have the capacity to serve between 8000 -12000 people. This is largely attributable to the rural nature of the area.
- ⇒ All facilities are short staffed and the vacancy rate is on average of 60%. This is attributable to a high staff turnover and a lack of suitable affordable accommodation for staff

- ⇒ Clinics are unable to render the full range of services at this stage and many are hampered by a lack of communication with no telecommunication network within the area.
- ⇒ Some clinics are underutilized and this is primarily attributable to the perception that the aim of clinics is to provide curative and not preventative services.

#### **1.2.7.1 HIV /AIDS PREVALENCE IN THE ALFRED NZO DISTRICT**

HIV&AIDS continues to pose a major challenge for the people of South Africa and the Eastern Cape. According to the Department of Health, the HIV/AIDS infection rate has stabilized in the Alfred Nzo District. HIV/AIDS nevertheless remains a challenge and the Department is actively concentrating on the management of antiretroviral treatment of infected people. There is a high level of Tuberculosis in the region which is commonly associated with HIV/AIDS and the Department is also focusing its attention on the management of TB. Municipal planning must take cognisance of the needs of people infected and affected by HIV/AIDS. The Municipality has developed an HIV/AIDS strategy (attached as part of sector plans) and established a District AIDS Council.

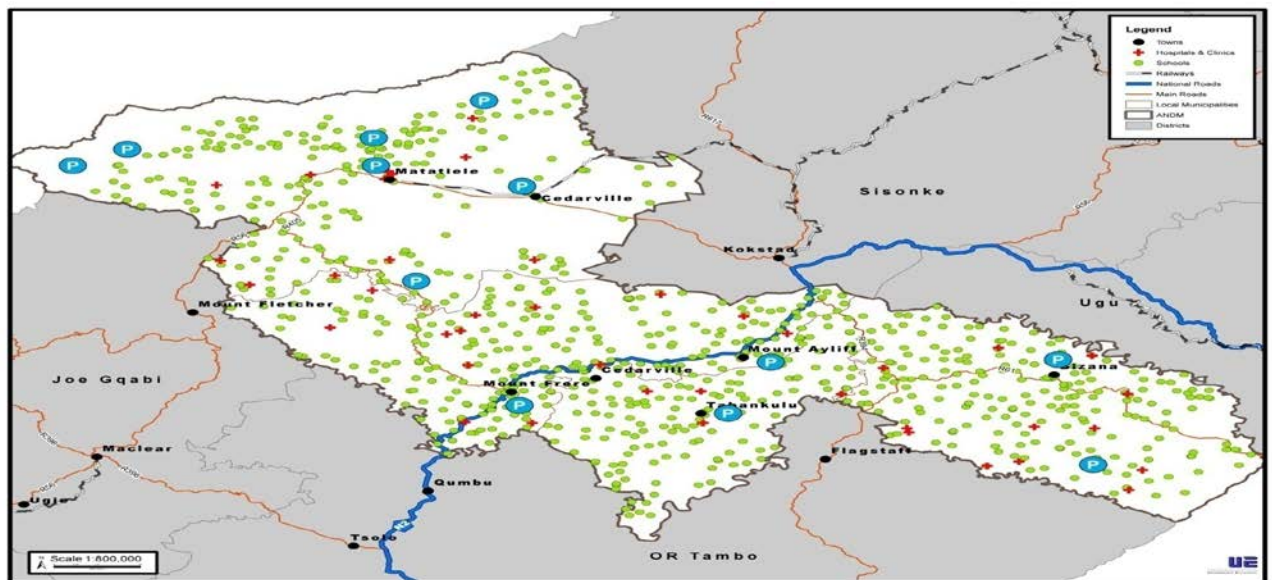

#### **1.2.8 Safety and Security**

Safety and security function within the district is performed by the Department of Safety and Security. There are 15 police stations that exist within Alfred Nzo District. Matatiele Local Municipality has a high number of Police Stations which is currently served by 8 stations, Mbizana served by 4 stations and Umzimbumbu and Ntabankulu are served by 2 and 1 respectively. The current picture indicates that there is need for additional police stations within the district considering the population and the formation of settlements where they are dispersed across the district.

The majority of district crime is of a non-serious nature such as assault and burglary. In urban areas, crime is driven by traffic violations (e.g. unlicensed vehicles), delinquency (e.g. public drinking by the youth) and the build form of towns (e.g. areas without street lighting). In rural areas crime is driven by poverty (e.g. stock theft) and communal disputes. In terms of stock theft, Matatiele Local Municipality is most affected due to its location sharing borders with Lesotho where a lot of reported stock theft indicate the involvement of people from Lesotho.

**Figure 14: Location of education, health and police facilities in the district**

### 1.3 SPATIAL ANALYSIS

This section provides an analysis of spatial and household data.

#### 1.3.1 Households

According to the Statistics South Africa Community Survey 2007, there are 178 394 households in the Alfred Nzo District, of which 47803 are in Umzimvubu Local Municipality; 54208 in Matatiele Local Municipality; 48408 in Mbizana Local Municipality and 27930 in Ntabankulu Local Municipality.

### **1.3.2 Settlement Patterns**

The district is predominantly rural. The majority of land within the district is covered by dispersed low density traditional settlements, with the exceptions of some areas in the north and north east and around Mount Frere in the south.

There are seven urban centres. The primary urban centres are;

- ⇒ Mount Ayliff
- ⇒ Mount Frere
- ⇒ Matatiele
- ⇒ Ntabankulu
- ⇒ Bizana

Secondary urban centres include Maluti and Cedarville.

The majority of the population is rural with 94% of the population residing in rural areas. The settlement pattern and typologies that exists within Alfred Nzo are a result of past apartheid policies on separate development and segregation. It is divided into four categories which are:

- Urban settlement mainly occurs in small towns of Matatiele, Cedarville, Mount Frere, Mount Ayliff, Ntabankulu, Bizana Town as well as the former R293 townships which are Maluti.
- Peri-urban settlements which are very dense rural settlements that are located within close proximity to the urban settlements/ small towns. These settlements tend to function like the suburb of the larger urban concentration and are commonly associated with urban poverty.

Dispersed rural settlements spread unevenly in space with the majority occurring to the south east of Mbizana. Subsistence farmlands surround the rural settlements in the typical resettlement program style.

Rural villages accommodate some of the dispersed rural settlements. These reflect the spatial impact of the betterment planning/ resettlement system and customary practices in land allocation.

**Figure 15: Settlement patterns**

Source: Community Survey 2007

### **1.3.3 Tenure and land ownership**

According to the Statistics South Africa Community Survey 2007, 93% of people own their homes. The Municipality faces numerous challenges in terms of security of tenure. The nature of the traditional settlements which constitute the majority of the district provide little in the form of secure tenure and there is a high prevalence of land claims which are being processed very slowly.

The prevalence of land claims has a crippling effect on the development opportunities and economic opportunities in the District and hampers housing delivery. The process for settlement of claims is rather slow within the district considering that out approximately 146 claims within the district, only one claim (in Matatiele LM) has been

resolved and others still at negotiation stage and others still awaiting further research. The existing situation has a major negative impact on the development within the district and this can be attributed to the situation where land in which certain towns are situated are under claim for example Mt Ayliff and Mt Frere.

Though the District Land Claims Committee was established it is however not functional and with new developments (incorporation of two LMs) it needs to be revived and its mandate be reviewed as well. Initial mandate of the said committee is summarized as follow:

- ⇒ To liaise and engage with Land Claims Commission, then Department of Land Affairs now called Department of Rural Development and Land Reform (DRDLR), the Deeds Office and beneficiary communities.
- ⇒ To acquire or develop comprehensive information on land ownership data
- ⇒ Urgently conduct a Land use and management audit, and
- ⇒ Liaise with the Department of Land Affairs to conduct workshops within the district municipality pertaining to the Land Act, land rights and other related issues.

The committee needs to operate in close consultation with various stakeholders such as Traditional Leaders or Councils, farmers etc. Furthermore the committee should work closely with local municipalities by providing support when municipalities conducting their land audit processes.

#### **1.3.4 Land Development Administration**

The urban areas (i.e. Matatiele, Ntabankulu, Mount Ayliff, Mount Frere and Bizana town) within Alfred Nzo District appears to be the only areas that has a duly established and enforceable town planning schemes. Most schemes have not been reviewed regularly (every five years), and are based on the outdated spatial planning approaches of the

apartheid era. There are few urban settlements that were established in terms of the Development Facilitation Act and have land use controls approved as part of the process.

A land tenure upgrading project is being initiated in Maluti and it will assist the municipality to step towards developing a land use scheme for that area. This creates challenges to the municipalities in terms of enforcing co-ordinated and holistic land use within various parts of the municipal areas. Therefore a need exists for the municipalities to prioritize on the development of the land use scheme for the entire municipal areas.

Land use management within rural villages (“ezilalini”) is embedded within the land administration and land tenure systems through which a bundle of rights is allocated to each household. Colonial and apartheid governments introduced a PTO system and issued proclamations. The latter are equivalent to legislation and have not been repealed. PTO’s were issued for a residential site and an arable land (demarcated by Department of Agriculture). It also implies livestock grazing right within the Administrative Area. The legislation is now the responsibility of the National Department of Rural Development and Land Reform but in effect it is not administered.

#### **1.3.5 Housing development**

The majority of residents within the district reside in traditional dwellings that are made of traditional materials (70%). 29% have formal dwellings such as a house, flat in block town house cluster. There appears to be a low prevalence of informal backyard and squatter community dwellings (1%). Both Umzimvubu and Mbizana Local Municipalities have 29% population living in traditional dwellings where as Matatiele and Ntabankulu Local Municipalities have 23% and 19% respectively.

**Figure 16: Dwelling types**

Source: Community Survey 2007

The provision of formal housing for low income residents is a core function of provincial and national government, with local municipalities being implementing agents. There seems to be a slow progress in terms of housing development within the district. Currently there is no local municipality within the district that has been accredited by the Department of Human Settlements to perform the function of building or providing low cost houses. The department of Human Settlement has recently drafted a provincial Housing Sector Plan which will give some directions in terms of how the housing backlogs will be addressed within the province and subsequently the district of Alfred Nzo.

It can be deduced that there is a substantial housing backlog based on the percentages of people still living in traditional dwellings and informal settlements which translates to 70%. Therefore there is a dire need for rural housing programme or rollout within the district. As the district in the past years has been affected by various disasters that affected many households (where some households left homeless), there is a high backlog in terms of disaster housing rollout and that programme is undertaken or performed by the Provincial Department.

## 1.4 BIOPHYSICAL ENVIRONMENTAL ANALYSIS

### 1.4.1 Topography

The district is characterised by fragmented topography and comprises a plateau which falls within the Umzimvubu River Basin, which ranges from 800 to 1400 metres above sea level and a high plateau leading to the Drakensberg Mountains which ranges between 1500 and 2200 metres above sea level. The terrain is therefore mountainous with steep valleys. The northern areas below the escarpment have extensive palustrine wetlands (wetlands that are not connected to any river), and the extreme south (around the N2) is undulating. The topography poses a multitude of challenges to development as accessibility is limited and settlement has taken place in a dispersed and haphazard fashion.

### 1.4.2 Climate

Summer months are warm with winter months being cold with snow in high lying areas. The average minimum temperature ranges from 7 to 10 degrees centigrade in winter for 18 to 24 degrees centigrade in summer. The annual rainfall of the district is 790mm per annum. The area falls within the summer rainfall area (October to March). The District experiences climatic extremes in the form of storms, tornadoes and floods which have resulted in soil erosion and deep crevices.

### 1.4.3 Geology and Soils

In terms of a study conducted by the Agricultural Research Council (ARC), soils are mostly red-yellow apedal freely drained soils. In Umzimvubu there is a mixture of red-yellow apedal freely drained soils and plinthin catena upland duplex and magalitic soils.

Generally ANDM area is located in the grassland biome, with limited forest areas. Most of the perennial streams in the area converge to form the primary tributaries of the

upper Umzimvubu catchment, and the stream valleys are fairly steep-sided with good groundcover. The geology is predominantly cave sandstone, underlain by silt and mudstones.

Also, the undulating landscape has some flatter portions in the lower lying areas, especially in the river valleys. Soils with high erosion potential are predominant with a significant number of unstable landscapes. Pockets of bushveld thicket and aloes in the southern Umzimvubu area are common.

The climate in this summer rainfall area ranges from very pleasant warm summers to mild winters. Annual rainfall ranges between 650mm and 1100mm, with thunderstorms and hail being a common feature in summer. The Municipality is in a Malaria free area.

#### **1.4.4 Environmental Situation**

The Alfred Nzo is faced by a number of Environmental challenges and they are identified as follow:

- Poor waste management, both in urban and rural areas (referred to earlier).
- Unauthorized excavation, building construction and mining for sand and gravel that takes place in the district. It is not only the communities and the private sector who are the culprits. Many government departments undertake construction project without following correct environmental procedures. Law enforcement needs to be tightened up.
- Land degradation and soil erosion. Environmental education and training, as well as a programme for the rehabilitation of dongas are necessary to address this. Currently very little attention is being given to this matter, reportedly due to a shortage of funds.

The district municipality has managed to prepare its Integrated Waste Management Plan however it is necessary that the plan gets reviewed to reflect the current state of the

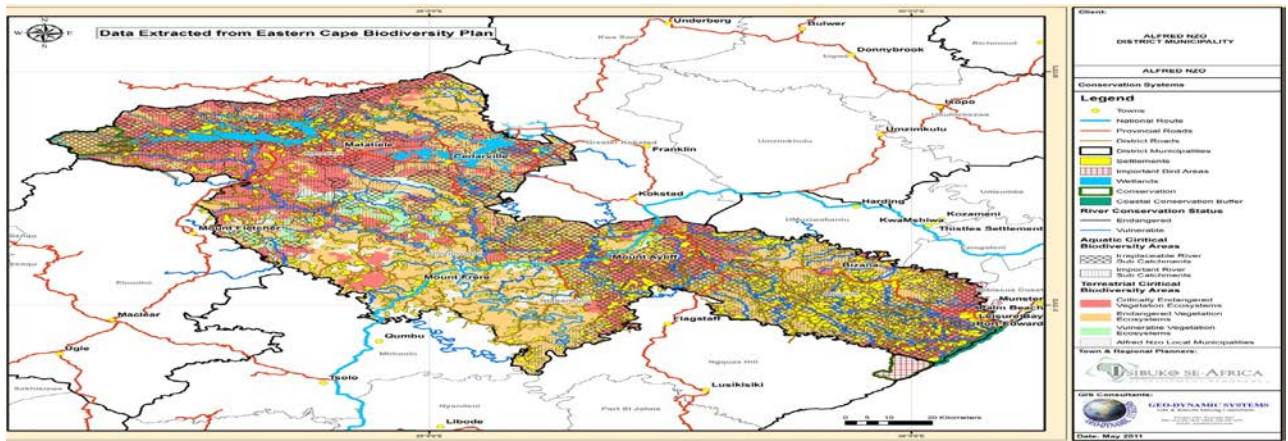

district with inclusion of Mbizana and Ntabankulu. Furthermore the district Municipality developed Environmental Management Plan which shall be reviewed to incorporate changes and considering that the district now has a coast land on the side of Mbizana and this entails further development of Coast Land Management Plan.

#### **1.4.4.1 Biodiversity**

The Eastern Cape as a whole is an ecologically important area in terms of its biodiversity value. However, pressure from land transformation in many areas including the Alfred Nzo District is impacting significantly on the natural resources base of the province. The key biodiversity issues include impact on endemic vegetation, loss of habitat, and reduction of species diversity.

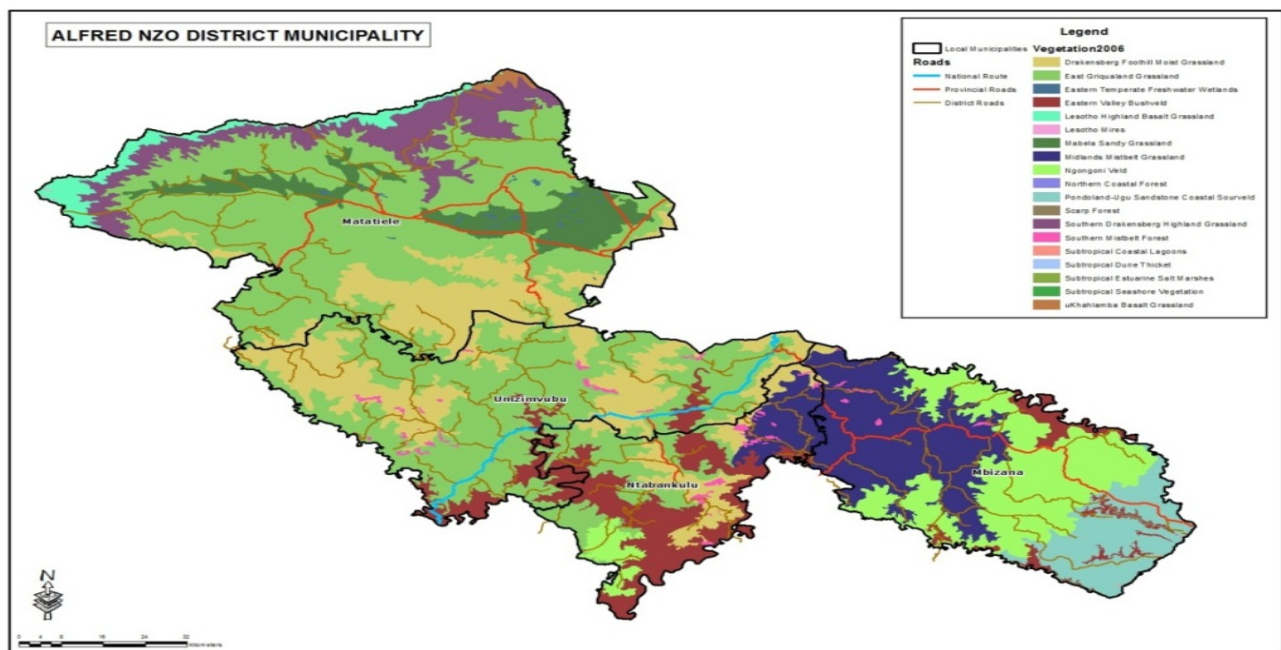

The high human population density in the communal areas of Alfred Nzo has negative impacts on biodiversity. Habitat transformation is a key driver of biodiversity change and also a useful indicator of biodiversity loss. Loss of biodiversity can also be measured by the percentage of vulnerable plant species. Alfred Nzo has 0–10% endangered plant species (endangered quarter degree coverage) and 10.01–20% vulnerable plant species (vulnerable quarter degree coverage). The northern parts of the municipality which are at high altitude fall within the Drakensberg centre of endemism which is almost exclusively in the Grassland biome. In this biome the overall endemism is around 18%. Alfred Nzo is one of the most threatened municipalities where pressures on the environment are high (especially through habitat loss), and where this overlaps with a centre of endemism, an increasing numbers of red data species are expected and ultimately extinctions. This coincides with high population densities.

Figure 17: Conservation Map-Source ANDM SDF, 2012

The most threatened of this vegetation types is the Midlands Mistbelt Grassland which occurs at the eastern section of the district west of Mbizana. As can be seen from the settlement Map in Figure 2, this vegetation type is evernely transformed through settlement and is this critically endangered. Other vegetation types that are threatened in the district are the Mabela Sandy Grassland, the Drakensburg Foothill Moist Grassland, and the Pondoland-Ugu Sandstone Coastal Sourveld. These vegetation types are severely impacted on by settlement and agriculture activities.

Figure 18: Vegetation types in the Alfred Nzo District

The mountainous character of the district has given rise to a reticulation of deeply incised valleys many of which have rivers and perennial streams. Apart from this network of rivers and streams are areas of vast wetlands (in the north west of the district) which are not associated with any stream or river systems.

Rivers emanate from the Drakensburg mountain in predominantly a south easterly direction. Major rivers include the Ntabankulu, Mbizana, and Umzimvubu. The river systems health in the district is described as being vulnerable and endangered due to poor land use and development pressures. The sources of these rivers are particularly threatened by these poor land uses and do not only impact on water quality but also affects general biodiversity (the Drakensburg Biome Centre) which is one of the important biodiversity centres in the country.

Wetlands of ecological significance are mainly found in the north western part of the district. Wetlands are important habitats for freshwater as well as terrestrial animals and are therefore protected areas under environmental legislation of the country. Alien plants have a major impact on biodiversity and are one of the major threats to biodiversity.

## 1.5 INFRASTRUCTURE DEVELOPMENT AND SERVICE DELIVERY

### OVERVIEW

Services are divided into two groups; namely infrastructural services, and community services and facilities. Services and facilities fall within the functional area of a number of different entities, but all impact on the lives of the community and are hence mentioned here.

### 1.5.1 INFRASTRUCTURAL SERVICES

#### 1.5.1.1 Water and sanitation

Alfred Nzo District Municipality is the Water Services Authority (WSA) for the area under its jurisdiction namely Umzimvubu, Mbizaba, Ntabankulu and Matatiele Local Municipalities. The Municipality has developed a Water Service Development Plan (WSDP attached as a sector plan) and currently reviewing the plan to incorporate Ntabankulu and Mbizana Local Municipality.

#### **Water Backlogs**

The district municipality has a water backlog 47% of households with no water and 9% of households having access to water below RDP standards. Mbizana and Ntabankulu Local Municipalities are the municipalities with high water backlogs in terms of households with no water estimated at 89% and 75% respectively. The situation in as far as the water backlogs is concern is summarized on a table below:

Local Municipality	Total No. of Households	Water Provision					
		Households			Percentage		
		No Water provision	Below RDP Standards	RDP and Above	No Water Provision	Below RDP Standards	RDP and Above
<b>Matatiele</b>	54,207	8,778	4,269	41,160	16.2%	7.9%	75.9%
<b>Umzimvubu</b>	47,802	10,976	5,991	30,835	23.0%	12.5%	64.5%
<b>Ntabankulu</b>	27,930	20,947	3,242	1,062	75.0%	11.6%	3.8%
<b>Mbizana</b>	48,408	43,083	2,429	1,500	89.0%	5.0%	3.1%
<b>TOTALS</b>	<b>178,347</b>	<b>83,784</b>	<b>15,931</b>	<b>74,557</b>	<b>47.0%</b>	<b>8.9%</b>	<b>41.0%</b>

Table 8: Water Backlogs-Source: Municipal WSDP

The district municipality has many stand-alone schemes and this is due to lack of big dams where various schemes will be connected. In response to high water services and redress stand-alone schemes the district municipality has conducted Regional Bulk Study.

The study has recommended the following options:

1. Kinira Dam (Matatiele)
2. Sirhoqobeni Dam (Mount Ayliff)
3. Mkemane Dam (Mount Frere)
4. Ludeke Dam (Mbizana)
5. Single Scheme-Option A or Four Wall to Wall Schemes-Option B (Ntabankulu)

The 2007 Community survey indicates a relatively low backlog for water and sanitation, but a recent survey by the District Municipality indicated that backlogs are substantially higher. Furthermore the district should try to speed up the process in order to meet national water targets which states that every households must be served or have access to proper water services by 2014.

### Sanitation Backlogs

Waterborne sanitation is only provided in urban areas. Ntabankulu and Mbizana Towns are served with Septic Tank Systems and the district municipality is working towards providing waterborne sanitation systems connected to sewer system linked to proper water system. Toilets in rural areas comprise VIP latrines. There is a rural sanitation programme in place and the bucket system has been totally eradicated. The municipality has established the following sanitation zone centres to address the backlogs in sanitation:

- ⇒ Madiba
- ⇒ Mt Ayliff
- ⇒ Mt Frere
- ⇒ Maluti
- ⇒ Nopoyi
- ⇒ Mpakamisi Mhlaba
- ⇒ Shinta

The municipality has since outsourced the implementation of VIP toilets where a total of two service providers have been appointed to assist the municipality to fast-track the process of addressing the sanitation backlogs. The situation in as far as the water backlogs is concern is summarized on a table below:

Local Municipality	Total Households	Sanitation			
		Households		Percentage	
		Served	Un-served	Served	Un-served
<b>Matatiele</b>	54,207	20,974	33,233	38.7%	61.3%
<b>Umzimvubu</b>	47,802	24,517	23,285	51.3%	48.7%
<b>Ntabankulu</b>	27,930	8,397	19,551	30.0%	70.0%
<b>Mbizana</b>	48,408	25,903	22,505	53.5%	46.5%
<b>Totals</b>	<b>178,347</b>	<b>79,773</b>	<b>98,574</b>	<b>43.4%</b>	<b>56.6%</b>

**Table 9: Sanitation Backlogs source ANDM WSDP**

The situation above shows that there is need for the municipality to speed up the process of rural sanitation rollout especially in Ntabankulu where there is a high percentage (70%) of households with no access to proper sanitation facilities followed by Umzimvubu Municipality with 61.3%. Generally there is a challenge with provision proper sanitation facilities within the district where over 56% of the households have no access to proper sanitation facilities and this situation can contribute towards increasing health hazards and could result in high disease outbreak such as cholera within the district. Furthermore the district should try to speed up the process in order to meet national sanitation targets which states that every households must be served or have access to proper sanitation facilities by 2014.

#### **1.5.1.2 Roads and Storm water**

The provision and maintenance of roads covers the functional areas of the Department of Roads and Transport and the Local Municipalities.

The Department of Roads and Transport establishes and maintains National and Provincial roads. It also contributes to economic upliftment of the area through Expanded Public Works Programmes (EPWP).

The maintenance of access roads is performed by the Local Municipalities in accordance with a directive from the Province which requires the District Municipality to concentrate on the water provision function.

The process of maintaining and upgrading roads is hampered at this stage by a lack of clarity with regards to roles and responsibilities between various roads role players. The Municipality does not have a roads infrastructure or storm water management system and maintenance is carried out as and when required. In the previous year the municipality has assisted local municipalities in the roads maintenance through provision of Plant Machines through Memorandum of Agreements.

### 1.5.1.3 Public Transport

Despite some investments in new roads and maintenance in the District many local communities remain trapped in isolated and disconnected local communities with very poor road infrastructure. This disconnection has significant consequences in terms of local economic development as well as service delivery, especially accessibility to emergency ambulance services.

Transport whether motorized or non-motorized faces many challenges within the Alfred Nzo District. These can be summarized as follow:

- ⇒ Poor conditions of roads especially rural roads and within former urban townships
- ⇒ Inadequate pedestrian signs and markings and off-loading areas especially within the few urban areas
- ⇒ Limited traffic calming measures within areas of high accidents
- ⇒ Non-availability of traffic lights, let alone at major intersections
- ⇒ Unavailability of adequate public transport facilities especially for the disabled
- ⇒ Lack of cooperation between public transport operators and the municipal authorities
- ⇒ Lack of institutional capacity at Local and District Municipal level to manage transport planning and implementation
- ⇒ Outdated/non-existent information at the taxi registrar
- ⇒ Lack of pedestrian and non-motorized transport facilities

The public transport modes providing local services in the Alfred Nzo district are taxis, buses and bakkies. Of these modes, taxis are the predominant mode by a very large margin.

Minibus-taxis provide most of the local public transport services although there are localized bus services available in some locations. The following table provides a list of taxi ranks in the primary towns within the district:

LOCAL MUNICIPALITY	NUMBER OF TAXI RANKS
Matatiele	3
Mbizana	2
Ntabankulu	3
Umzimvubu	2
<b>TOTAL</b>	<b>10</b>

**Table 10: Existing Transport facilities (Taxi Ranks) Source ANDM DITP, 2012**

There are many informal taxi ranks in the district with limited facilities for passengers such as toilets, rest areas, seating and protection against various elements.

#### 1.5.1.4 Electricity and energy

ESKOM is the licensed distributor of electricity in the majority of the municipal area with the exception of the town of Matatiele where Matatiele Local Municipality is the licensed distributor. The figure below on energy usage confirms high backlogs of electricity supply within the district.

**Figure 19: Energy usage**

Source: Community Survey, 2007

The availability of electrical infrastructure within Alfred Nzo is generally a challenge. There are instances whereby the infrastructure exists, however it requires substantial refurbishment due to a lack of sufficient capacity and there are areas where the bulk electrical infrastructure does not exist at all. Ntabankulu is an example of this such that the municipal area does not have a substation of its own, it is dependent on network breaker lines from the substations that originate from other municipalities. These include Mzintlava Network breaker 13 which originates from Mzintlava substation in Mount Ayliff (Umzimvubu).

There is also Siphaheni Network breaker 96 which originates from a substation in Nqguza Hill Municipality as well as Mount Frere Network breaker 22 which originates from a substation in Umzimvubu. Ntabankulu is considered to be the area with the massive backlogs in terms of bulk infrastructure. This is particularly the case with the areas that were classified as rural homelands since these were not a priority for infrastructure in the past. However, Eskom and the Department of Minerals are trying to address this by allocating funding to develop infrastructure within these areas.

The bulk infrastructure that exists within Mbizana includes Ludeke Substation which is found in Ludeke settlement and it is currently being upgraded. Another substation which is also being upgraded is Zwelethu substation. There are a number of network breaker lines that exist some of these are being upgraded and can be outlined as follows:

- Esiphaqeni/ Esiphaqeni Network Breaker 95 –is being upgraded from O.R.Tambo
- Port Edward Network Breaker 32 will only be completed once Zwelethu substation has been upgraded.
- Marina Beach Network Breaker 76
- Ludeke Network Breaker 44 which is a line from Ludeke substation which moves past the town of Mbizana.

- Ludeke Network Breaker 45 is the line found along and supplies the settlements in close proximity to the river.
- Ludeke Network breaker 46 is the line found along Ntsezi and Kwantshangase areas.
- Magwa Network breaker 36 – this originates from a substation in O.R. Tambo District.

According to Eskom when both substations have been upgraded and network break lines are complete Mbizana will be sufficient capacity for electrical infrastructure. There are two existing substations within Umzimvubu and these are Mzintlava substation which is located in Mount Ayliff and Mount Frere substation which is located next to the town of Mount Frere.

There is another substation that is currently under construction next Mzintlava substation and this is undertaken in order to accommodate other areas that are not covered by the existing substation. When this substation is complete Mount Ayliff will be covered sufficiently. Mount Frere Substation is currently being upgraded and it will be inclusive of Mount Frere Network Breaker 20 which will supply electricity to Njijini, Buffalo Flats and Mount Ayliff settlements.

This substation has an existing line called Mount Frere Network Breaker 22 which supplies the areas such as Ngcagweni. There are two network breakers that originate from Kokstad substation and these are Kokstad Network Breaker 1 and Kokstad Network Breaker 3 and these supplies the areas within Umzimvubu (e.g. Brooks Nek and Cabazane). There is also a proposed substation which is called Makhawula sub-station. Once the proposed infrastructure is complete then Umzimvubu will have sufficient infrastructure.

Matatiele has four substations which are found in Matatiele Town, Cedarville, Maluti and Mzongwane. Matatiele Substation is located next to the town and it has a line called Matatiele Network Breaker 31. This line does not assist a lot since it does not supply settlements but few farms. Cedarville substation is currently being upgraded. This substation also supplies Mvenyane and there is also a line which supplies few farms and houses but it does not have capacity to accommodate any new connections.

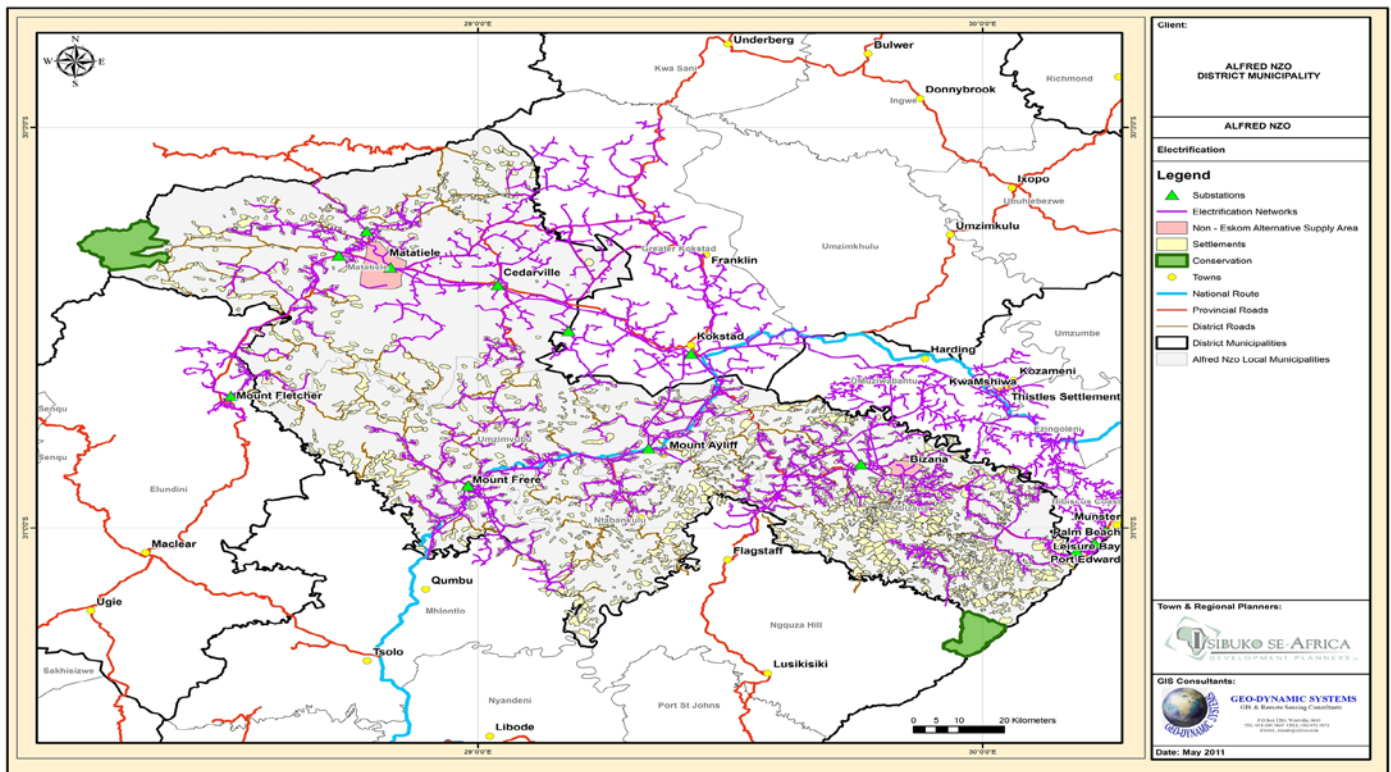

Rams substation is located in Maluti. It has five lines which are Rams Network Breaker 46, 47, 48, Maluti Network Breaker 6 and 17. These lines supplies the inland villages. Rams Network Breaker 48 needs upgrading since it does not have sufficient capacity. Maluti Network Breaker 6 is a currently being upgraded.

Matatiele has four substations which are found in Matatiele Town, Cedarville, Maluti and Mzongwane. Matatiele Substation is located next to the town and it has a line called Matatiele Network Breaker 31. This line does not assist a lot since it does not supply settlements but few farms. Cedarville substation is currently being upgraded. This substation also supplies Mvenyane and there is also a line which supplies few farms and houses but it does not have capacity to accommodate any new connections.

Rams substation is located in Maluti. It has five lines which are Rams Network Breaker 46, 47, 48, Maluti Network Breaker 6 and 17. These lines supplies the inland villages. Rams Network Breaker 48 needs upgrading since it does not have sufficient capacity. Maluti Network Breaker 6 is a currently being upgraded.

There is a new line called Maluti Network Breaker 17 which supplies a lot of villages. There is a proposed Maluti Network Breaker 18 which will deload the pressure that Maluti Network Breaker 6 currently experiences. There is a proposed substation within Mzongwane settlement and it is expected to cover the settlement of Mzongwane and this development will further increase the capacity within Matatiele Area.

**Map 5: Electrification Map within Alfred Nzo**

### 1.5.1.5 Telecommunication

According to the Statistics South Africa Community Survey 2007, only 30.1% of the population has a telephone or cellular phone, the latter being the most popular. The majority of the area has poor or no network coverage. Mountainous areas are particularly problematic. This lack of network was identified by the Department of Health as being a critical challenge which hampers the effective functioning of their clinics.

## **1.5.2 COMMUNITY SERVICES AND FACILITIES**

### **1.5.2.1 Environmental Health Services**

The District Municipality is authorised to perform the Municipal Health function in terms of the Municipal Structures Act and has programmes in place for the following;

- ⇒ Food safety & control
- ⇒ Waste Management monitoring and General Hygiene
- ⇒ Health surveillance of premises
- ⇒ Surveillance & prevention of communicable diseases (excluding immunization)
- ⇒ Vector control
- ⇒ Environmental Pollution Control
- ⇒ Disposal of the dead
- ⇒ Chemical safety
- ⇒ Water Quality Monitoring
- ⇒ Noise Control
- ⇒ Radiation (Ionising and Non-ionising) monitoring and control

### **1.5.2.2 Solid Waste management**

There are six landfill sites that exist within Alfred Nzo District Municipal Area. These include the two landfill sites in Umzimvubu (i.e. Mount Frere and Mount Ayliff), two landfill site in Matatiele (i.e. Matatiele Town and Cedarville), one landfill site in Mbizana (i.e. Bizana Town) and one landfill site in Ntabankulu (i.e. north of Ntabankulu Town). However the only licensed site exists within Matatiele and it came into operation in 2008.

This site has the capacity to accommodate all the waste from the urban areas for at least the next 15 years. Ntabankulu Local Municipality is planning to revive and pilot waste collection project within some of the rural areas (i.e. Isilindini, Zinyosini which are rural settlements located in Ward 2).

According to the Statistics South Africa Community Survey 2007, only 6% of households have access to a weekly refuse removal service. 79% of households make use of their own refuse dumps which implies a high level of indiscriminate dumping and little regard for the impact on the environment. 15% of households have no refuse facilities within the district.

**Figure 20: Access to waste disposal (District perspective)**

Source: Community Survey 2007

The Alfred Nzo District Municipality has managed to develop the Integrated Waste Management Plan which aims to resolve waste related challenges. The plan will have to be reviewed in the new financial year to include the two additional Local Municipalities (Mbizana and Ntabankulu). The local municipalities are responsible for waste collection in their areas of jurisdiction.

#### **1.5.2.3 Disaster management**

The District Municipality is responsible for the provision of Disaster Management and Fire Services in the District. Services are rendered from the central disaster management centre in Mount Ayliff and four satellite centres in Maluti (Matatiele); Mount Frere (Umzimvubu); Ntabankulu and Mbizabana.

The Municipality has a Disaster Management plan in place to effectively manage disasters which stem primarily from natural causes (tornadoes, storms and winds etc). The municipality conducted Disaster Scientific Risk Assessment to develop a plan however such plan needs to be reviewed considering that it only reflect on the old regime of the municipal jurisdiction and the new plan should include Mbizana and Ntabaankulu.

#### **1.5.3 Public, Social and Recreational Facilities and Amenities**

These facilities and amenities fall within the functional area of the local municipalities. There is a significant lack of adequate standard sports and recreational facilities within the District. The provision of sports and recreational facilities has been directly associated with the development of a healthy society and plays an important role in the development of our youth. The high levels of youth within the community warrant that specific attention be given to the development of sport and recreation initiatives by all Municipalities within the district and the provincial Department of Sport, Arts, Culture, and Recreation.

There are a number of Community halls within the District that are managed by the local Municipalities and availed for use by the community. These facilities vary in condition. Municipal cemeteries satisfy the existing service demand but there is urgent need to expand current capacity and ensure that all communities have access to adequate burial facilities especially around urban settlements.

#### **1.5.4 Library facilities**

Library services are a Provincial Competency that are often performed on an agency basis by the district and Local Municipalities. There is a severe lack of library facilities in the District which aggravates the low literacy and education levels within the District.

#### **1.5.5 Community Safety**

In the past, crime prevention and by implication community safety was the exclusive domain of the SAPS. The 1996 Constitution introduced a fundamental change to the role played by municipalities in the management of crime and safety in South Africa, by requiring of them to provide a safe and healthy environment for the communities within their areas of jurisdiction. The South African Police Service Act as amended made provision for the establishment of municipal police services and community police forums and boards.

Crime has the potential to impact negatively on the local economic development of the District, and for this reason it is imperative that all municipalities play an active role in ensuring the safety of their community.

As in all areas Alfred Nzo District is affected by crime. An analysis of crime tendencies at the five urban police stations revealed that the following crimes are most common

- ⇒ Assault (GBH)
- ⇒ Burglary at residential premises
- ⇒ Other theft
- ⇒ Common assault

⇒ Stock theft

## **1.5.6 ECONOMIC GROWTH AND DEVELOPMENT ANALYSIS**

### **1.5.6.1 LOCAL ECONOMIC OVERVIEW**

High unemployment and poverty levels in the district result in low affordability levels which manifest in low levels of investment, development and service delivery and underutilization of development opportunities. There is an urgent need for major new private sector investments to create jobs and improve livelihood in the District.

The predominantly rural nature of the area limits commercial and business development. Business activities in rural areas are confined to rural supply stores and general dealers. Commercial and business development in the District is confined to the urban centres of Mount Ayliff, Mount Frere, Ntabankulu, Bizana and Matitiele and to a smaller extent Cedarville. More substantial commercial and businesses activities are restricted to Kokstad which falls within Kwazulu Natal which means that a substantial portion of the districts money is not even being reinvested into the Province. The District has limited and almost non-existent industrial economy and a high dependency upon primary economic activities.

Like all regions in the Province, development in Alfred Nzo District is limited as a result of acute backlogs in social and economic infrastructure. The vast natural land, forest and water resources that exist within the district provide the basis for socio-economic development, but it is well-planned, prioritised and strategic infrastructure investments that will promote social development, and stimulate sustainable economic growth.

In terms of economic infrastructure, the priority interventions necessary are;

- ⇒ Upgrading airstrips at Mount Ayliff, Matatiele and Cedarville
- ⇒ Revival of the district rail network from Matatiele to Franklin, Gauteng and Durban
- ⇒ Factory space, trading and business premises

- ⇒ Tourism infrastructure
- ⇒ Irrigation and other farming infrastructure
- ⇒ Energy infrastructure
- ⇒ Telecommunications (fixed line and cellular) infrastructure

The Alfred Nzo District Municipality developed a Local Economic Development Strategy which aimed to identify and utilise local resources and skills to stimulate local economic growth and development however the strategy is no longer relevant due to changes in terms of district jurisdictional boundaries where it now has Mbizana and Ntabankulu Local Municipalities which are not considered within the current LED Strategy hence the municipality has planned to review its plan during 2011/12 Financial Year.

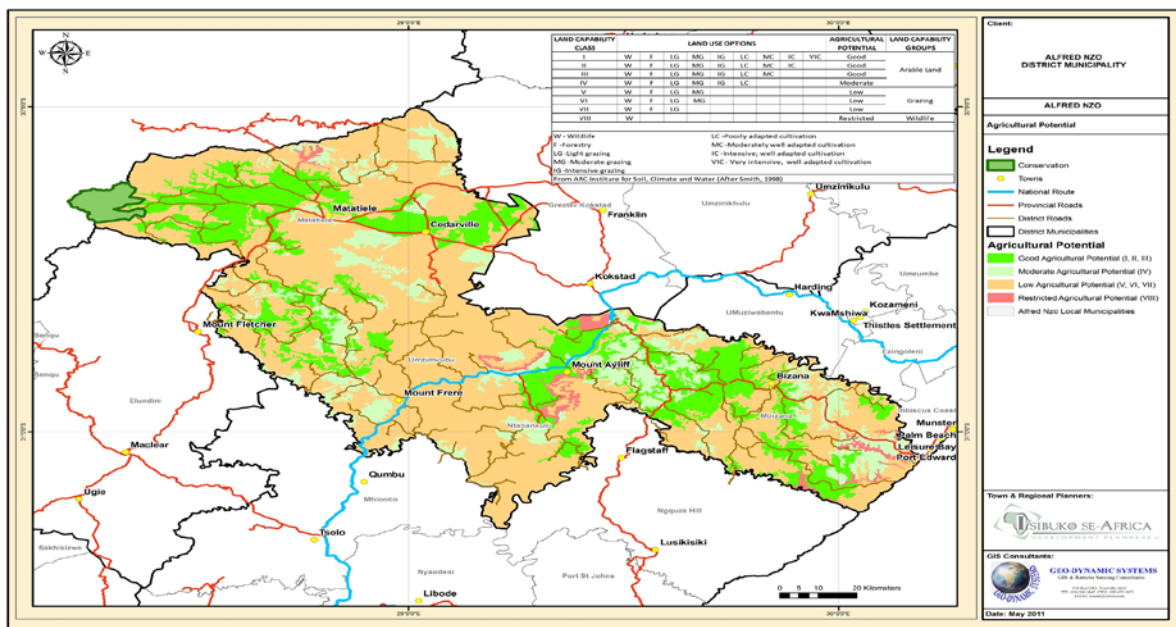

#### **1.5.6.2 SECTORAL OVERVIEW**

Based on existing economic activity, market opportunities and present resources, assets and skills bases the industries offering the most significant potential include:

- ⇒ Agriculture
- ⇒ Livestock farming
- ⇒ Crop farming and horticulture
- ⇒ Forestry
- ⇒ Manufacturing
- ⇒ Construction and Mining
- ⇒ Trade and Business Services/ICT
- ⇒ Tourism
- ⇒ SMME and Cooperative development

## 1.5.7 Agriculture

Agriculture is the main economic activity in the District. Currently it is a limited base for economic expansion due to the fact that the majority of farming is traditional subsistence farming. Commercial farming is limited to the Cedarville area in the north east of the District. The District has favourable conditions for the development of the agriculture sector and it is critical to assess the potential of this industry and devise methods of exploiting this untapped potential. The district in partnership with Eastern Cape Asgisa embarked on grain production to address high level of poverty in the area, however during the financial year 2011/12 there were financial challenges from the side of Asgisa hence not much grain plantation has taken place in the district in the form of massive food production. Furthermore input is still required in terms of education, training, management, marketing and the development of linkages.

The Department of Agriculture has the following programmes in the District;

- ⇒ Siyazondla Homestead Food Production (Green revolution)
- ⇒ Siyakhula Step Up Food production Programme
- ⇒ Massive Food programme (Matatiele only)
- ⇒ Mechanisation Conditional Grant Scheme
- ⇒ Mechanisation Conditional Loan Scheme
- ⇒ Eastern Cape Communal Soil Conservation Scheme
- ⇒ Land Care Programme
- ⇒ Soil Conservation Scheme
- ⇒ Comprehensive Agriculture Support Programme
- ⇒ Farmer Organisation Development
- ⇒ Eastern Cape Livestock Production Improvement
- ⇒ Livestock production Improvement Programme

The following ASGISA initiatives also exist;

- ⇒ ASGISA Bio fuels initiative
- ⇒ ASGISA Massive Food

Agricultural activities in the area include livestock farming (goats, sheep, beef and dairy), crop farming (dry land farming, irrigated crops and horticulture).

#### **1.5.7.1 Livestock farming**

Livestock farming, which is primarily cattle, sheep and goats is very important in the District, but generally provides very low incomes compared to commercial livestock farming elsewhere in the Province. Livestock farming is being supported by the Provincial Department of Agriculture through construction of stock dams, dipping tanks, shearing sheds, fencing (under CASP) and veterinary services etc. The challenge is to increase income from communal livestock farming. An industry action plan would probably include:

- ⇒ Expand and improve existing programmes designed to facilitate skills transfer between commercial and emerging farmers
- ⇒ Improved Agricultural Extension Services
- ⇒ Improved market access
- ⇒ Middle East goat Market
- ⇒ Building animal feeds industry
- ⇒ Improved veld management
- ⇒ Move to formal land administration
- ⇒ Upgrading access roads/farm logistics

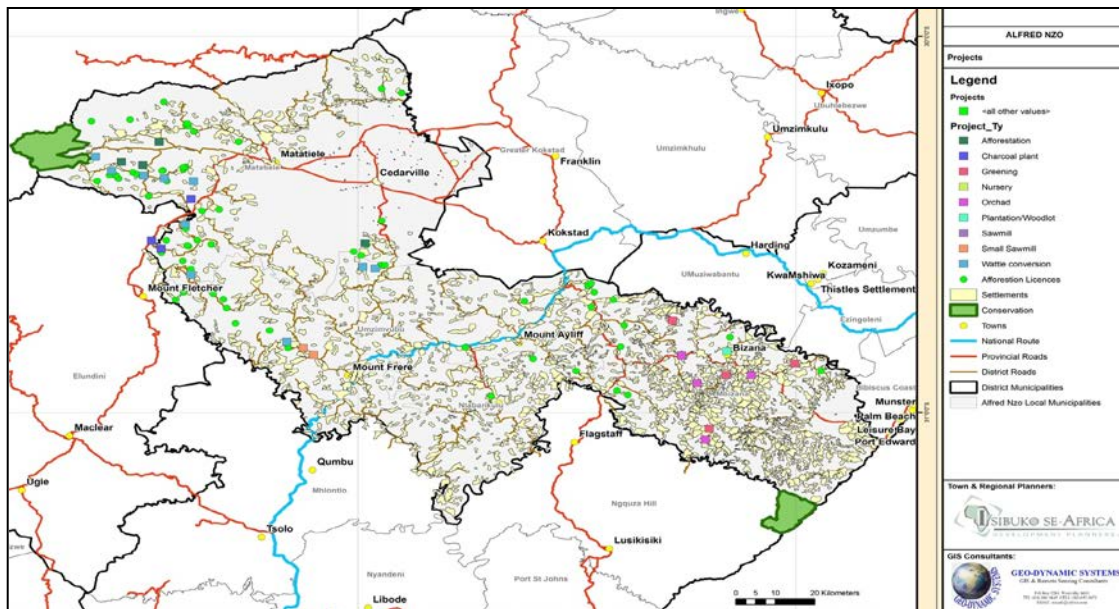

#### **1.5.7.2 Crop Farming**

Rainfall and soil quality make much of the District suitable for agricultural production. Dry land farming is generally of a subsistence nature, and there are large tracts of uncultivated arable land. There is very good potential for maize, sorghum, wheat, sunflower, hemp, beans, vegetables (cabbages, potatoes, butternut, green pepper and spinach), and deciduous fruits (peaches & apples).

#### **1.5.8 FORESTRY**

Forestry is an important economic sector in the South African economy. It contributed about 1.2% of the country's Gross Domestic Product (GDP) and 1.4% in the formal employment in 2008 respectively. Forestry is also identified as a growth sector. Currently, the demand for forest and related products is said to have exceeded supply. This is good news especially for a province such as Eastern Cape, generally and the Alfred Nzo District Municipality in particular which is said to be characterized by high suitable ecosystems.

There are forestry plantations in the District, which are extensive commercial plantation Category A and B owned by government and some are owned by certain communities within the district. These forestry plantations are concentrated especially at uMzimvubu, Ntabankulu and Mbizana Local Municipalities. Plantations such as Manzamnyama, Ntabana, Ntabankulu and Mbizana are all examples of category B plantations which have been providing an important resource base to small scale saw millers in the region.

**Map 7: Afforestation within the District-source ANDM SDF 2012**

Over 20 000 hectares of land is currently under forestry plantations and the majority of forestry plantation is within Ntabankulu Local Municipality and an estimated 27 000 Hectares of land has been identified as having forestry potential however a detailed analysis will have to be undertaken in order to determine exact amount of land with a potential for forestation. It is interesting to note that a privately owned sawmill that uses forest products existed in Ntabankulu but has since closed. It had served to utilize the forestry potential and contributed to local economic development. Umzimvubu Local Municipality in partnership with DEDEA also embarked on a feasibility study for

establishment of Saw-mill. An effort is needed to revive the Saw-mills in ward 05 and ward 15 within Ntabankulu Municipality.

The National government ASGISA programme has identified forestry development as a key pillar to achieving the economic growth and development targets, and has prioritized forestry as a key sector for support across all tiers of government. The District Municipality will be working closely with ASGISA to develop this sector. Pine, gum, wattle, and hardwoods are all feasible.

Plantation forestry is the foundation for a number of downstream processing activities including wood chips, saw milling, timber board, charcoal, furniture, pulp and paper. The furniture, pulp and paper industries are at the higher end of the value chain. It is this part of the value chain that will have a huge multiplier effect on the Alfred Nzo District if successfully exploited.

#### **1.5.9 MANUFACTURING**

This sector is presently very small in the District. The sector does have expansion potential including;

- ⇒ Timber-using industries
- ⇒ There are many small-scale garment manufacturers (e.g. occupying old Transido workshop premises) that would benefit from stronger business support.
- ⇒ The existing crafts sub sector is not insignificant. Craft workers would benefit from more support with product development and marketing, and from growth of the tourism industry in the District.
- ⇒ The agro-processing sub sector has the potential to grow on the basis of increasing primary production. Examples include potato processing (chips), maize milling, animal hides, stock feed, peach processing, dairy etc. Umzimvubu Goats has a processing facility in Mount Ayliff comprising holding pens, an abattoir that

can handle 40 goats a day, a meat processing plant, leather tannery and craft production units which directly benefit about 2000 people.

#### **1.5.10 CONSTRUCTION AND MINING**

The construction industry in the District is presently small, but has the potential to provide more job opportunities in the future, based on:

- ⇒ Rapidly increasing fiscal allocations for public infrastructure
- ⇒ The relocation of Provincial Government departments from Kokstad to Mount Ayliff.
- ⇒ Expansion of the EPWP (there needs to be a District EPWP Plan, with an M&E capability).
- ⇒ Increased house-building (human settlements) and retail infrastructure.

#### **1.5.11 SMALL SCALE MINING**

Small scale mining is presently restricted to sand mining and quarrying to supply the construction industry, but can be developed into a formalized industry. There are deposits of slate, sandstone, nickel and lime that need to be further explored. The titanium mining application at Xolobeni within Mbizana Local Municipality presents an opportunity for growth in mining within the district which in turn can have a major contribution to the district economy.

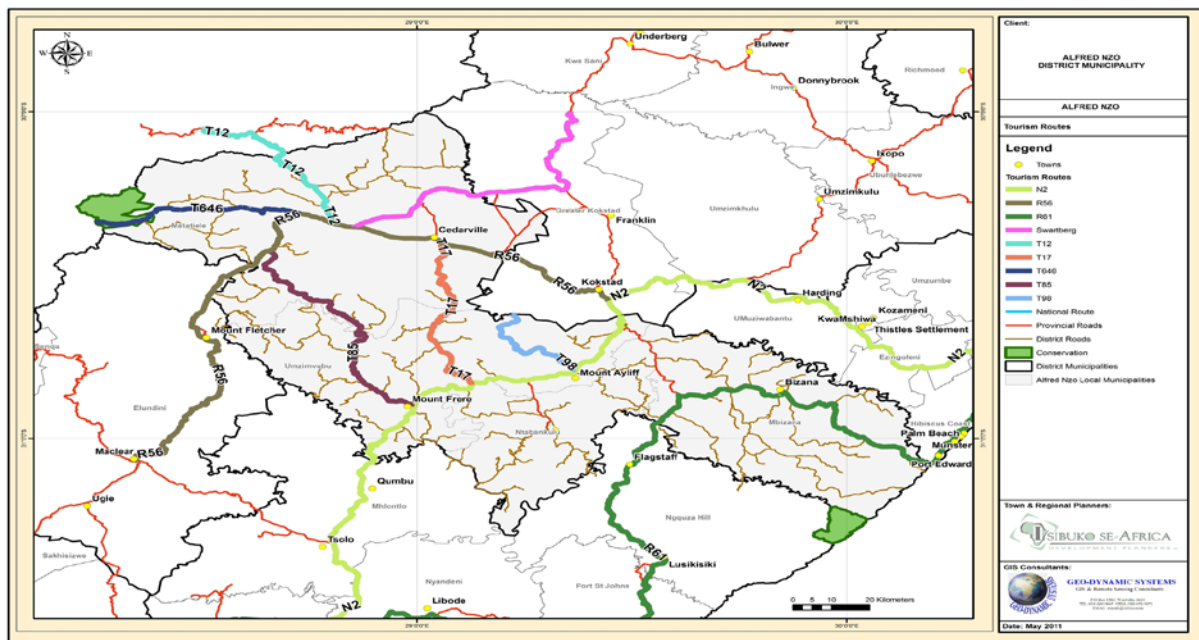

#### **1.5.12 TRADE AND BUSINESS SERVICES / ICT**

The five small towns in the District are all commercially busy, but require well-planned physical development to support the growth of the trade sector (formal and informal) and the tourism industry. In particular, the towns' informal sectors display entrepreneurial energy, and deserve better support.

### 1.5.13 TOURISM

Tourism is identified as one of the strategic economic sectors in South African, because of its potential to positively impact other sectors of the economy. It also has high capacity to create jobs for both urban and rural areas, and earn the country foreign exchange. Provincially, tourism is identified as part of the Eastern Cape Provincial Growth and Development Plan. Within the Alfred Nzo District Municipality, tourism is identified as an important economic sector for the growth and development of the district.

**Map 8: Tourism Route-Source ANDM SDF, 2012**

Tourism activities in the District are still limited to certain areas, despite the fact that the District has abundant natural beauty and a diverse array of cultural groups which have strong potential for eco, adventure and cultural tourism. The structure and spatial analysis of tourism within the district shows the following:

- Tourism within the district can be divided into, transit and business tourism, on the one hand, and nature based (eco-related tourism) on the other;

- Concentration of tourism related activities in Mzamba Tourist region located within the Mbizana Local Municipality as well as Matatiele area which is linked to the uKhahlamba-Drakensberg World Heritage Site.

Mzamba Tourist region is part of the broader Wild Coast within the Mbizana Local Municipality. This area has an extensively developed tourism infrastructure and related facilities including the Wild Coast and Mkhambati Nature Reserve. The Mzamba tourist region attracts both transit and nature based tourism due to its strategic location, being at the provincial border between the Eastern Cape and KwaZulu-Natal. The region also boasts facilities that range from hotels (such as the Wild Coast Sun International, hotel resorts and spas, safari lodges, B&Bs, guest houses and back packs are popular in the region. The region is also home to the Mkambati Nature Reserve, which is part of a well preserved and unspoilt piece of the Wild Coast. The Mkambati Nature Reserve is made up of grassy plains and forested ravines that descend into swamp forests surrounding the Mkambati River that finally opens up into the Indian Ocean. The region has a huge potential for the following activities:

- Beaches; Canoeing; Bird watching; Hiking trails; Horse riding; and Fishing.

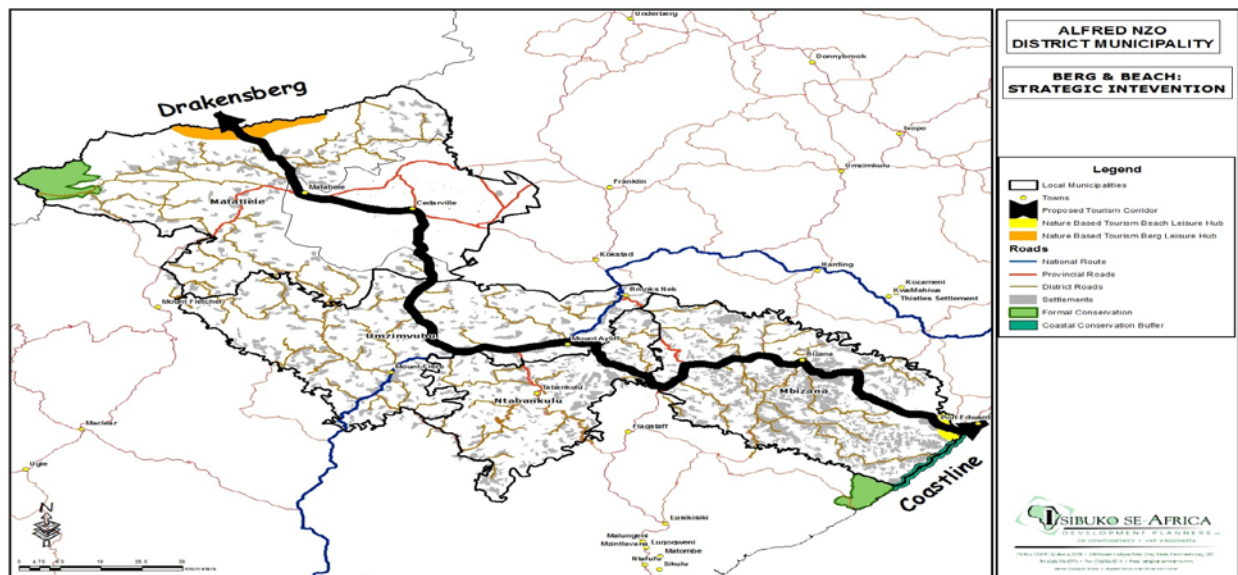

Matatiele area is a cross – border and commercial centre between Eastern Cape, KwaZulu-Natal and Lesotho. The existing range of tourism infrastructure and facilities is designed to target both transit/business tourism and nature lovers, including the following:

- Hotels and Golf courses; Lodges and guest houses; Conference facilities;
- Nature reserves – Ongeluksnek and Mt Lake, which are characterized by the following unique features – Zedonk (a mix between a donkey and a zebra); a pristine lake which constitute 30 ha of water filled with trout;
- Cultural village tours; Mt hiking; and Bird watching.

Ntabankulu region also has potential in a number of tourism activities and are summarized as follow:

- Destination Development; Eco-tourism the Flora & Fauna; Arts and Culture including Heritage & History; Tourism Marketing and Business & Educational Tourism.

Umzimvubu Region also has a tourism potential in the form of hiking trails, arts and craft development and rich Heritage and History. Accessibility to and information on tourist attractions is limited and the urban centres should ideally serve as tourism gateways and information centres. The tourism potential of the area also needs to be linked to other established tourism routes such as the Coastal Areas, Drakensberg and Lesotho.

**Map 9: Strategic Tourism Intervention-Source ANDM SDF 2012**

#### **1.5.14 SMME and Cooperative development**

Cooperatives development has largely increased in the district and has afforded the rural poor an opportunity to participate in economic activities. EPWP building methods are also increasingly being utilised in construction by the municipality. Access to micro-credit remains a big challenge to cooperatives and SMMEs.

## **1.6 LED Institutional Arrangements**

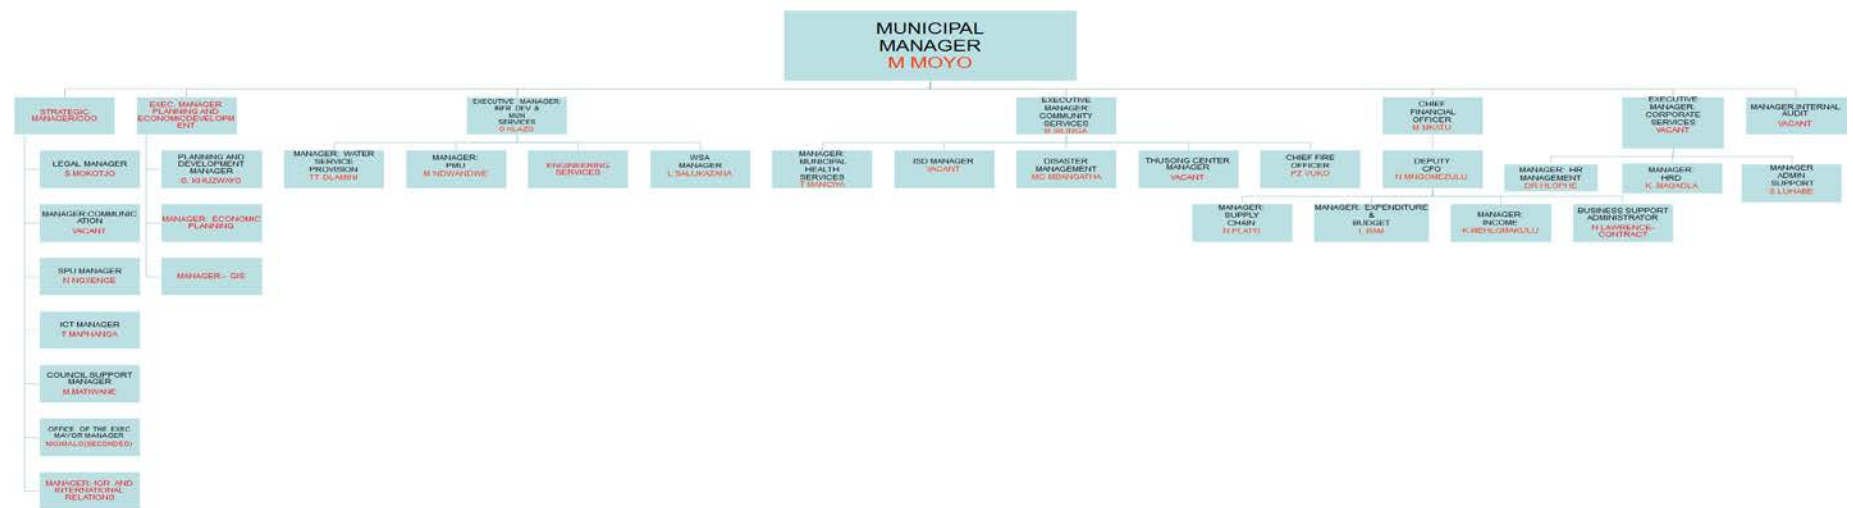

Alfred Nzo District Municipality established its Development Agency to focus on promotion and implementation of local economic development initiatives, investment mobilization, trade promotion and marketing in so far as it relates to local economic development. ANDA is a municipal entity established in terms of the Municipal Systems Act and is accountable to the Municipality.

ANDA is implementing and supporting the following projects;

- ⇒ Agricultural projects including;
  - Grain production Programme (ASGISA)
  - Livestock and poultry production programmes
  - Vegetable production programmes
- ⇒ Tourism Development programmes including;
  - Msukeni Enterprise
  - Ntsizwa Venyane Hiking Trails
  - Ongeluksnek Eco Tourism
  - Tshisa Hot Springs
  - Mehlosing Hiking Trail
- ⇒ SMME development
- ⇒ Small scale mining

### 1.7.1 INSTITUTIONAL STRUCTURE OVERVIEW

The current high level organizational structure of the municipality is indicated on figure below.

The structure is divided into the following directorates.

- ⇒ Office of the Municipal Manager
- ⇒ Community Development Services
- ⇒ Corporate Services
- ⇒ Budget and Treasury Office
- ⇒ Infrastructure Development and Municipal Services/ Technical Services
- ⇒ Development and Economic Planning

The position of Senior Manager Corporate Services has remained vacant since late 2009 and a number of incumbents have been acting in this position. This situation poses a serious challenge within the institution in terms of organizational development and municipal transformation.

#### **1.7.1.1 OFFICE OF THE MUNICIPAL MANAGER**

The Municipal Manager has the widest span of control and responsibilities include;

- ⇒ Public relations, primarily the Communication unit which is responsible for the development of internal and external communication including communication strategies, branding, publications, events Management, and information dissemination
- ⇒ Special Programmes Unit which is responsible for ATTIC which includes all the activities associated with the provision of HIV & AIDS information and training in the District and Special Programmes which deal with issues relating to the youth, gender, disability and children.
- ⇒ Working closely with the office of the Executive Mayor and office of the Speaker and both offices have managers.
- ⇒ Manager in the office of the Executive Mayor amongst others is responsible for functionality of Mayoral Committee, provide technical advices to the Exec Mayor and oversight of Mayoral programmes.

- ⇒ Manager in the office of the Speaker who is responsible for providing support to all standing committee and council meetings, coordination of councilor training programmes and promoting public participation in all important municipal programmes.
- ⇒ Internal Auditing where the Internal Audit Manager works closely with the Audit Committee
- ⇒ Institutional risk management through facilitation by Risk Manager.
- ⇒ Coordination of inter-governmental relations programmes within the district.

Critical vacancies include.

- ⇒ Manager Communication
- ⇒ Manager IGR and International Relations.

#### **1.7.1.2 CORPORATE SERVICES**

The responsibilities of the Department include;

- ⇒ Human Resource Management which is responsible for providing management and staff with quality human resource support including career and compensation management, labour relations management and employee wellness
- ⇒ Human Resource Development which includes assisting new entrants into the labour market (NSDS), training and development of staff, Councillor Development and community empowerment.
- ⇒ Legal Services which includes all legal related matters of the whole Municipality such as litigation, contract management, advisory services, debt recovery, by law development and disciplinary proceedings.
- ⇒ Administrative Support

Critical vacancies include;

- ⇒ Senior Manager Corporate Services

### **1.7.1.3 INFRASTRUCTURE DEVELOPMENT AND MUNICIPAL SERVICES /TECHNICAL SERVICES**

The department amongst others is responsible for the following:

- ⇒ Water Service Authority which deals with planning (Water Service Development Plan, Water Conservation and Demand Management and Sanitation Master Plan) and regulatory functions
- ⇒ Water Service Provision which deals with bulk purchase, source development and distribution of water as well as operations and maintenance. Waste water management including provision of sewerage services
- ⇒ Project Management which deals with implementation of both bulk water supply and reticulation projects as well as sanitation programme (rural and urban).
- ⇒ Emergency Services to deal with sudden water supply breakages, electricity breakdowns, attending spillage of poisonous and dangerous substances and water quality monitoring.
- ⇒ Engineering Services to deal with coordination of Electricity Planning, District Transport Planning and Municipal Building Maintenance.

Critical Vacant positions:

- ⇒ Manager Emergency Services
- ⇒ Manager Engineering Services

### **1.7.1.4 COMMUNITY DEVELOPMENT SERVICES**

The Manager Community Services is responsible for all activities associated with Community Development and Institutional Social Development Including;

- ⇒ Municipal Health Services
- ⇒ Community Development and Social facilitation
- ⇒ Fire and Rescue Services
- ⇒ Disaster Risk Management
- ⇒ Customer Care service
- ⇒ Thusong Centre Management

### **1.7.1.5 BUDGET AND TREASURY OFFICE SERVICES**

The Chief Financial Officer is responsible for;

- ⇒ Budget and Treasury Services
- ⇒ Supply Chain Management
- ⇒ Information and communication Technology

### **1.7.1.6 DEVELOPMENT AND ECONOMIC PLANNING**

Development Planning which includes Integrated Development Planning, Town Planning, Economic Planning, Environmental Management and Geographic Information System

Critical Vacant positions:

- ⇒ Executive Manager Development and Economic Planning
- ⇒ Manager Economic Planning
- ⇒ Manager GIS
- ⇒ Economic Planner
- ⇒ Development Planner

## 1.8 EMPLOYMENT EQUITY

The 2010/11 Employment Equity Report indicates the following;

Figure 21: Municipal Employment Equity

### 1.8.1 SKILLS DEVELOPMENT

The Municipality has adopted a Workplace Skills Plan in accordance with the Skills Development Act. The plan aims to address the identified skills shortage within the municipality.

## 1.9 PERFORMANCE MANAGEMENT

The municipality has managed to review its policy and approved by the Council and the reviewed policy aims to get the performance management system cascaded to lower levels than Section 57 managers. The municipality will develop its Service Delivery and Budget Implementation Plan as the basis for performance management in terms of implementation of the IDP and Budget expenditure forecast.

## 1.10 STATUS OF POLICIES WITHIN THE MUNICIPALITY

**Table 11: Status of Policies**

<b>POLICY AND DEPARTMENT RESPONSIBLE</b>	<b>STATUS OF THE POLICY AND ITS IMPLEMENTATION</b>	<b>FOCUS FOR 2011/12</b>
<b><u>BUDGET AND TREASURY</u></b>	<b>FOR FINANCIAL VIABILITY AND SERVICES</b>	
Credit and Debt policy	Adopted by Council 10 December 2009	To be reviewed
Tariff Policy	Adopted by Council June 2009	To be reviewed
Banking and Investment Policy	Adopted by Council June 2009	To be reviewed
Asset Management policy	Adopted by Council June 2009	To be reviewed
Budget Policy	Adopted by Council 10 December 2009	To be reviewed
Supply Chain Management Policy	Adopted by Council June 2009	To be reviewed
Credit Control Policy	Adopted by Council 10 December 2009	Implementation of the policy
Anti-corruption policy	Adopted by Council 10 December 2009	Implementation of the policy
Revenue Enhancement Policy	Adopted by Council 10 December 2009	Implementation of the policy
Municipal Relief expense policy	Adopted by Council 10 December 2009	Implementation of the policy
Catering Policy	Adopted by Council 10 December 2009	Implementation of the policy
Information and Communication Technology Policy	Adopted by Council 10 December 2009	Implementation of the policy

<b>POLICY AND DEPARTMENT RESPONSIBLE</b>	<b>STATUS OF THE POLICY AND ITS IMPLEMENTATION</b>	<b>FOCUS FOR 2011/12</b>
<b><u>CORPORATE SERVICES</u></b>	<b>FOR INSTITUTIONAL ARRANGEMENT AND HUMAN RESOURCE DEVELOPMENT</b>	
Payroll Policy	Adopted by council and work-shoped to staff	To be reviewed
Employment Equity and affirmative action Policy	Adopted by Council 10 December 2009	To be reviewed
Staff Remuneration Policy	Adopted by Council 10 December 2009	To be reviewed
Recruitment and Selection Policy	Adopted by council and workshoped to staff	To be reviewed
Occupational Health and safety Policy	Adopted by council and workshoped to staff	To be reviewed
Subsistence and Travelling Policy	Adopted by council and workshoped to staff	To be reviewed
HIV and AIDS (in the work place) Policy	Adopted by council and workshoped to staff	To be reviewed
Sexual Harassment Policy	Adopted by council and workshoped to staff	To be reviewed
Induction Policy	Adopted by council and workshoped to staff	To be reviewed
Placement Policy	Adopted by council and workshoped to staff	To be reviewed
Employee Assistant Programme Policy	Adopted by council and workshoped to staff	To be reviewed
Dress Code, uniform and protective clothing policy	Adopted by council and workshoped to staff	To be reviewed
Performance Management Policy	Adopted by council and workshoped to staff	To be reviewed
Records Management Policy	Adopted by council and workshoped to staff	To be reviewed
Disciplinary Policy	The collective agreement on disciplinary procedure from SALGA is being used by the municipality	To be reviewed
Performance Management Policy	Adopted by council and workshoped to staff	To be reviewed
Records Management Policy	Adopted by council and workshoped to staff	To be reviewed

<b>POLICY AND DEPARTMENT RESPONSIBLE</b>	<b>STATUS OF THE POLICY AND ITS IMPLEMENTATION</b>	<b>FOCUS FOR 2011/12</b>
Telephone and Cellphone Policy	Adopted by council and workshopped to staff	To be reviewed
Leave administration Policy	Adopted by council and workshopped to staff	To be reviewed
Access Control guide policy	Adopted by council and workshopped to staff	To be reviewed
Subsistence abuse Policy	Adopted by council and workshopped to staff	To be reviewed
Smoking Policy	Adopted by council and workshopped to staff	To be reviewed
HRD, Multi-skilling, study assistance and learnership Policy	Adopted by council and workshopped to staff	To be reviewed
Service Commitment Charter	Adopted by council and workshopped to staff	To be reviewed
Termination Policy	Adopted by council 10 December 2009	To be reviewed
Delegation Framework Policy	Adopted by council 26 April 2006	To be reviewed
Standby Allowance Policy	Adopted by council May 2010	To be reviewed
Retention Policy	Adopted by council December 2009	To be reviewed
Learnership Policy	Adopted by council 29 August 2007	To be reviewed
Transport Policy	Adopted by council 23 July 2009	To be reviewed
<b>MUNICIPAL MANAGER'S OFFICE</b>	<b>FOR GOOD GOVERNANCE</b>	
Integrated risk Management framework policy	Adopted by Council 10 December 2009	Implementation of the policy

## 1.11 FINANCIAL VIABILITY

### 1.11.1 BUDGET

The Municipal total budget for the 2011/12 financial year is R773 927 900.77 whereas the budget for 2010/11 financial year was R365 515 386.67 which reflects over 50% increase between the two financial years. This situation is as a result of Alfred Nzo District Municipality increasing in size as a result of demarcation process where it incorporated Ntabankulu and Mbizana Local Municipalities which were previously under O.R. Tambo District Municipality before 2011 Local Government elections. The municipality managed to spend 85% of its budget in the last financial year.

### 1.11.2 Income allocations and sources

The Alfred Nzo Municipality derives its income from three sources namely;

⇒ National allocations

- Equitable share
- Finance Management Grant
- MSIG Funding
- MIG Funding
- Water and sanitation backlog funding (DWA)
- RSC Levy replacement grant
- Councilor remuneration provision

⇒ Provincial allocations

- Sports Art and Culture
- Municipal Health Services
- LED Capacity Building

⇒ Own income

- Water and sanitation service fees
- Interest on grants
- Input VAT
- FNB Building rental
- Plant Machine Rental

The Municipality has a low income base and is heavily dependent on National and Provincial Grants. This trend exhibits little expectation that the Municipality will reduce its dependency on National and provincial grants.

### **1.11.3 Billing and Payment of rates**

Over 9000 urban households are billed for water and sanitation levies. Rural areas that do have access to water supplied by the Municipality are not being metered or charged for their consumption which implies that a considerable amount of purified water is unaccounted for and may even be utilised indiscriminately.

The Municipality is in process of cleansing and reviewing its data base of households who are being serviced. Payment rates are poor and this is compounded by the high poverty levels and low affordability levels of the community.

The Municipality is constantly striving to provide services to its community which requires substantial capital investment, especially in terms of infrastructural assets. In order to maintain service delivery it is imperative that these assets be maintained in proper working order which requires equitable investment in terms of maintenance and repair costs. According to the National treasury Municipalities should be budgeting between 10% and 15% of their operating expenditure for repairs and maintenance.

### **1.11.4 PROVISION OF FREE BASIC SERVICES**

Provision is made on the budget for the provision of free basic water services from the equitable share. A certain percentage of the equitable share is used for this purpose at this stage, which is mainly attributable to the fact that households in the rural areas that do have access to water supplied by the Municipality are not being charged for their consumption as there are no water meters in many rural areas since water provision is at an RDP standards. The municipality is also struggling to put systems in place that will enable to bill for consumption as a result almost all people having access to water are receiving water for free.

## 1.12 GOVERNANCE ANALYSIS

### 1.12.1 POLITICAL STRUCTURE

The Municipal Council consists of forty Councilors of which 11 are full time Councilors including the Speaker and Chief Whip of the Council. The Council is led by the Speaker, the Executive Mayor, the eight full-time Mayoral Committee Members and Councilors. There has been a delegation of powers from Council to the Executive Mayor and the Executive Mayor in turn has delegated some of the powers to the Mayoral Committee Members. The Mayoral Committee led by the Executive Mayor functions through the following standing committees which assist in decision making and making sure that there is a political environment that is conducive for service delivery:

- ⇒ Infrastructure Development and Municipal Services/ Technical Services
- ⇒ Community Development Services
- ⇒ Development Planning and Economic Development
- ⇒ Budget and Treasury/ Finance
- ⇒ Corporate Services
- ⇒ SPU and Attic
- ⇒ Sports, Arts, Culture and Recreation
- ⇒ Intergovernmental and Communication

The Council has adopted approach of clustering of Standing Committees into four Cluster Standing Committees which are defined as follow:

- ❖ Finance and LED Standing Committee
- ❖ Human Resources and Social Development
- ❖ Human Settlement and Infrastructure
- ❖ Community Liaison Research and Heritage

The functions of the Committees are summarized below:

STRUCTURE	KEY AREAS OF RESPONSIBILITY
<b>Human Resources and Social Development</b>	<ul style="list-style-type: none"> <li>○ Human resources;</li> <li>○ General administration;</li> <li>○ Legal services</li> <li>○ Fire and Rescue Services</li> <li>○ Disaster Risk Management.</li> <li>○ Municipal Health Services</li> <li>○ Thusong Service Centre and ISD &amp; Customer Care</li> <li>○ Information and communication technology</li> </ul>
<b>Finance and LED Standing Committee</b>	<ul style="list-style-type: none"> <li>○ Budget;</li> <li>○ Expenditure;</li> <li>○ Income;</li> <li>○ Supply chain management;</li> <li>○ Integrated Development Plan.</li> <li>○ Local Economic Development</li> </ul>
<b>Human Settlement and Infrastructure Services</b>	<ul style="list-style-type: none"> <li>○ Water services;</li> <li>○ Water services provision;</li> <li>○ Infrastructure provisioning</li> <li>○ Human Settlement</li> </ul>
<b>Community Liaison Research and Heritage</b>	<ul style="list-style-type: none"> <li>○ Sports and Recreation</li> <li>○ Heritage and Culture</li> </ul>

### 1.12.2 AUDIT

The Municipality during 2010/11 financial year had functional Audit Committee which its term expired by end August 2011 and the municipality then embarked on a process of establishing of new Audit Committee hence there is a new Audit Committee appointed by Council. In order to enhance its effectiveness an Audit Committee Charter has been developed and adopted by Council to guide the functionality of the Committee. Alfred Nzo District Municipality in the last three financial years has not managed to obtain positive Audit Report which is a concern. The summary overview of the Audit Outcome of the District Municipality and Local Municipalities is as follows:

<b>MUNICIPALITY</b>	<b>FINANCIAL YEAR</b>	<b>AUDIT REPORT</b>
ANDM	2008/2009	ADVERSE
	2009/2010	DISCLAIMER
	2010/2011	DISCLAIMER
MATATIELE	2008/2009	UNQUALIFIED

The municipality has further developed an Action Plan towards addressing audit queries which was adopted by Council and this plan will assist the municipality in turning around the situation for better audit outcomes. The municipality during 2010/11 Financial Year launched its Operation Clean Audit 2012 Programme. The approach by the municipality aimed at turning around in terms of poor audit opinions the municipality has been getting in the last three financial years.

#### **1.12.3 INTERGOVERNMENTAL RELATIONS**

During the current financial year the functionality of IGR Structures within the municipality has improved quite significantly. The structures are composed of the Municipal Managers Forum and District Mayors Forum.

#### **1.12.4 PARTNERSHIPS AND STRATEGIC RELATIONSHIPS**

The Municipality has made a concerted effort to develop its capacity through the formation of strategic partnerships and relationships and has concluded partnerships with the following;

- ⇒ The Development Bank of Southern Africa ( DBSA)
- ⇒ Thina Sinako ( European Union)
- ⇒ Swedish Government (Ohstresund Municipality)

#### **1.12.5 COMMUNITY AND PUBLIC PARTICIPATION AND COMMUNICATION**

The Municipality has a communication organizational structure which is in line with Local Government Communication System. The structure is also in line with national guidelines. The structure is currently not fully populated (staffed) this will be achieved through sharing this service with local municipalities and incremental staffing of the unit. This structure is supported by one staff member from the office of the Premier (OTP), one staff member from the Government Communication Information Systems (GCIS). The district municipality considers communication and public participation very important to such extent it has established Customer Care Centre which is one of the strategic approach of enhancing communication lines between the municipality and Communities. The communication function is being carried out in close liaison with the support systems. These sections are mainly dealing with:

- ⇒ Publicizing notices, advertisements, newsletter covering all activities occurring within all local municipalities within district's jurisdictional area as well as the overall dissemination of information. The communication unit works in close liaison with local municipalities. It utilizes various means of communication ranging from the Alfred Nzo news letter, brochures, bulletins, community radio, news papers, some television footings as well as national papers,
- ⇒ To support the process the municipality has established the District Communicators Forum (DCF) that should meet bi - monthly to discuss matters relating to communication.
- ⇒ The district further communicates with the communities through Community Development Workers and Ward Councillors which are based within Local Municipalities.

The IDP is aimed at a balanced infrastructure investment and sustainable economic development programme, establishment and functionality of all core municipal policies and systems as required by law. Various policies have been developed to guide the functioning of the municipality. The policies that have been developed have been outlined within the section dealing with institutional arrangements under chapter 1 (Situational Analysis). The organizational structure of the municipality has been reviewed to respond to the management reform and service delivery needs. The skills of the employees are developed to ensure the following:

- Implementation of continuous management reform and improvement
- Empowering employees through focused and continuous professional/ skills development

The skill development strategy of the municipality is three pronged focusing on the community, the councillors and officials. The focus of the skills development strategy is more influenced towards benefiting the community. The Performance Management System Policy for the district has been reviewed and adopted by the Council. Mechanisms are being devised for the cascading of the performance management system to employees below section 57

managers. The municipality has developed and adopted a number of Policies to ensure sound labour management and human resource relationships

#### a). Institutional Guidelines

Institutional guidelines are focused towards initiating a managerial reform aiming at:

- Objectives and results orientated management
- Effectiveness and efficiency oriented management
- Service and client oriented management
- Performance based contracts
- Service oriented codes of conduct

### **1.13 CONCLUSION**

Having considered all the above-highlighted challenges, the municipality will strive to overcome them hence it embarked on a Strategic Session where strategy approaches were crafted in order to change the situation for better. The municipality acknowledges that it cannot completely turn around the situation alone hence it is critical that all role players make meaningful contribution to challenges facing the municipality.

## **SECTION C: MUNICIPAL STRATEGIES 2012 TO 2017**

### **CHAPTER 2: STRATEGIES**

#### **2.1 INTRODUCTION**

The Alfred Nzo District Municipal municipality embarked on a Strategic Planning Session during 2011/12 financial year in preparation for new five year Integrated Development Plan 2012 to 2017 where the council took a decision to craft new Vision, Mission, Core Values and Strategic focus area. The Strategies have been developed to ensure the following:

- Relevance due to changing circumstances;
- Better alignment with the Performance Management System through SDBIPs;
- Alignment with Sector Plans;
- Alignment with the new national and provincial priorities;
- Alignment with the National Framework plans such as NSDP, Local Government Turn Around Strategy; and
- Alignment with provincial Strategic Plans such as PGDS and PSDS;
- Alignment with National Governance targets such as Clean Audit 2014

<b>Vision 2017</b>	A self-sustainable municipality that guarantees effective and efficient rural development
<b>Mission</b>	Creating a conducive environment by improving human capabilities and enhancing relevant skills, and maximizing the utilization of natural resources in order to improve quality of life for its communities
<b>Motto</b>	<b>“To be a place of diverse heritage”</b>
<b>Values</b>	Humanity, Professionalism, Responsiveness, Respect, Transparency, Courtesy, Accountability, Trustworthiness, Teamwork.

The new vision seeks new innovation and creates a strong municipality. The new mission and motto provides new opportunities for the municipality and gives clear tangible programs that the municipality must undertake. The values seeks to enable the municipality to move to greater heights.

## 2.2 COUNCIL STRATEGIC GOALS

Alfred Nzo District municipality in its strategic planning session late in 2011 resolved to focus on four Strategic Goals. The municipality perceived itself as a new municipality and therefore needed new goals as focus area of the new Council. Four goals are identified as follows:

- [1] Economic growth;
- [2] Community resilience and self-reliance;
- [3] Service excellence and sustainability; and

[4] Common purpose.

## **2.3 MUNICIPAL TURN AROUND STRATEGY**

Alfred Nzo District Municipality has crafted its detailed Short-Long term Strategies which will assist the municipality to achieve its goals and vision and these strategies conform to Local Government Turn Around Strategy (LGTAS) approved in December 2009. The focus of the Municipal Turn Around Strategy is based on National Key Performance Areas and the view by the municipality is that such strategies will allow the municipality to improve the lives of its people through sustainable service delivery and ensure sound governance system that will put the municipality on the right path towards Clean Audit.

### **NATIONAL KEY PERFORMANCE AREA: GOOD GOVERNANCE AND PUBLIC PARTICIPATION**

## 4. LOCAL MUNICIPALITIES PROJECTS

### 4.1 MATATIELE LOCAL MUNICIPALITY

#### IDP/M&E UNIT

KEY ISSUES	OBJECTIVES	PERFORMANCE INDICATOR	KEY PERFORMANCE TARGETS	STRATEGIES	AVAILABLE RESOURCES	CURRENT /PROPOSED PROJECTS	WARDS	BUDGET
<b>MONITORING &amp; EVALUATION</b>								
Reviewal of Performance Framework	To bring it in line with the reviewed IDP	Performance Reporting by all Managers	To receive Monthly, Quarterly, Mid-year and Annual reports timeously	Implementation of Performance Framework	Performance Management Framework	Annual Review and Implementation of Performance Management Framework		R350 000.00
Lack of Capacity Building on PMS	To capacitate all Councillors and all Staff about PMS by 2017	-Training for Councillors on PMS -Training for all Managers -Training for other staff members	2 Training/ workshops per year	To have training and workshops for staff and councillors	Service Provider	Training of Councillors, Traditional Leaders and Managers Training supervisors and all levels of employment		R200 000.00
PMS only focuses on Management	Develop a PMS that include all levels of employment	Cascading of PMS to all levels of employment	2012/2013 All Managers & Middle managers  2013/2014 Supervisors  2014/2015 all levels of employment	To have PMS implemented in phases- (i) from The Municipal Manager to Section 56 Managers and Middle Managers (ii) From Supervisors and lower levels	Performance Management Framework	PMS cascaded to All Managers Middle Managers & Supervisors All employment levels		R200 000.00
<b>MONITORING &amp; EVALUATION</b>								

KEY ISSUES	OBJECTIVES	PERFORMANCE INDICATOR	KEY PERFORMANCE TARGETS	STRATEGIES	AVAILABLE RESOURCES	CURRENT /PROPOSED PROJECTS	WARDS	BUDGET
No Performance Contracts developed for all levels below Section 56 Managers	Develop Performance contracts for all levels of employment by end July annually.	Signed Performance contracts	Annually signed Performance contracts	Monthly performance monitoring	Performance Contracts for Municipal Manager & Section 56 Managers	Performance Contracts are signed at all levels of employment and performance assessed.		
Reviewal of Monitoring & Evaluation Policy	To align the M&E Policy with changes in the Legislation	Council Resolution adopting the policy	Annual Reviewal of the Policy July 2013.	To regularly assess gaps and shortfalls	Legislation Existing M&E Policy	Reviewal of M&E Policy		R60 000.00
Inadequate Information on the Mid-Year Assessment Report	To have a credible Mid-Year Assessment Report by the 10 <sup>th</sup> of January each year	Council Resolution adopting the Mid-Year Assessment Report	To have a credible Mid-Year Assessment Report by the 10 <sup>th</sup> of January each year	Training Compliance by Enforcement	Personnel Service Provider	Training		See PMS Budget
Inadequate information on the Annual Report	To ensure a adoption of the by 31 January each year	Submission of the Annual Report with the required attachments i.e. Auditor General Report, Audit Action Plan	Timeous compilation and submission of the Annual Report by end March each year.	Involvement of all stakeholders	Draft Annual Report	Compilation of the report		R350 000.00
Non supervision on Monitoring the Performance of Service Providers	Proper supervision	Quarterly performance reports on supervision	Quarterly performance reports	To ensure compliance by all involved	Personnel			
<b>INTEGRATED DEVELOPMENT PLAN</b>								
Lack of Credibility of the IDP in certain areas :	To have a Credible IDP by 2012/2013	MEC Comments and IDP Assessment Report	To have a Credible IDP by 2012/2013	-identify the gaps using the IDP Assessment Tool and bridge the	Budget and Staff and service provider	Development of IDP and Annual reviews	All	R800 000.00

KEY ISSUES	OBJECTIVES	PERFORMANCE INDICATOR	KEY PERFORMANCE TARGETS	STRATEGIES	AVAILABLE RESOURCES	CURRENT /PROPOSED PROJECTS	WARDS	BUDGET
Basic Service Delivery and Good Governance				identified gaps -To request the service provider to assist				
Lack of alignment of IDP and the budget	Identify and rectify causes of non-alignment	MEC Comments and IDP Assessment Report	To have an aligned IDP by 2012/2013	-identify the gaps using the IDP Assessment Tool and bridge the identified gaps -To request the service provider to assist	Budget and Staff and service provider	Development of IDP and Annual reviews	All	
Poor Sector Department involvement in IDP Processes	Increase the level of participation by sector departments in IDP Processes to 80% by 2013/2014	Percentage of Sector Departments attendance as reflected by the Attendance Register	To have at least 80% of attendance	Timeous communication and clarification of roles	Sector Departments and municipal Personnel			

#### INFRASTRUCTURE DEPARTMENT

Key Issues	Current Backlog Analysis/ Mostly Affected Areas	Key Performance targets	Performance indicators	Available Resources	Objectives	Strategies	Current /Proposed Projects	Ward	BUDGET
<b>ELECTRICITY</b>									
INFRASTRUCTURE Insufficient capacity in the existing Substation	1 substation in ward 19.	Install 1 substation by 2015/2016	1 substations constructed in Ward 19	Land	Construct 1 Substation by 2017.	Source funding Loan Eskom to install.	Matatiele substation	19	R30Million

Key Issues	Current Backlog Analysis/ Mostly Affected Areas	Key Performance targets	Performance indicators	Available Resources	Objectives	Strategies	Current /Proposed Projects	Ward	BUDGET
<b>INFRASTRUCTURE:</b> Backlog in rural electrification of Matatiele.	30,000 households in all wards	Reduce the backlog by 6,000 by 2012/2013	Number of households connected	DME, Schedule 06 funds	Eradicate electricity backlog of 30,000 households in Matatiele by 2017.	Source funds from DME to address the backlog.	Area c and Ward 22 Electrification of Ludidi, Nyaniso and Mathandela A/A.	All wards	R510 Million
<b>INFRASTRUCTURE:</b> Construct New streetlights and High-mast lights	Ward 20	Installation of 5 High-mast lights by 2012/2013	Number of Highmasts installed	Land	Install 26 High-mast lights by 2017	Provide adequate resources, inclusion of High-mast to the rural communities and Installation of new substation in town	1. Highmast light. 2. tools and equipment.	20	R5,4Million
<b>INFRASTRUCTURE;</b> Electricity in-fills	Ward 01,3,4,6,8,10,17,23 ,25	900 households to be connected by 2012/2013	No of households connected	Schedule 06 funds	Electrify all in fills by 2017	Prioritize in fills in identification of projects from schedule 06 funds	Matatiele rural electrification	01,3,4,6,8,10,17,23 &25	R15,0Million
Lack of Personnel	Populate the organogram	Employ 1 Qualified Technician by 2012/2013	1 Qualified Technician employed by	Budget	Employ at least 2 Qualified Technician by 2017	Advertisement on Provincial and Local Paper			
<b>OPERATIONS AND MAINTENANCE</b>									
<b>MAINTENANCE</b> Poor state of roads	All wards except CBD areas.	78 km for 2012/2013	Number of km maintained	Equitable share funds	Maintain 385 km of roads by 2017	Implement EPWP principles through labour based Programme/principles	Nkhoesa Mofokeng programme	All wards	R57,5Million

Key Issues	Current Backlog Analysis/ Mostly Affected Areas	Key Performance targets	Performance indicators	Available Resources	Objectives	Strategies	Current /Proposed Projects	Ward	BUDGET
MAINTANANCE; Poor state of roads	All wards except CBD areas	50Km by 2012/2013	Number of Km maintained	Loan	Ensure that 250 Km of access roads is maintained by 2017.	Purchasing of own plant.	All wards as per prioritization		R30 Million
INFRASTRUCTURE; Tarring of Maluti internal roads	Ward 01	3km by 2012/2013	Number of km tarred	Loan to address the backlog	Ensure that 15km of internal roads in Maluti are tarred. By 2017	Apply for a loan of R10Million for this project	Maluti Internal Roads		R10Million
INFRASTRUCTURE; Tarring of Cedarville Internal roads	Ward 26	3Km by 2012/2013	Number of Km tarred	Loan to address the backlog	Ensure that 15 of internal roads at Cedarville are tarred by 2017.	Apply for a loan of R10Million for this project	Cedarville Internal Roads.		R10Million
INFRASTRUCTURE; Tarring of Matatiele Internal roads	Ward 19&20	3Km by 2012/2013	Number of Km tarred	Loan to address the backlog	Ensure that 15Km of internal roads at Matatiele are tarred by 2017.	Apply for a loan of R10Million for this project	Matatiele Internal Roads		R10Million
INFRASTRUCTURE: Kerbing and Channeling	Ward 01 ,19,20&26	Construct 4000 meters of kerbs by 2012/2013	Number of meters installed	Equitable share funds	Install 20,000meters of Kerbs	Usage of Equitable share funds	Maluti, Cedarville & Matatiele		R5Million

Key Issues	Current Backlog Analysis/ Mostly Affected Areas	Key Performance targets	Performance indicators	Available Resources	Objectives	Strategies	Current /Proposed Projects	Ward	BUDGET
					by 2017		kerbing		
<b>MAINTENANCE:</b> Road marking & Signage	Ward 01,19,20&26	16,000 meters by 2012/2013	Number of meters maintained	Equitable share funds	80,000 meters of road-marking by 2017	Utilize trained General Assistants	Maluti ,Cedarville and Matatiele road marking		R2,5 Million
<b>MAINTANANCE:</b> Filling of Potholes	Ward 01,19, 20&26	Minimize by 10,000square meters by 2012/2013	Number of square meters patched	Equitable share funds	Patching 50,000 square meters 2017.	Utilize trained General Assistants	Maluti, Cedarville & Matatiele internal roads.		R4,2Million
<b>MAINTENANCE</b> Storm-water Drainage	Ward01,19,20&26	Replace storm water drains by 20% per annum.	Meters of storm water drains replaced	Equitable share funds and MIG grant.	Replace all old existing Infrastructure by 2017	Replace to suit current development in Matatiele	Upgrading of storm water drain		R15Million
<b>Lack of Consolidated Municipal Infrastructure plan</b>	Ward 01, 19, 20 and 26	Development of Consolidated Municipal Infrastructure Plan	Adopted plan	Service Provider MIG Funds	Proper Plan to address future developments in Matatiele	Appoint Service Provider to develop the plan	Matatiele Storm-water management plan		R2.5Million
<b>Itsokolele Footbridge</b>	Ward 20	Footbridge by 2012/2013	Bridge completed	Equitable Share	Provide Access to Njongweville residents	In-house personnel	Itsokolele Footbridge		R
<b>PROJECT MANAGEMENT UNIT</b>									

Key Issues	Current Backlog Analysis/ Mostly Affected Areas	Key Performance targets	Performance indicators	Available Resources	Objectives	Strategies	Current /Proposed Projects	Ward	BUDGET
INFRASTRUCTURE: Inadequate Access Road	All wards	Construct 44Km of road by 2012/2013	Number of Km constructed	Personnel, Service providers	Construct 208 km by 2017	Appoint service providers	MIG capital projects		R210 Million
INFRASTRUCTURE: Poor quality of access roads in the rural areas	All wards	Maintain 80Km by 2012/2013 F/Y.	Number of Km maintained	-Personnel -service providers	Maintain 400km of Access roads by 2017	Hire plant, Purchase plant	Road maintenance		R11,5 Million
INFRASTRUCTURE: inadequate Community Halls	All wards	Construct 2 Community halls by 2012/2013	Number of Halls constructed	MIG Grant funding	Construct at least 1 community hall per ward by 2017.	Apply labor based methods of Construction	MLM Community facilities		R15Million
INFRASTRUCTURE; Poor quality of sporting facilities	All wards	1 facility per financial year	Number of facilities constructed	15% out of MIG allocation.	Ensure that 5 sporting facilities are constructed by 2017	Appoint service providers	Matatiele sports facilities		R20 Million
MONITORING AND EVALUATION QUALITY OF ROADS	All wards	Testing of all our roads in order to comply with Design guidelines	Roads that are not maintained more often	Personnel	All access roads to be in good quality by 2017	Quality Test results to determine payment.	All MLM projects		MIG Funds
PMU; PMU ESTABLISHMENT	PMU	Filling of critical positions by 2012/2013	Fully Populated Organogram	MIG Grant	Ensure that there is a fully fledged PMU Structure by 2017	Utilization of 5% top slice from MIG grant for PMU Establishment.			R12,5 Million

Key Issues	Current Backlog Analysis/ Mostly Affected Areas	Key Performance targets	Performance indicators	Available Resources	Objectives	Strategies	Current /Proposed Projects	Ward	BUDGET
Lack of working Tools/equipment							Purchasing of 1 Laptop		
SECTOR DEPARTMENTS/STRATEGIC PARTNERS									
DEPT OF PUBLIC WORKS;MAINTANANCE: T/DR roads	All wards	60 km per financial year	Number of km maintained	Public works	Maintain 300 km of District roads by 2017	Usage of their own plant	Tarring of DR roads		DPW
DEPT OF PUBLIC WORKS;MAINTANANCE: bridges	All wards	5 bridges per financial year	Number of bridges constructed	Public works	Construct 15 bridges by 2017	Usage of their machinery	DPW bridges		DPW

<b>KEY PERFORMANCE AREA : LOCAL ECONOMIC DEVELOPMENT</b>							
<b>GOAL 1 : JOB CREATION</b>							
<b>KEY FOCUS AREA : EXPANDED PUBLIC WORKS PROGRAMME &amp; COMMUNITY WORKS PROGRAMME</b>							
High rate of unemployment	1.1. Create at least (5000 short term jobs) (tourism, EPW, & Infrastructure)by 2017	No of Jobs Created	EPWP jobs	Institutional support	Establish youth co – operatives for maintaining the Ports of Entry by June 2013.	Qacha' s Neck Border gate, Ramatsiliso, Ongeluk'nek Mngeni	200 000
					Preparation and Submission of EPWP Reports	All wards	1m
			Community Works Programme	Institutional support (DOE,MLM,DM)	Registration of new CWP sites – community gardens in 2013	All wards )	20m
			Enhance the sustainability of the community gardens – by creating access to markets, community gardens – schools, stalls in town for sale of				
			Partnership with Dept. of Education to purchase from the Community gardens				
			Tourism Related Jobs	Institutional support (MLM, DM, Sector Departments, NGO's & Private)	Increase accommodation sector jobs annually. Annual event jobs annually	All Wards	800 000
			Mobilise funding for Co-operatives	ECDC, NEF, and DTI	Establish a training centre for Co operatives	Ward 19 and 26	3m
			Mobilise other stakeholders ECPTB, DEDEAT, Maluti Drakensberg Trans frontier Parks				

KEY FOCUS AREA : FORESTRY DEVELOPMENT							
Lack of beneficiation of Forestry products	Create at least 1000 Sustainable job opportunities by 2017	No of sustainable jobs created	Forestry related jobs – pine tree plantations	Land and Labour Technical expertise from sector Department e. g Department of Rural Development and Agrarian Reform and Department of Forestry and Fisheries	Development of Community Commercial plantations	2,4,6,7,8,9,12,14,15,16,17,18,20,21,23,24	100m
		No of skilled - people per project	In house Training and skilling of youth to ensure sustainable employment	Wood logs , forestry plantations	Forestry value chain project (Wood )		
					Sawmill Wattle removal - Charcoal		
					Down Stream Processing Plants ( e.g. wood processing)	26	40 m
					Charcoal Processing Plant	Ward 8 Mafube, 21	5m
Slow processing of forestry licence	To facilitate the issuing of at least 10 forestry licences by 2017	No of forestry licences issues	Facilitate the application Foresting Licenses	Land	Support to existing forestry projects	Current projects in wards:- Makoba, Tsita, 13 Mparane, Ha - Sibi, Ward 21 – Mabenyeng, ward 25	
					New forestry Projects	2,4,6,7,9,11,12,15,16,17,18,20,21,24,25,8	100m

Existing resources are not fully utilised	1.3 Develop at least 2 agricultural anchor projects by 2017	No of anchor projects	Maximum utilisation of existing resources  Monitoring of existing projects	Land, Rivers, Agricultural Co-operatives	Construction of 1Dam (for irrigation schemes)	Gladstone – 13 Mariazel – 14 Seeta - 13 Ward - 26 Kindirha – Ward 8	1.3 bn
---	--	-----------------------	--	--	---	---	--------

## GOAL 2 : INVESTMENT ATTRACTION AND RETENTION

### KEY PERFORMANCE AREA : LOCAL ECONOMIC DEVELOPMENT

Poorly developed industrial Sector	2.1 Attract at least 2New industries by 2017	No of industries developed.	Package land Invite investors	Land, Intuitional Support	Light industrial Park Development	19	11m
					Light industrial Incubators (SMMEs)	19	11m
					Light industries in Leather Making and Glass blowing	26	7 m
					Clay tiles industry	Magadla –ward 10, 21	15 m
Existing Retail shopping facilities are far from Communities	Develop at least two malls by 2017	No of new retail malls	Retail Sector Diversification Partnerships with strategic partners	Land	New shopping mall development	19 ,  Convenience retail centres - at Nodal Points - Mzongwana, 26, Queen's Mercy, Mvenyane, Cedarville, Ward 1 - Maluti, ward 23 – Green	15m

						acre Ward 16 - Mechachaneng	
<b>KEY FOCUS AREA : KEY FOCUS AREA AGRICULTURE</b>							
Lack of access to markets for fresh produce markets	Increase the access to markets for least 15% of the fresh produce in Matatiele	% of agricultural produce with access to markets	Work with strategic partners Source funding	Land , Co-operatives, rural homestead gardens	Fresh Produce Market	19	20m
No value addition for agricultural produce	Develop at least two agricultural industries by 2017	No. of industries developed	Package land, Invite investors, Strategic Partnerships	Land, Institutional Support	Milling Plant	19	10m
					Dairy processing &Packaging	26	30 m
					Red Meat Production & Processing	26	15m
				Massive food production		All wards	
					Research on Mining Opportunities in Matatiele	All Wards	600 000
Illegal sand mining					Assist in legalising sand mining-SMME's support		
<b>NATIONAL KPA : LED KEY FOCUS AREA : INVESTMENT RETENTION &amp; ATTRACTION</b>							
Policy framework needs to be conducive for investment attraction & Retention	2.4. Review Policies in line with legislation Annually	No of policies Reviewed.	Conducive Policy environment	Technical Expertise	2.4.1 Reviewal of Investment and Retention Policy	All wards	50 000
					2.4.2 Review Matatiele SDF	All wards	300 000

## **SECTION F: SECTOR PLANS AND INTEGRATION**

### **CHAPTER 6**

#### **6.1 SPATIAL DEVELOPMENT FRAMEWORK**

The Alfred Nzo District Municipality as a result of 2011 Demarcation changes resulted in amendments of municipal boundaries where it inherited two additional local municipalities (Mbizana and Ntabankulu) from O.R. Tambo District Municipality resulted in the municipal Spatial Development Framework (SDF) adopted in 2008 no longer relevant to the current set-up of the municipality hence the municipality embarked on the review of its SDF.

##### **6.1.1 POLICY CONTEXT**

Spatial planning in the Alfred Nzo District Municipality occurs within the national and provincial policy directives, and sets the agenda for spatial planning at a local level. The national policy framework includes the Constitution of the Republic of South Africa, various pieces of legislation that gives effect to the intentions of the Constitution in respect of spatial planning, and the associated policies that outlines the spatial transformation and development agenda. Provincial policy includes occurs in the form of the Eastern Cape Provincial Development Strategy and the accompanying Spatial Development Plan. The ANDM SDF aligns with these policy directives and enables the municipality to contribute to the attainment of the spatial development targets and objectives outlined in these policies and deals directly with the spatial issues facing the district.

##### **6.1.1.1 Spatial Mandate**

Since the beginning of the new democratic era in South Africa, the notion of spatial planning has become an integral part of the development planning and transformation discourse in South Africa. The Constitution (Schedule 4 Part B) bestows this responsibility to local sphere of

government. In the interim, municipalities give effect to this mandate through the Development Facilitation Act, Act No. 67 of 1995 and the Municipal Systems Act, Act No. 32 of 2000. The latter requires a municipality to prepare and adopt an SDF as part of its IDP.

On 6 May 2011 the Department of Rural Development and Land Reform published the Draft Spatial Planning and Land Use Management Bill for public comment. Once passed into law, the proposed legislation will replace the Development Facilitation Act No 67 of 1995, Removal of Restrictions Act No 84 of 1967, the Physical Planning Act No 88 of 1967 and other laws.

The Bill provides, *inter alia*, for a uniform, effective, efficient and integrated regulatory framework for spatial planning, land use and land use management in a manner that promotes the principles of co-operative government and public interest. It provides for and determine development principles, compulsory norms and standards for land use management, and promotes sustainable and efficient use of land.

As prescribed in the bill, the ANDM SDF gives effect to the development principles enshrined in the bill, and presents both a narrative and visual representation of a five year spatial development plan. It assumes a long term vision and identifies significant structuring and restructuring elements of the spatial form. It is intended to guide delivery of basic services, reshape settlement patterns and enhance the quality of the environment.

#### **6.1.1.1 National Spatial Development Perspective**

The National Planning Commission (NPC) has been established and tasked *inter alia* with the formulation of a long term strategic plan for the South Africa. The plan will articulate a long term vision and a plan for its implementation. It will shape government's service delivery and development programmes, and guide spatial transformation.

In the interim, the national government has adopted various sector based policy frameworks. The majority of these have serious implications for spatial planning at a local level. In view of the rural nature and underdevelopment that characterises the ANDM, only the following are considered:

- The New Growth Path.
- Comprehensive Rural Development Strategy and the associated programme.
- The Comprehensive Plan for the Development of Sustainable Human Settlements.

## **I. THE NEW GROWTH PATH**

The New Growth Path identifies areas where employment creation is possible, both within conventional economic sectors and in cross-cutting activities. It thus identifies “fostering rural development and regional integration” as one of the five key job drivers. The other four are:

- Substantial public investment in infrastructure.
- Targeting more labour-absorbing activities across the main economic sectors - the agricultural and mining value chains, manufacturing and services.
- Taking advantage of new opportunities in the knowledge and green economies.
- Leveraging social capital in the social economy and the public services.

A critical element of the New Growth Path is to ensure that the drivers leverage and reinforce each other based on their inter-linkages.

It further notes that while urbanisation will continue, a significant share of the population will remain in rural areas, engaged in the rural economy. As such, enhancing rural employment in the ANDM requires the preparation of a spatial perspective that sets out the opportunities available and the choices that have potential to form the basis for aligning government spending, infrastructure and housing investment and economic development initiatives.

## **II. COMPREHENSIVE RURAL DEVELOPMENT PROGRAMME**

The Comprehensive Rural Development Programme (CRDP) seeks to maximize the use and management of natural resources to create vibrant, equitable and sustainable rural communities.

This includes:

- contributing to the redistribution of 30% of the country’s agricultural land;
- improving food security of the rural poor; and
- creation of business opportunities, de-congesting and rehabilitation of over-crowded former homeland areas.

In line with the CRDP, ANDM SDF will, in the short to medium term, prioritise the revitalization of rural towns, stimulation of agricultural production with a view to contributing to food security, and aggressive implementation of land and agrarian reform policies. In the long-term, it will provide for the transformation of rural settlements into efficient, generative and sustainable settlements. This includes the protection of natural resources and identification of areas with potential for investment and job creation.

### **III. COMPREHENSIVE PLAN FOR THE DEVELOPMENT OF SUSTAINABLE HUMAN SETTLEMENTS**

The Comprehensive Plan for the Development of Sustainable Human Settlements (August 2004) promotes the achievement of a non-racial, integrated society through the development of sustainable human settlements and quality housing. This program seeks to use housing delivery as a means for the development of sustainable human settlements in support of spatial restructuring. It moves beyond the provision of basic shelter towards achieving the broader vision of integrated, sustainable and economically generative human settlement systems at both local and regional scales. The following are fundamental tenets and underlying principles of this new approach:

- progressive informal settlement eradication;
- promoting densification and integration in urban centres;
- enhancing spatial planning in both urban and rural contexts;
- enhancing the quality and location of new housing projects;
- supporting urban renewal programmes; and
- developing social and economic infrastructure.

#### **IV. PROVINCIAL SPATIAL DEVELOPMENT PLAN**

Provincial Spatial Development Plan embraces the national spatial planning principles, and advocates, *inter alia*, for the following:

- Optimum conservation of environmentally sensitive areas and indigenous forestry;
- Development of the five major tourism/recreational areas in the province including the Maluti Route;
- Development of nodal points including towns such as Mt Frere, Mt Ayliff, Bizana, etc;
- Adoption of a hierarchy of settlements linked to the three investment levels namely regional, district and smaller towns (villages and settlements);
- Developing an efficient and accessible transportation networks;
- Spatial Development initiatives; and
- Fostering small-scale agriculture as the cornerstone of a rural development programme.

#### **V. PROVINCIAL GROWTH AND DEVELOPMENT PLAN**

The Eastern Cape Provincial Growth and Development Plan 2004 -2014 provides a strategic framework, sectoral strategies and programmes aimed at rapid improvement in the quality of life for the poorest people of the province. It sets out a vision with sequenced and quantified targets in areas of poverty eradication, agrarian transformation, economic growth (diversification manufacturing and tourism potential), infrastructure development, human resource development and public sector institutional transformation. It is thus critically important for the ANDM to pursue spatial transformation and development within the context of the PDGP, and to advance the aims and objectives of this overarching strategy and provincial development vision

#### **4.3.8 IMPLEMENTATION FRAMEWORK**

##### **Implementation approaches and priorities**

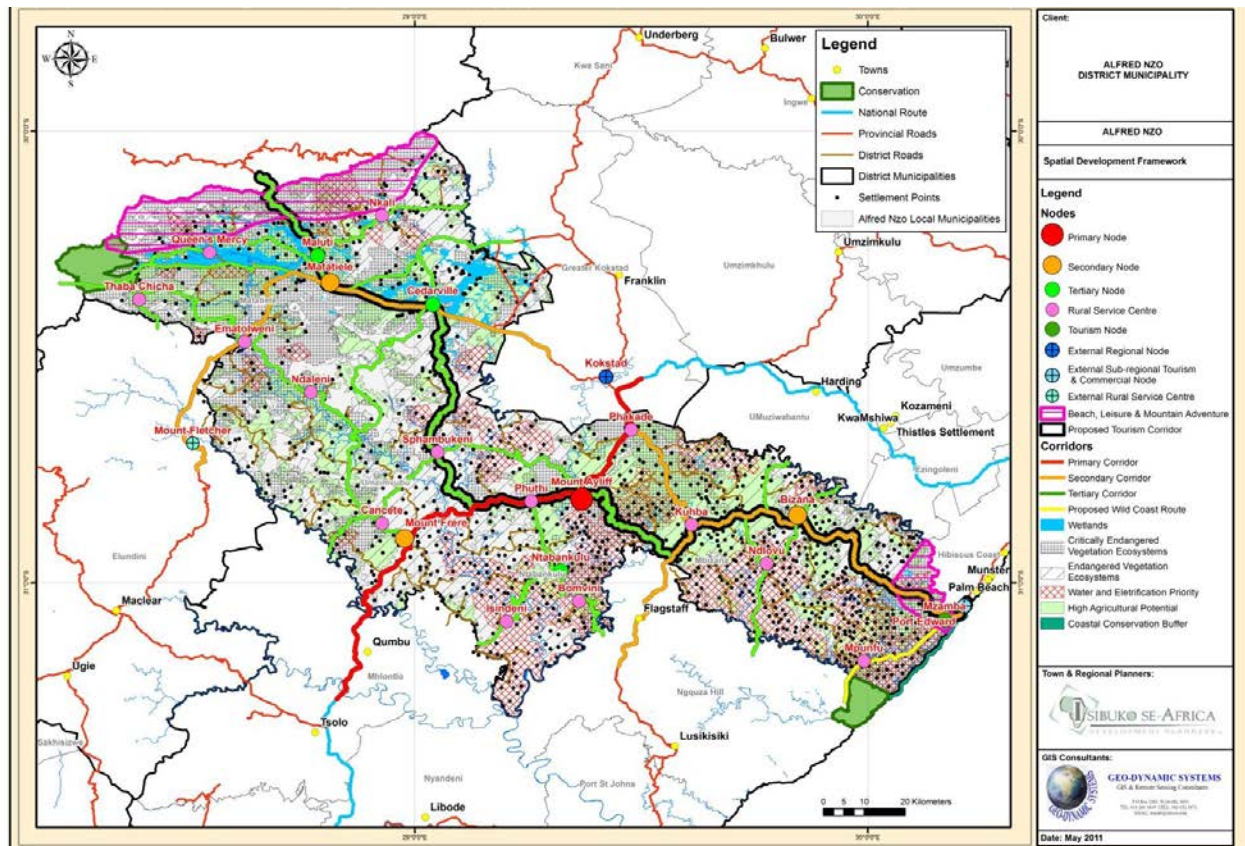

Although the development and upliftment of the district municipality and its communities will require a great number and variety of development inputs, such development should be guided by an agreed strategic focus.

As an extension of the IDP, the SDF provides spatial guidance of what the development of the district should ultimately consist of. The implementation framework of the Alfred Nzo District suggests that the development effort is primarily focused on five strategic development aspects i.e.

- Providing improved internal and external access and linkage, ie. Enabling communities to access activities and opportunities in the district, enabling local economic development to be linked to areas of opportunity and activity, enabling external investors and visitors to access the various regions.
- Improved service delivery to rural and urban areas, i.e. ensuring that preconditions are created for the communities of the substantially rural district to utilize the development opportunities inherent in the area and to provide adequate support systems, this would include both a range of appropriate physical and social services.
- Facilitating more efficient agricultural development, i.e. further developing one of the main economic opportunities of the district by supporting existing activities, identifying additional opportunities and markets and by developing appropriate support systems.
- Developing the tourism potential and managing the environmental resources, i.e. identifying tourism opportunities, establishing a district-wide tourism structure which includes the variety of existing and potential tourism venues and which links them to wider provincial systems.
- Focusing on the development of a hierarchy of service nodes, i.e. creating appropriate structures and providing development input and guidance into the establishment of the identified district, primary, secondary and tertiary nodes.

linkage, on expanded agriculture and tourism development, appropriate environmental protection and utilization and, not at least, on the upgrading and development of an appropriate hierarchy of service nodes.

## 6.2 ENVIRONMENTAL MANAGEMENT PLAN

Understanding the importance of environmental management, the district municipality embarked on the preparation of the District Environmental Management Plan which shall play a crucial role in ensuring that development within the district is sustainable and promote sustainable environment in the whole district. The current EMP is still at a draft level and summarized below:

### 6.2.1. EXECUTIVE SUMMARY

The National Environmental Management Act of 1998 makes provision for all local authorities to develop and implement a strategic environmental management framework, often colloquially referred to as an EMP, or Environmental Management Plan. The Alfred Nzo District commissioned this plan in December 2009, to be developed by a local environmental and planning consortium. The process was guided by and closely consulted with a project steering committee comprised of representatives from the District, two local municipalities, relevant Departments in the District, including Environment Affairs, DME, Agriculture, Health and other stakeholders such as the Working for Water programme implementers. The purpose of the Plan or framework is to provide the district with a comprehensive picture of the status of the environment, and give strategic direction and structure for addressing problems and opportunities concerning environmental matters, especially related to resource management. It must be noted that the District is largely rural, with over 85% of the mainly Xhosa population residing in rural settlements with limited services. The three main towns of Mt Frere, Mt Ayliff, and Matatiele, plus the two smaller towns of Maluti and Cedarville, comprise the EMP thus needs to take account of the range of landscapes, resources and requirements in the District. The process consists of four main tasks, namely inception, a status quo assessment and report (concerning physical and desk top findings and precedent studies), compilation of the Plan / Framework itself (reflected in this document) , and development of an action plan and budget for implementation of the Plan. The latter task includes support and capacity building for target groups, and will be implemented once the contents of the Plan / Framework is endorsed by the

Municipality. The EMP will provide a strategic tool for promoting sustainable development both throughout the municipality and for specific developmental and economic programs. In this context, the EMP is the foundation for responsible decision making and management of ecological and cultural resources

#### **6.2.1.1 LEGISLATIVE FRAMEWORK**

It must be noted that the national policies and legislation governing both municipal level services and responsibilities, as well as the use and management of natural resources such as water which sustain many of these services, are well developed and comprehensive, and the onus for compliance lies with local authorities. Water service provision in particular is the responsibility of the District, with DWA as a guide and authorization authority, with an important regulatory and watchdog function. Waste management is also an important basic service, and is not as well recognized or institutionalised within the District as the often more urgent issue of water supply. The status quo report (outcome of task 2) includes an outline of relevant legislation pertaining to environmental planning and management for the District.

#### **6.2.1.2 SUMMARY OF ENVIRONMENTAL STATUS QUO**

- 85% District population living in rural settlements, dependent to various degrees on surrounding resources as a buffer
- Majority are grant dependent vs actively productive
- Passive land use e.g. extensive grazing and \_Massive food\_ projects
- Degraded resource base in lower lying areas produces lower yields for same inputs
- System failure will result in massive problems and constituency looking to leadership to \_solve\_
- Growing populations in towns facing resource shortages and quality issues e.g. sewage into landscape due to overloaded systems

**The vital factor is that LANDSCAPE RESOURCES UNDERPIN LIVELIHOODS. Without appropriate custodianship of the landscape and its resources, the economy and associated society cannot thrive**

### **6.2.1.3 PRINCIPLES UNDERPINNING AN ACTION STRATEGY**

#### **RESOURCE MANAGEMENT AS PRIMARY FOCUS**

- Focus on sustaining healthy ecosystem function where possible (e.g. in intact areas), with transformation of degraded areas to become more productive, e.g. converting wattle jungle into managed plantations.
- Use CBNRM approach combined with poverty relief activities to rehabilitate unproductive land and maximise spread of returns. Have economic basis with long term returns, not just input of capital and poverty relief.
- Sustainability must take precedence over short term political appearance and expediency.
- See the big picture (geographic and timescale) and cumulative impacts of local action.

#### **BE APPROPRIATE**

- Actions must be appropriate for area (within capacity of social & physical resources, suitable for local situation e.g. urban vs rural, lowlands vs mountains)
- Make use of local role models and ‘champions’ and indigenous knowledge systems. Build on local knowledge & best practise e.g. conservation agriculture.
- Use locally driven forums rather than national ‘programme’
- Target areas where progress can be made and seen i.e. have an impact rather than demoralize target groups
- Take impacts & demands of HIV pandemic into account.

#### **SOUND MANAGEMENT**

- Practical & realistic timeframes and targets to avoid disappointment and non-delivery
- Sound project management and facilitation

- Increase awareness and capacity of target groups through effective outreach to meaningfully participate, not just be labourers.
- Cost effectiveness and accountability for the use of public funds for any actions

## **STANDARD REQUIREMENTS FOR IMPLEMENTATION OF THE EMP**

1. Commitment of top management.
2. Reviewing the present status of the district to determine its capability to implement and monitor the EMP.
3. Designation of the manager representative and establishment of a PSC to monitor implementation of the EMP and compile necessary documentation and records.
4. Holding workshops for managers and members of the PSC to agree implementation standard and expectation.
5. Determining plans, implementation methods based on the legal framework.
6. Defining the environmental policies of the district to inform existing and future programmes and plans.
7. Implementing the training for employees of all levels.
8. Implementation of the designed environmental management plans.

### **6.3 INTEGRATED WASTE MANAGEMENT PLAN (IWMP)**

The Alfred Nzo District Municipality as a result of 2011 Demarcation Process has experienced changes in its jurisdictional boundary since it inherited two new local municipalities (Mbizana and Ntabankulu) from O.R. Tambo District Municipality hence it has embarked on the review process of its Integrated Waste Management Plan Adopted in 2010 since it does not reflect the current set-up of the municipality.

## 6.4 WATER SERVICE DEVELOPMENT PLAN

As a Water Service Authority, Alfred Nzo district Municipality during 2009/10 prepared and adopted its Water Service Development Plan and the following goals were formulated by the municipality through the WSDP:

- Delivery of sustainable water services to address backlogs in water services and also look into operations and maintenance of existing schemes. Provision of basic sanitation improved urban sanitation.
- Integrated Water Resource Management-economic viability to ensure sustainability, operations and maintenance of existing schemes and improving accounting and management techniques.
- Efficient and effective water services institutional arrangements-build up institutional capacity, boost revenue base through economic development, improve service delivery mechanisms, implement appropriate WSP mechanism, implement the WSP Business Plan for the management of the WSP function by WSA

The Alfred Nzo District Municipality as a result of 2011 Demarcation Process has experienced changes in its jurisdictional boundary since it inherited two new local municipalities (Mbizana and Ntabankulu) from O.R. Tambo District Municipality hence it has embarked on the review process of its Water Services Development Plan adopted in 2010 since it does not reflect the current set-up of the municipality.

### 6.4.1 SANITATION MASTER PLAN

The purpose of this Sanitation Acceleration Strategy, herein called Sanitation Master Plan is to address all types of sanitation backlogs within the district, it stipulates policies governing the Alfred Nzo District Municipality's (ANDM) action plan, defines a coherent set of programme objectives, broad methodologies, budgets and time frames with clear expected outputs and deliverables. It serve as a coordination reference point and macro management tool for sanitation improvement and sustainable service provision in all areas

and settlement types in the district over the next five to ten years as quick fix to balance lives of all community members within the district. It will strengthen multi-annual action planning and budgeting such as Service Delivery Budget implementation Plans (SD-BIP).

Areas impacted by sanitation programme include the following;

- Rural settlements and Farm dwellers
- Institutions such as clinics and schools government complexes in rural areas
- Urban informal settlements and
- Urban formal settlements that had sub-IDP standard toilets

It also deals with softer issues such as;

- Health and Hygiene
- Indigent policy
- Sustainability with respect to O&M and tariff affordability, etc.

The document supplements ANDM IDP with focus to sanitation. It provides practical approach to Municipality policy adherence and strategic thinking towards addressing sanitation backlog, particularly rural sanitation. It provides common forum to sanitation delivery not just by the technocrats but also decision makers in the political realm.

- Provides District level backlog data ring fencing, which is used for planning and budgeting purpose in trying to meet the 2010 or 2014 targets. Based on the established fact that backlog data varies considerably between different departments and census interpreters, series of meetings were held to establish consensus, where acknowledgement was made that Alfred Nzo DM has a considerable backlog, especially with regards to rural sanitation now estimated at 70% of total sanitation.
- The master plan provides revised and updated information agreed with Alfred Nzo District Municipality, endorsed by DWAF regional, DWAF National Information

Systems office and Operation Gijima team on the following areas;

- Sanitation backlog data
- Service Level Strategies (Technology options, Operation and maintenance costing, procurement approach etc)
- Costing Model
- Funding Strategy
- Implementation Strategy
- Monitoring, Evaluation and Reporting
- Institutional Arrangements
- Risks, Constraints and Assumptions

### ***Water Services Development Plan***

Alfred Nzo District Municipality has aligned its planning along the Integrated Development Plan (IDP) as instituted in the Constitution, in the local government legislation and in the Water Services Act.

Stipulated in their WSDP the Alfred Nzo District Municipality, the ANDM has adopted the following VISION for its integrated development over the five years:

#### **“An improved quality of life for residents”**

Alfred Nzo District Municipality also has Municipality has external and internal mission. The external focuses on the community while the internal focuses on the District Municipality set for itself the following goals to meet its obligation:

Externally

**“Fight poverty through stimulating the economy and by meeting basic needs and improving service delivery quality and capacitating government and communities”**

Internally

**“Improve corporate governance and financial viability to support the effective, efficient and economical delivery of core powers and functions and the creation on an enabling environment for economic development”**

The objectives of the ANDM regarding the water services are as follows:

- 1. To provide clean water to all by 2008**
- 2. To eliminate sanitation problems by 2010**
- 3. To eradicate bucket systems by 2007**

Alfred Nzo therefore considers the years 2008 – 2010, a period levelling of plain field in terms service delivery balancing by ensuring that all its citizens attain the basic service pledged by the National Government.

The Alfred Nzo District Municipality Indigent policy principle is to ensure that poor households are not denied their right to access to basic services. They are required to implement an indigent support policy that makes adequate financial provision to ensure the provision of efficient and sustainable basic services to all residents within their area of jurisdiction.

However, DWAF’s practical definition of poor household is any household with total earnings of less than the minimum wage level i.e R800 per month. ANDM, through their IDP considers any household with total earnings of less than R1600 to the poor. Approximately 93% of households within this district fall below this level.

### ***Overview of Requirements to Achieve the Vision***

Alfred Nzo's sanitation challenges are compounded by institutional, financial and political challenges as well. There is currently a challenge with regards to buy -in from councillors to ensure adequate prioritisation of sanitation and there is a need for political support with regards to operation and Implementation of this plan at the LM level.

In order to normalise this situation, it is essential that a decision framework is strengthened to ensure adequate rural prioritisation of sanitation projects required to meet the sanitation backlog in the District Municipality. In addition the institutional arrangements and structures, collaboration between relevant stakeholders is required, supported by a capacitated programme management function.

In order to achieve the vision of accelerating service delivery with regards to sanitation in Alfred Nzo District Municipality, a sanitation business process is required which can be depicted as follows:

***Figure***

***0-1: The Sanitation Business Process***

The above chart outlines the Sanitation Programme Process. His Master Plan will address the strategies for dealing with each process group in a structured way.

The Master Plan should be viewed as quick fist tool that can be utilised as a reference point by all stakeholders in the sanitation delivery. It highlights sanitation out of the WSDP and provides a separate guide to detailed implementation plans.

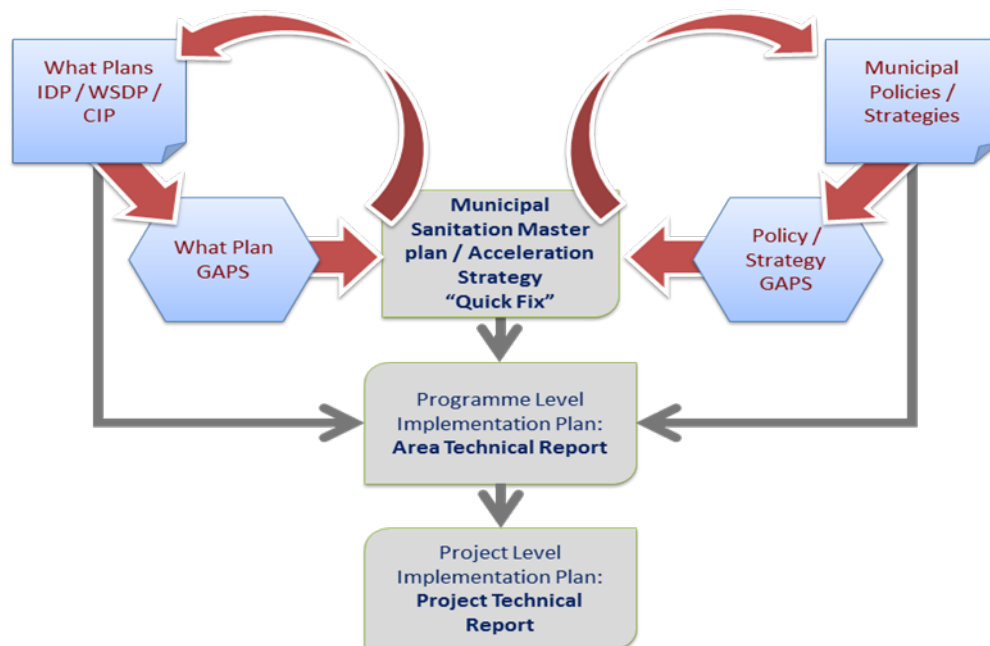

Figure 1.2 Master Plan Interface

## 6.5 MUNICIPAL DISASTER MANAGEMENT PLAN

The Alfred Nzo District Municipality (ANDM), in terms of the Disaster Management Act, 2002 (Act 57 of 2002), is required to compile a municipal disaster management plan. Alfred Nzo District Municipality during 2010/11 financial year embarked on the development of its Disaster Management Plan however such plan could not be approved due to demarcation changes where the municipality inherited new local municipalities (Mbizana and Ntabankulu) from O.R Tambo hence the municipality has restarted the process to ensure that the plan reflects the current municipal set-up.

## 6.6 ENVIRONMENTAL MANAGEMENT PLAN

In compliance with National Environmental Management Act, Alfred Nzo District Municipality developed its Environmental Management Plan which was adopted by Council in 2010 however due to 2011 Demarcation changes where the municipality inherited new local municipalities (Mbizana and Ntabankulu) from O.R Tambo hence the municipality has embarked on the review of Environmental Management Plan.

## 6.7 FINANCIAL PLAN

Progress is being made with respect to the implementation of district priorities that are primarily focused on the powers and functions of the municipality. Alfred Nzo District Municipality is both a Water Service Authority and Water Services Provider; hence the key priority is to meet the target set by the Department of Water Affairs that every household should have access to clean water by 2014. Most of our plans and strategies are in place, and now our efforts and resources are focused on accelerating implementation and action.

The efforts of the leadership converge on investing more funds in water and sanitation infrastructure in the medium term revenue and expenditure framework. The spending on infrastructure is in congruence with the national and provincial priorities in an endeavour to improve the quality of lives of South Africans.

The total draft budget for 2012/2013 is R899 745 000 representing 13% increase from 2011/2012 budget. The draft budget comprise 39% (R349 943 150.00) total operating expenditure and 61% (R549 801 850.00) of capital expenditure.

### DRAFT BUDGET PER KEY PERFORMANCE AREAS

Local Economic Development	17 950 736.00
Good Governance and Public Participation	76 522 587.82
Infrastructure Development and Municipal Services	692 643 488.00
Institutional Arrangement and Municipal Transformation	37 413 289.00
Financial Viability	75 214 898.68

## TOTAL INCOME PER SOURCE

Total own income	R62 545 000
National allocations	R807 246 000
Provincial allocations	R19 654 000

## TOTAL EXPENDITURE BUDGET PER CATEGORY

TOTAL EMPLOYEES RELATED COST	138 314 836.00
TOTAL REPAIRS & MAINTENANCE	28 708 935.50
GENERAL EXPENDITURE	182 919 378.50
CAPITAL PROJECTS	549 801 850.00

## **JOB CREATION PROGRAMME**

Alfred Nzo District Municipality has created job opportunities through the bricklaying activities carried out in 7 zone centres in the implementation of the rural VIP sanitation programme. These employees benefit from the EPWP being rolled out in the form of a grant by the National government. The municipality will sustain these jobs through the grant allocations indicated in the next budget year.

## **PROMINET BUDGETED PROJECTS PER DEPARTMENT**

### **Local economic development**

A budget of R6m has been provided for laying foundation in terms of LED strategy formulation and all other plans aimed at positioning the district to be able to stimulate economic growth.

## **Infrastructure Development and Municipal Works**

The budget for repairs and maintenance of the water and sanitation infrastructure has been provided at R22m with the main aim to provide sustainable water and sanitation services to Alfred Nzo District Municipality community.

The budget appropriation of R17,8m is provided for enabling environment which includes the development of ground water management plan, water quality management, dam safety plan, effluent management plan; etc.

The implementation of EPWP is budgeted for as per the DORA allocation of R9 604 000.00 which result in the expansion of job creation capacity of the municipality.

## **Budget and Treasury Office**

The municipality made an appropriation of R1m for improving its financial management systems and R2m for implementation of Generally Recognized Accounting Practice in pursuit of operation clean administration. The insurance for the assets and other risks to which the municipality is exposed is budgeted at R2m which includes stated benefits for Councilors as well as officials.

The municipality has also budgeted for the development of the fixed asset management strategy which will guide the municipality on how the preventive maintenance system can be in place and when will the infrastructure assets will be refurbished.

## 6.8 INSTITUTIONAL ARRANGEMENTS

### 6.8.1 HR STRATEGY

Having realised the need for a new HR Strategy, the municipality had encountered numerous challenges. Amongst these challenges *inter alia* included:

- Low staff morale; Lack of resources; Lack of clear culture; Poor Relationships: Lack of Consistency; Favouritism; High level of Interference; Lack of Information sharing; Lack of understanding; Unclear roles and responsibilities and Poor segregation of duties.

Notwithstanding the above, the municipality had identified twelve (12) strategic areas in the previous HR strategy as a response to issues that confronted the municipality at that time.

These were as follows:

1. Recruitment and retention;
2. Remuneration and reward;
3. Organisational development;
4. Diversity and employment equity;
5. Performance management;
6. Policy framework;
7. Employee health and wellness;
8. HR Systems and Technology;
9. Education, Training and Development;
10. Employee relations;
11. HR effectiveness; and
12. Management of transformation.

#### **Key drivers for change**

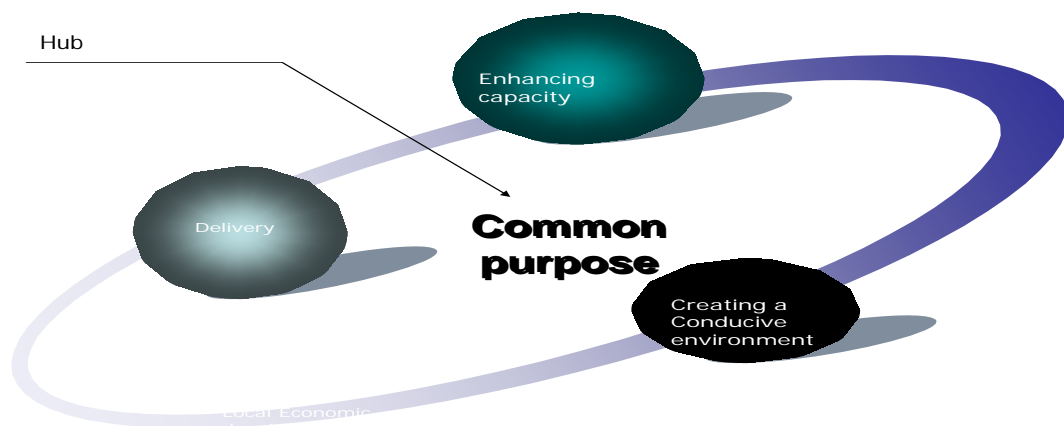

Considering challenges identified above, it was imperative for the municipality to introduce the impetus for strategy change in order to develop an appropriate response to its pressing challenges.

### Strategic wheel of success

A strategy map was developed and all the challenges identified in 2.1 above were consolidated and into four strategic areas. These strategic areas are as follows:

1. Delivery;
2. Enhancing capacity;
3. Creating a conducive environment; and
4. Common purpose

The strategic wheel of success has four components that together constitute our wheel of success. The first three – delivery, enhancing capacity and creating a conducive environment constitute the spokes of a virtuous wheel. At the hub of the wheel is common purpose the necessary starting point.

## 6.8.2 EMPLOYMENT EQUITY PLAN

The municipality has developed and approved its 5 Year Employment Equity Plan which shall be reviewed on an annual basis. The current situation on the employment equity is summarized below:

Occupational Levels	Male				Female				Foreign Nationals		Total
	A	C	I	W	A	C	I	W	Male	Female	
Top management	0	0	0	0	0	0	0	0	1	0	1
Senior management	3	0	0	0	0	0	0	0			3
Professionally qualified and experienced specialists and mid-management	17	0	0	0	8	1	0	0	0	0	26
Skilled technical and academically qualified workers, junior management, supervisors, foremen, and superintendents	36	2	0	0	30	0	0	0	1		69
Semi-skilled and discretionary decision making	45	3	0	0	40	2	0	0			90
Unskilled and defined decision making	84	3	0	0	19	0	0	0			106
<b>TOTAL PERMANENT</b>											
Temporal employees	3				6						9
<b>GRAND TOTAL</b>	<b>188</b>	<b>8</b>	<b>0</b>	<b>0</b>	<b>103</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>2</b>	<b>0</b>	<b>304</b>

Alfred Nzo District Municipality recognizes the legacy of past discrimination during which people were denied opportunities to quality education, employment and development on the basis of race, gender, HIV/AIDS, marital status, sexual orientation, religion; ethnic/social origin, age and disabilities. In endeavor to redress those imbalances, ANDM has committed itself to the principles of equal opportunities, fair employment practices and people development

## **STATEMENT OF INTENT**

- The ANDM is committed to the implementation of employment Equity to redress the legacy of past discrimination during which people were denied access to equal opportunities based on their race, gender, HIV/AIDS, marital status, sexual orientation, religion; ethnic/social origin, age and disabilities;
- ANDM is committed to redress the past legacies through the establishment of EE Forum;
- In order to guide its implementation process and review, the municipality developed an Employment Equity Plan covering a period between 2010 and 2015;
- The plan needs to be continually reviewed and updated annually to ensure that it is consistently in line with the economic realities of the Municipality.

## **OBJECTIVES**

These are based on the implementation of the affirmative action measures, elimination of unfair discrimination in employment policies, practices and working environment.

- Improve the gender representation at senior management up to lower levels from 35% to 50%;
- Improve the over/under-representation of people from different designated groups in all occupational levels within ANDM;
- Eliminate barriers identified in employment policies and the working environment;
- Compliance with the requirements of the Employment Equity Act

## **STRATEGY**

Through its employment Equity strategy, ANDM seeks to transform its workforce profile to be reflective of the country's demographics and to create an environment that is conducive to all people realizing their own potential. It is recognized that by managing all aspects of our diverse culture a significant contribution could be made to the ultimate objectives of improving the municipality's efficiency.

### **6.9 HIV AND AIDS STRATEGY**

The municipality developed and approved its HIV and AIDS Strategy however it has embarked on a review process.

### **6.10 COMMUNICATION STRATEGY**

The municipality has developed and adopted its Communication Strategy which is reviewed on an annual basis.

## **VISION**

- Improving community's livelihood by effective and efficiently communicating Municipal Programmes.

## **MISSION**

- To always achieve Excellency in providing communications and consumer satisfaction to fulfill commitments made to our communities by the Alfred Nzo District Municipality.

## **OBJECTIVES**

- Aggressively communicate in partnership with government sectors government priorities in the context of the IDP.
- Capacitate communities by putting them at the forefront on decision making in all government programmes and activities through CBP and IDP processes.
- Community mobilisation to ensure inclusive participation in all government activities.
- Ensure the strengthening of external and internal communication through IGR.
- Disseminate information to the public in all languages spoken in the District.

- To provide communication support to all Local Municipalities.
- To improve brand repositioning of the District Municipality.
- Strengthen internal communications in the district's administration through the development of internal communications strategies.

## 6.11 LOCAL ECONOMIC DEVELOPMENT STRATEGY

The municipality is in the process of developing its LED Strategy, however the municipality has developed the Economic Leakage of the District to further inform the LED Strategy to ensure credibility of the LED Strategy.

Figure 5.3: Forces promoting and limiting regional growth and development

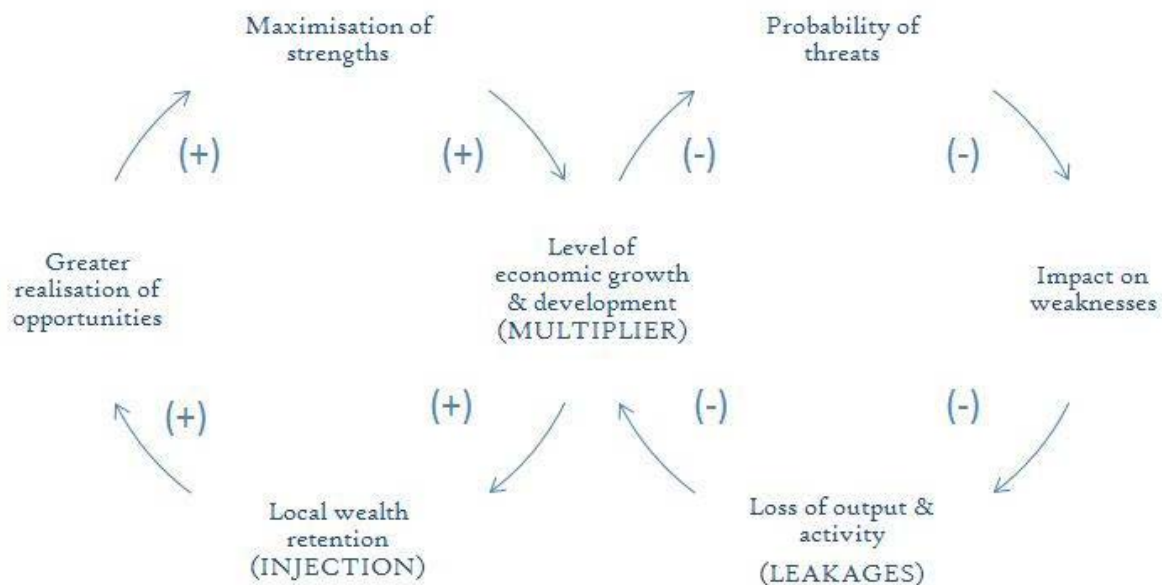

Figure 5.3 has the level of economic growth and development at its center, and shows positive and casual factors on the left hand side and negative casual factors on the right hand side. An output of positive economic growth in the form of local wealth in the form of local wealth retention is seen later as becoming an input into economic development through the maximization and building of regions strengths (left hand side of figure 5.3). Similarly, an input leading to underperformance in growth and development in the form of leaked output becomes an output of economic growth in the threat of negative leakage impact being more probably.

What is important in figure 5.1, 5.2 and 5.3 is the need for emphasis on the relationships between the systems part rather than the individual properties of the parts themselves. This is useful as it sheds light on controllable changes and those structural issues that can not be adequately dealt with in the short to medium through policy and strategy instruments. In other words it would not be prudent to focus entirely reducing or mitigating economic leakages without taking due cognizance of the other casual factors that have a bearing on the trajectory, geography and nature of economic leakage.

### **6.11.1 STRATEGIC DEVELOPMENT FRAMEWORK**

This sections presents the approach to managing economic leakage that will be put forward for implementation by the ANDM. Based on the discussion in the previous section, a strategic development framework was conceptualized. This is based on research outcomes presented in previous chapters and represents a systematic perspective to addressing economic leakage in the district. In line with best practice principles the strategic development framework has the following elements:

A vision that is end orientated and describes a desired outcome in a preferred future for participants in the economic system

Goals that allow assessment of progress in the achievement of the vision through the provision of performance standards and targets

Leverage points, being identified areas of need in terms of intervention and action that will allow goal achievement.

Initiatives that provide detailed approaches in terms of what strategic and policy tools and mechanisms need to be implemented in the district

### **i. Vision**

The vision that will guide the strategic development framework considers leakages through the lenses of the economy as a whole, and articulates aspirations towards:

This is based on district and municipal vision shown in the introductory chapter's informant parameters. Brief explanations of some of the elements of the vision as they relate to economic leakage are provided below:

Balance in the economy as shown above takes on two dimensions. The first dimension relates to spatial balance. Ideally, the allocation of resources accessibility of opportunities would be geographically representative and not unfairly skewed to the advantage of one over another. Although the focus of this study has been on economic leakage outside the district, a situation where one town suffers excessive leakages to the advantage of another town in the district would not be optimal. Also included in this is the split between rural and urban development. Mitigation of economic leakage in urban areas, whilst ignoring the fact that the majority of the district population lives in rural areas would be counterintuitive.

The second dimension considered relates to sectoral balance. This refers to the unlocking of opportunities for the establishment, expansion and attraction of business across all sectors of the economy. This element of the vision covers how robust and vibrant sectors other than retail trade and government are in the district.

Growth that is community anchored speaks to the need for local entrepreneurial activity. It is essential that principles of inclusive development be imbued in any attempts to reduce and mitigate economic leakages in the district. This will lead to a high level of economic participation linked to social aspirations of the ANDM residents.

Sustainability means that initiatives proposed for the achievement of this vision must take districts present realities into account. This refers not only to financial viability and economic feasibility of projects and programmes, but also points to the maintenance and management of social capital (e.g the usefulness of partnerships). Institutions will play an important role in the reduction and mitigation of leakages and as such, sustainability in terms of their existence and governance will ensure that progress made in one time period is not eroded or reversed by institutional entropy in a later future period. Consideration of the districts latent features must form an intergral part of strategic action towards the realization of an economy that is characterized by low levels of economic leakage. Tapping into latent features means that economic activity must be based on the regions comparative and competitive advantages. Filling the void and plugging the gaps in the economic “bucket” and is then best achieved through a focus on the districts strengths and opportunities such as the agrarian base and pristine environmental attributes, as well as an awareness of weaknesses and threats such as the low levels of educational attainment.

## **ii. Goals**

The following goals have been developed as part of the strategic development framework for the reduction and mitigation of economic leakages in the district. These are based on the comprehensive knowledge platform which was built in preceeding chapters, identify significant issues and will serve as the main informants for the initiatives to be discussed under each of the leverage points.

The surveys revealed that 1 in 7 respondents live outside the district even though they work in the locality. In addition to this 22% of students that live in the region study outside the district. These two survey statistics are supported or confirmed by information contained in the baseline profile. These goals seek to address economic leakages related to inefficiency in the way the local economy functions. These inefficiencies are expressed in various ways but find their origins in the planning and effectiveness of government institutions. The districts latent weaknesses may be magnified or amplified in terms of the magnitude of their impact as a result of deficiencies in capacity and capability.

Planning and effectiveness are mentioned as these two operational aspects go hand-in-hand and are depended on each other for the government to be successful in its endeavors. A weak and fragmented public sector cannot create or facilitate conditions that are conducive for local economic production, local consumption and ultimately local wealth retention. Such weakness would typically manifest in the form of poor implementation, monitoring and evaluation. Institutional effectiveness is thus very dependent on the strengthening of these functions.

#### Local Business Development as a vehicle for wealth retention

Only 44% of business in the district are entirely local in origin. Furthermore 31% of business had to turnover of less than R100 000, with half of all respondents reporting operating expenditures of less than R50 000. These statistics point to a small local business sector that is dominated by outside interests that would typically repatriate profits to their headquarter locations. The statistics also point to a local business sector in which micro-size entities dominate and face “glass ceilings” that inhibit their growth potential from achieved.

This goal is involved with the need to promote the establishment of local businesses in all sectors of the economy for the creation of a local entrepreneurial class that can be reckoned with on a regional level. Excessive economic leakage will be perpetual occurrence unless a sizeable local entrepreneurial class is created as the majority of business ownership and management is by entities that are not based in or do not originate from the area, thus not having its best interest at heart. This goal aligns with the vision aspiration of a balanced economy. Spatial and Sectoral Balance can only occur when the local business sector is able to act as a counterbalance to the role played and provided by larger business from outside the region. This goal is not to be seen as a call for protectionist insular policies as it is recognized that large businesses play an important role in terms of investment injections into the district. This goal is about measures to make the local business sector more competitive.

### **Leveraging public expenditure to allow improved realization of development opportunities in the district**

The survey results showed that several government departments that serve the district have offices outside the municipal bounds of the districts. Research also revealed that local service providers and suppliers account for a small percentage of all procurement activity conducted by public sector entities operating from or in the district.

This goal is concerned with measures to ensure that all public resources that are earmarked for the district are utilized to foster local economic linkages, rather than perpetuating the cycle of leakages.

South African government organizations are encouraged by the applicable legislative framework to involve the local community and promote the undertaking of development through their supply chain activities, expenditure and procurement. This goal is based on this mandate and strives to see public funds being maximized in terms of their local development impact.

### **Regeneration of the urban and business environment so as to maximize on present strengths.**

The surveys revealed that households in the district are responsible for an expenditure leakage factor of 59%, which may be approximated to roughly 3% of GGP, when asked why they do not shop more in the district, respondents indicated that the quality and variety of local shopping experience deters them. When asked to indicate what factors draw them to their main shopping destinations, respondents indicated price and convenience of the outside shopping destinations as being important considerations.

This points to economic leakage that is linked to the state of the local retail environment. Retail facilities in the district are primarily located in urban centers and a link can be drawn between the management and governance of town centers and quality or nature of retail activity that takes place within a given area. Quality, variety and convenience are all factors that are related to the of retail space available in a place, which in turn is linked to the quality of the urban

environment. This goal is concerned with improving the urban centers of towns in Alfred Nzo with the aim of reducing economic leakage through this move.

Chapter four also showed how intra district trade functions as a buffer that reduces the total quantum of expenditure leakage that occurs in the district. Ntabankulu was found to have the largest expenditure leakage of all towns in the district (double the regional average), despite its business not being well connected to other regions. With 70% of businesses indicating that they were confident about the state of business in the area it can be seen that the regions dynamics create conditions that can not be easily replicated in other places. It is important that the established business sector in the district be afforded appropriate support and assistance, which is what this goal works towards.

### **Reducing loss of output and activity through rural development**

The rural nature of the district presents multiple embedded opportunities linked to the lifestyles of the districts residents. This goal is aimed at reducing and production leakages in the district economy. A strong bases for rural development in the district takes the form of product value chains linked to agriculture, forestry and tourism. Rural development driven by agriculture would be based on an expansion and quasicommercialisation of the scale of activity taking place in the district. As such this would draw on activity already undertaken, and augment the nature of such activity so as to make it more suitable and profitable for rural residents of the district. The agricultural value chain would allow output produced within the region to find its way into the household of urban district dwellers (through local shops), as well other regions. Rural development driven by forestry would be based on prioritization of the region in different government planning documents. Forestry represents a labour intensive activity with significant growth potential in the district. Some forestry activities have relatively low entry points in terms of skill requirements, allowing participation by communities throughout the district. Tourism as a means of rural development would be based on nature and environmental attributes of the region identified in planning documents such as the SDF and masterplans. Rural development through tourism is premised on the provision of infrastructure such as roads and electricity to

tourism destinations, which open up nodes in the district to more than just tourism specific development.

### **Leverage points**

Leverage points are places in a system where a small shift in one thing can produce big changes in everything (Meadows, 1999). In terms of the strategic framework, leverage points are then areas of intervention into the Alfred Nzo economy that will lead to significant changes in the nature and quantum of economic leakage. Leverage points may involve:

- Changes to structures or relationships
- Reinforcing positive feedback loops (In this case local wealth retention)
- Adjusting the mindset of people involved in a system.

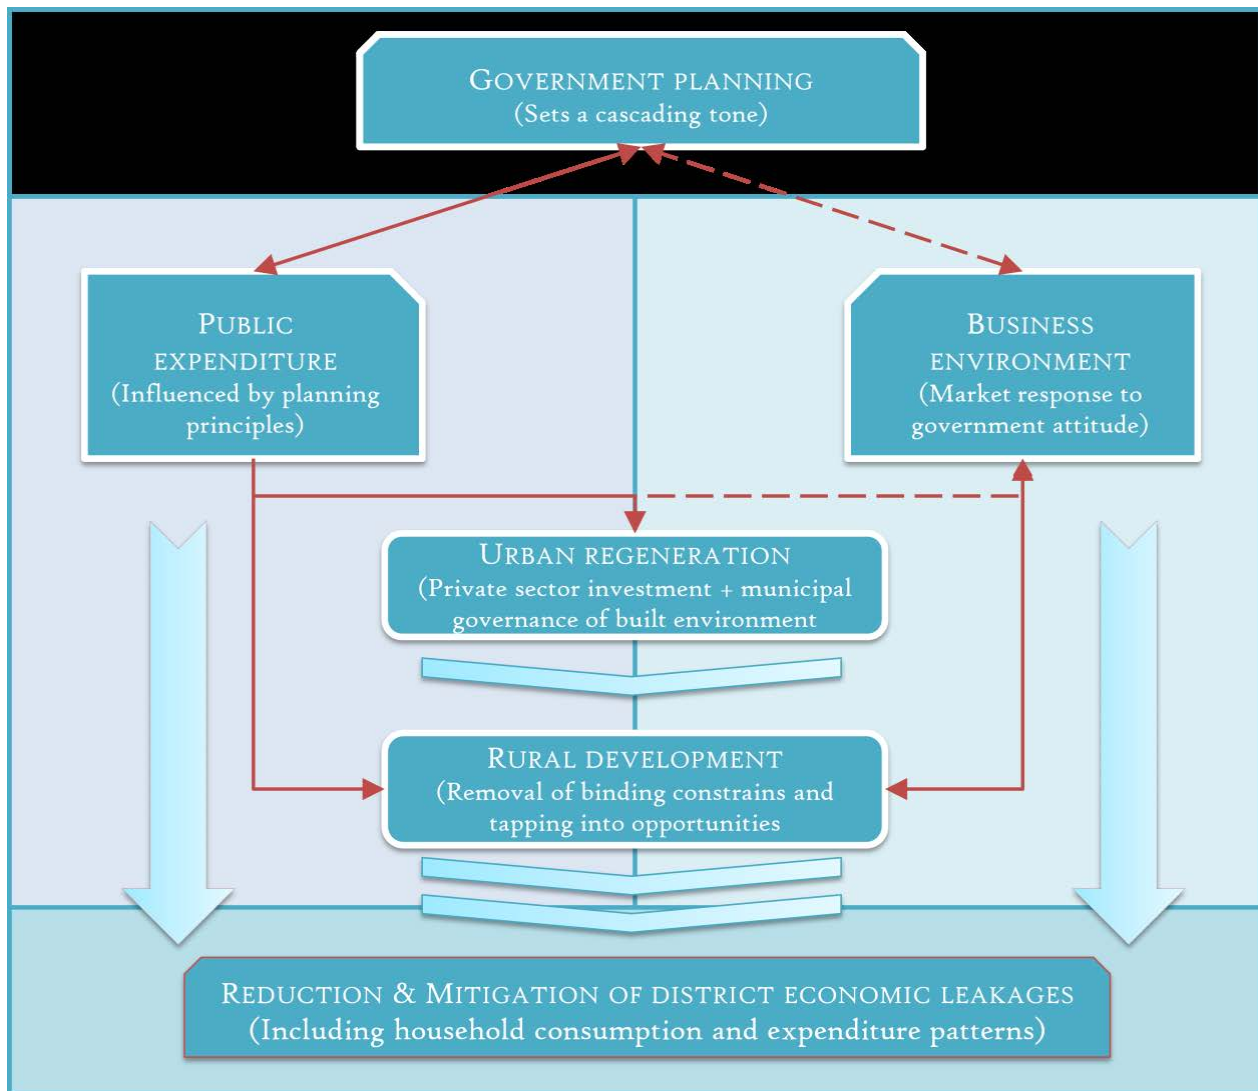

Leverage points in this study are shown in figure 5.4 direct relationships are shown in solid arrows and indirect arrows are shown in dashed arrows. All the elements shown in figure 5.4 are informed by the vision and goals discussed above, and are packaged sets of initiatives geared towards the achievement of reduction and mitigation of economic leakages in the district. The leverage points are aimed at the leakages identified and discussed for households, businesses and the government sector. The leverage points that constitute the strategic development framework for the reduction and mitigation of economic leakage in Alfred Nzo are:

- Government planning
- Public Expenditure
- Business environment
- Urban Regeneration
- Rural development

Implied in all the above leverage points are appropriate institutional arrangements for economic development. This is an important issue that can not be over looked as it is a significant challenge to economic development within the region. Institutional arrangements (public and private) in this context represents important networks, linkages and platforms between stake holders to achieve economic development. In figure 5.4 government planning is seen as a first

step that determines all other subsequent action by both the private and public sectors and defines the rules of engagement. Government planning is then seen as establishing the foundation from which all other economic activity( Including that which relates to economic leakage) in the district is built upon. Government planning as shown above incorporates consideration implementation, monitoring and evaluation activities. Government planning directs the flow of public spending that is undertaken in the district. The amounts spent. Who they are spent on and how the monies are spent are all functions of the prevailing government planning regime. The extent to which plans are followed through in implementation must be considered as well. The impact of this in turn is based on effective monitoring systems. Government planning also influences the local business environment. Through the provision of engineering, town planning and other services, government activities distinguish the local business environment as different to that of other areas. This link is shown as a two way relationship to illustrate how even though government planning dictates the terms on which entities conduct business, There is room for dialog consultation and communication between them. In this framework constructive engagement between the private and public sectors is encouraged. As such, institutional arrangements are realized as being important in this strategic development framework, and are discussed throughout this chapter.

Figure 5.4: Strategic Development Framework- Leverage points

The outcome of improvements in government activities ( planning and spending) and the business environment are seen as figure 5.4 to contribute towards the achievement of urban regeneration and rural development. Transformed government machinery is better equipped to manage urban environments and does this effectively. Similarly, a more robust and vibrant business sector is confident in its physical locality and is more likely to invest in the area, contributing towards urban regeneration. The sustainability of improvements in the urban environment is predicated on the state of development of the rural areas which form the markets of businesses and the implicit clientele of government organisations. Business development can

not take place without improvements in rural areas. Similarly, improvement in the region's rural areas can not take place without business activity taking place. For this to happen government intervention is required to facilitate rural development.

It is important to point out that changing leakages linked to household behavior can only be achieved through actions that target government and business activity. In effect, for household leakages to be reduced, government and business leakages also have to be reduced as households are only consumers, unlike government and business which are producers. Households operate within the realm of economic activity created by business and governments. It is for this reason that government and businesses are specifically targeted, whereas households are not directly targeted. The next section provides descriptions of what initiatives and interventions are entailed for each of the leverage points. The next section lists the initiatives and interventions that are recommended for each of the identified leverage points. These are shown in a tabular format with each table showing :

- The reasoning or motivation behind the decision to include each initiative
- What each of the initiatives is meant to achieve
- Activities entailed as part of each initiative
- How each of the initiatives will contribute towards achievement of the vision and goals previously discussed.

## **7. COMMUNITY OUTREACH ENGAGEMENT**

The municipality after the tabling of the first draft IDP and budget embarked on the community outreach programme where inputs for further consideration by the municipality were made by different and the summary report on inputs is as follows:

**Ha-Nkau**

Questions and Comments

Temoho Ntsholo Ward 13

- Thulamela Water Project that was stopped during implementation poses a danger to the livestock and the children because trenches were left unprotected.
- How does EPWP Fire- wise work?
- Is electricity the role of the Local Municipality or the District?
- Disasters are being reported all these years but there seems to be no response.
- What criteria is being used by the Department of Rural Settlement when determining the beneficiaries of the rural housing.

Mrs Nkai CDW

- How is the Municipality going to address the issue of the sanitation back-logs at Kgubetsoana?
- Which water scheme is going to be upgraded between George Moshesh and Nkai Water Scheme?
- There is generally a water crisis at Nkai.
- They have requested a spot field at Nkai she wants to get progress report.

Thamsanqa Moleko Ward 12

- Where do we get assistance when disaster strikes?
- When are we getting electricity at Nkai?

Vuyisile Mose

- On the issue of yard connection what will happen to those who have done illegal connections.

Seipati Pitso Ward 11

- Is it compulsory that the Chairperson of the PSC be a Ward Committee?
- Can the Churches be assisted with the VIP toilets?
- When legalising the illegal connections does it not mean that the people who can't afford paying will be discriminated in a way because they will not get water.

Mamakalo Makamole Ward 11

- Whose responsibility is it to clean water?
- Who is eligible to get assistance from the Department of Agriculture?
- Is government unable to issue Identity Documents and Birth Certificates to the people of Nkau?
- Is it that difficult to differentiate between the people of Lesotho and South Africans?

Tawana

- Water connections for the new residential areas when are they going to be connected?
- Sanitation what will happen to the infill's.
- How is the Municipality going to address the issue of the old defective toilets and the New toilets?

Lwandle

- They do not have access roads at Nkau.
- The condition of the T Road from Nkau to Matatiele is not good when is it getting attention.
- What can they do to get assistance from the Dept of Agrarian Reform they need bulls in order to improve their livestock.

Morena

- He want to do farming on his own how can he access funding from government for such project?

Vuyani Keswa

- The issue of Mqhobi Access Road of which they have been complaining with and they intend to take the matter up with the Office of the Public Protector if it is not addressed.
- Can't government create jobs for the communities on the rural housing project.

### **Ramohlakoana Community Hall**

- Lack of water in ward 5, pipes were connected in Mnceba village.

- Bridge collapsed at Mngqayi need assistance.
- Ward 7 was promised 54 water tanks but only 24 were received.
- No water in ward 4, boreholes were completed but pipes were not connected.
- Mr. Gabula, toilets were not in ward 1(Skiti Village).
- Challenge with water at Nkululekweni village.
- Need extra water tanks in ward 2.
- Assistance with youth programmes in ward 2.
- Need additional taps at ward 9.
- Water source to be fenced at ward 9.
- Lack of water at Gudlintaba.
- Unattended/non-functioning of Borehole at Gudlintaba (for 15 years).
- Need at bridge at Khohlweni ward 2.
- Shortage of water at Kwamandzi ward 7.
- Shortage of water at Ramohlakoana.
- Need electricity at Ramohlakoana.
- Still waiting for water tanks at ward 4.
- Requested a poultry project at ward 4 and there was no response from the municipality.
- Water scheme at Kwasibi ward 4 is not functioning.
- Need additional water tanks at ward 4.
- Distance from households to water source is too far.
- Need EPWP in ward 4.
- Need electricity in ward 2.
- Municipality to assist with the issue of tractors in Ramohlakoana.
- Municipality to donate 2 tractor at Ramohlakoana.
- Municipality to assist farmers in ward 9. (FM Ntoko ward committee, Cell 079 1169490).

### **Cedarville Community Hall**

- IDP priorities do not appear on the presentation.
- Need assistance with water at Black Diamond.
- Need a borehole at Black Diamond.
- Need assistance with agricultural projects in Black Diamond.
- Access road to Black Diamond needs maintenance.
- Are there plans for better jobs for the youth and disabled of this area? Mr. Sizani from Dark City.
- Ms. Nwabisa from Zingisa needed clarity on tar to Eskolweni that was mentioned at the 2010 budget. (Commitment by ANDM to tar 5km in Cedarville).
- Electricity was not completed in Black Diamond (Ms. Parkies)

### **KwaLunda Community Hall**

Some of the questions or comments by the community

- Water supply status in Ward 6, problem with erratic water supply as well as installation of water taps in two villages within the ward.
- Status of incomplete VIP toilets that were left by Alfred Nzo in 2009.
- Lack of water supply in Sijoka, no electricity supply, endless problems with diesel engine.
- Non-payment of operators
- Provision of generators in villages where there is no electricity as an interim measure.
- Upgrading of water project in Isilindini to also be extended to cater for unserved villages.
- RDP standards not followed in installation of taps – Caba Mdeni

- Non-availability of sport facilities.
- Further clarity on Indigent Policy
- Fencing of pump stations and reservoirs to avoid vandalism

**Responses:**

- The problem at Sijoka is attended to as Eskom has already been paid for the installation of the transformer.
- Incomplete VIP toilets will be attended to but starting with installation of doors, seats and ventpipes.

Councillor Ntayi announced that the SAPS will be handing over the border patrolling to the SANDF by 9<sup>th</sup> May 2012, this has been done due to the fact that rate of stock theft has risen, so the SANDF will assist in reducing it.

**Maluti**

MEETING DIDN'T TAKE PLACE DUE TO ABSENCE OF POLITICAL PRICIPALS FROM THE DISTRICT MUNICIPALITY

**Mangolong**

- Ward 18 and 22 were not present at the meeting.

INPUTS FROM WARD COUNCILOR

- Ward 14 - still has a backlog on VIP toilets. The approach by district on provision on provision of 100VIP per ward per annum is problematic and will delay reversal of backlogs. Water tanks in Thabachicha leaking and there is a need for maintenance. Illegal yard connections affect water schemes.
- Ward 17 - Has 9 villages and only 2 villages with toilets and the 3<sup>rd</sup> one has unfinished toilets. There is still water challenge in the ward. Rain harvest approach

- has halted and there is no clear direction. Need for electricity engine to upgrade the water capacity.
- Ward 24 - Issues of roads is a challenge. Boreholes not giving enough capacity to sustain water provisions. Lack of bulk water supply in the ward. Pre-schools affected by the disaster. Need for mobile clinic to assist in health care.
  - Ward 16 - Need for water maintenance of existing schemes. Nothing is taking place In terms of VIP toilets within the ward. Need to follow up by the district on the allocation of electricity supply and other villages to get Solar Geysers. Ongeleksnek facing the maintenance of roads within the ward. Need for consideration of grain production within the ward.
  - Ward 18 - There is still high back logs on VIP Toilets. 2 out of 14 villages with VIP and other 3 villages not completed. Need for review of 100 VIP toilets per ward per annum.  
Qiki and Sidakeni Tanks are leaking and need to be maintained. ten villages have no water and the rest still have insufficient capacity. ward 18 does not have electricity. Electricity line is just passing to the other area. Road 405 not finalized.
  - Ward 23 - Only one village with VIP toilets completed and other 3 villages have complete toilets. Three villages out of 8 have some interim water supply. Challenge with bore holes and lack diesel for engines. Need for intervention in terms of villages under Matatiele previously serviced by Joe Gqabi.
  - Ward 19 & 20 Town Hall
  - Mtibane ward 20 – need for capacity improvement of water in Dark city and Harry Gwala Ext.
  - Masakal appreciates the deliver of toilets

- Mr Mncedisi Ward 20- need for prioritization of SMME Development to enhance job creation.  
Need for inclusion of government departments budget for meaningful contribution to service delivery
- Mr lungani Mzeze Ward 19- youth development allocation is very minimal  
Water statements issuing needs to be consistent on a monthly basis. Electricity units are not consistent and confusing.
- Mr Mavuta Ward 19 - There is a challenge with plant machine for roads maintenance and such machines need service. Limited resource to be utilized effectively. Appreciation of changes including customer care. Local people need to benefit on the tender programmes of the district.

Ward 19 – challenge with water in Mountain View and needs to be addressed especially in the boreholes- sewer system needs to be improved  
Submissions of bills and need

## **MATATIELE TOWNHALL – WARD 19 AND 20**

- Need assistance with Dongas
- Sanitation project in ward 4 was constructed on cheap material and was not completed.
- Need a community hall at ward 8 Lugelweni.
- Need to look at Goose project in ward 8 Lugelweni.
- The draft budget was accepted by the community.
- 

### **Buffalonek Community Hall**

Some of the questions or comments by the community

- Water supply status in Ward 15, 23 & 24
- Sanitation status in ward 22, and clarity of installation of toilets in vacant and fenced plots.

- Non introduction of service providers by the Alfred Nzo's project managers
- Non-monitoring of project by officials
- Damages on water pipes by road contractor
- Installation of VIP toilets in Zwelitsha, ward 15, as well as infills.
- Incomplete drought relief water projects.
- The Pre-cast VIP toilets are not suitable for other areas which are windy, why not use block structures.
- Lack of skills development for people working in zone centres, there is no skills transfer.
- Installation of VIP toilets in churches.

#### Responses:

- The team responded to the above questions & concerns stating that ward 23 & 24 are part of the Qwidlana water supply project which is already underway but work has only commenced in area 1&2, still to continue to area 3&5 and area 5
- Mrs Mdingazwe responded to that VIP toilets are not installed in vacant sites and churches.
- Damages to water pipes by contractors has to be dealt with by the contractor who was constructing the road.
- WSP to take a look at the incomplete drought relief projects.
- The issue of non-installation of VIP toilets in churches, Skills development and issue of vulnerability of precast toilet structures have been flagged as issue that need attention.

Other comments, Councillor Voyi lashed out at the community for not reporting the community members who are doing illegal connection as there were concerns regarding shortage of water due to un-authorised yard connections.

## **Dangwana**

Inkosi Dangwana ward 20 accepted the draft IDP.

- Raised the issue of roads maintenance
- Mhlabunzima Boy ward 21 employment.
- Mr Ndawana ward 20- challenge with water at Mpheme there is scheme but not functional. Nxabaxha water supply is not consistent in terms of flow. Toilets not sustainable and safety due to lack of slops. Need for sanitations office in Mount Frere to deal with
- Phakama Mloza (Ms) ward 19 Challenge with water flow not consistent or lack of water. Toilets get filled quickly and the healthy standards are low. There is still a challenge of electricity back logs.
- Hlane Ward 19 – about indigent for registration still house holds with no toilets.
- Mr Mzantsi Ward 19 relies on water from Mahamane water projects lots of water pipes and taps affecting water source. Need for monitoring of service providers implementing projects by the municipality.
- Mr Maphekula ward 19 talks about fencing of fields. Lots of accidents on N2 due to lack of fencing.
- Mpindweni village not covered within the proposed schemes.
- Silver City residents no electricity.
- Mr Takashana from Council of Churches seconded the acceptance of draft IDP/Bridget and Pali

## **8.CONCLUSION**

The exploitation of potential resources as reflected in the document is of vital importance for creating jobs and changing the lives of communities of Alfred Nzo District Municipality. Ceasing the opportunities offered by this district and ensuring equitable distribution of economic opportunities in particular in rural areas could ensure a better life for all in the district; and this can only be achieved if all stakeholders lead the same vision of the district and overall objectives of the government of the Republic of South Africa as aligned to the principles of the Constitution.
